

Collect actionable survey insights

Engage — a cloud-based survey platform built for K-12 schools — enables you to easily create impactful surveys, gather community input, and drive meaningful change.

Design purposeful surveys

Build, administer, and analyze community surveys with Engage to build trust, encourage collaborative decision-making, and improve school climate. The platform offers:

- More than 50 pre-built, customizable school survey templates that can be translated into more than 38 languages
- Professional-grade survey logic and formatting features
- Multiple modes of distribution, including email, text message and social media
- Pre-population for an individualized survey experience for each person
- Tools to provide insights into response rates and automatically remind non-responders

Discover actionable data

Easily segment, filter, and disaggregate data with our analytic tools and dynamic reports to garner greater insights, and view current and longitudinal data to help guide the development of action plans to improve student success.

Benchmark your findings

Use our benchmarking school studies to see how your school district stacks up.
