

Sustainable Savings for Companies and Employees

Providing More Visibility and Control

Noveta Health and OMNIA Partners believe that by providing companies with best-in-class partners and full transparency into costs, collectively, we can significantly drive down your healthcare and pharmacy costs. Whether you're fully-insured or self-insured, we strategically address three main cost drivers:

Administrative Services

The administration of healthcare claims can comprise up to 8% of total costs. We have built our own TPA, which eliminates much of the ancillary charges and equates to 5% in savings.

Health Insurance

Our solution is a pure captive, which operates on a flat management fee. Members are billed only for services your employees use. This offers control and savings, typically 15-35%.

Pharmacy Services

Pharmacy services are often the least transparent healthcare cost. Our solution is a one-of-a-kind transparent passthrough model which delivers savings of 30% or more of pharmacy spend.

Supplemental Insurance

Noveta offers an impressive list of voluntary insurance offerings to bridge the gap between what your business can afford to offer and what you need to offer your employees for their satisfaction. Voluntary benefits are free for employers to provide and can lead to federal tax breaks, depending on the plans you choose to offer.

OMNIA Partners Members receive the Noveta Difference

Noveta enrollers speak in person with each employee to ensure full comprehension of benefits, at no additional cost to the OMNIA Partners member.
