

Transforming your space into a medical facility.

The COVID-19 virus has forced the medical community to convert non-medical spaces into surge hospitals.

Andrews understands that hospitals are at max capacity due to the surge in COVID-19 cases. Transitioning spaces into temporary medical facilities is the next step solution in both alleviating hospitals space burden, and tackling the spread of the virus. Our Transition Program provides you the peace of mind in knowing that your fight to battle this pandemic, is our fight too.

Program highlights:

- Furniture Removal
- Temporary Storage
- Transportation of sensitive & high value medical equipment
- Equipment Installation
- Cleaning Services

Whatever your needs are, Andrews will partner with you and utilize our many years of experience as a corporate services company to help keep your business running smoothly during such uncertain times.

We look forward to working together.

What Andrews is doing today to support the COVID-19 pandemic.
