PROMOTING SUSTAINABILITY EFFORTS IN EDUCATION

The time is always right to have the future in mind. Canon's unwavering commitment to the environment is evident in our approach to eco-friendly product design, manufacturing, and operations.

To support your sustainability initiatives and help you reduce costs, our product design processes include:

- The use of recycled plastics.
- Low Typical Electricity Consumption (TEC) values.
- Adherence to ENERGY STAR[®] and EPEAT[®] requirements where specified.
- Long-life parts and high-yield supplies.
- Paper and energy conscious device settings.
- Patented technologies that help minimize power requirements.

Visit csa.canon.com for more information on Canon's sustainability solutions that extend from product design to end of life and learn how we can help you meet your environmental objectives today and tomorrow.
