Insight helps you manage business today and transform the future.

How Microsoft solutions will help your organization

Staying up-to-date on the latest innovations in education is the first step in helping students and schools achieve more through today's technologies. The potential of every student is elevated with the right tools in place. Microsoft educational tools are designed to foster creativity and collaboration for a modern, mobile classroom, delivering a complete solution to empower students and educators.

Collaborative tools for education

Microsoft for education enables educators and students to create innovative classrooms, connect in professional learning communities and communicate with school staff — all from a single experience.

- Bring conversation, content and apps together in one place.
- Meet the needs of everyone from students to classrooms to districts.
- Inspire learning in today's modern classroom.
- Use learning apps to unlock ideas and ignite creativity.

Empower students to create a better tomorrow.

STEM lessons and hands-on activities

Help students visualize data across space, earth, life and physical sciences. Lesson plans are written by educators to enrich Science, Technology, Engineering and Math (STEM) classes through activities such as building machines that emulate humans or harnessing electricity to communicate.

U.S. Communities partnership

Insight holds a contract with the U.S. Communities Government Purchasing Alliance. We offer our entire line of hardware, software and services to agencies nationwide. Competitively solicited by Fairfax County, Virginia, this contract meets most government agency piggybacking requirements and features Insight's best overall government pricing — with no user fees.
