Re: Every Day Counts “Call for Innovative Technologies”

To Whom It May Concern,

At Wilson & Company, we have been very pleased with the Lithified Technologies product as solution for a road project engineering design. Not only did the Lithtec product perform well in laboratory testing, but the installation and field results exceeded expectation. The installation time for the product is a great benefit. It was definitely a successful implementation for our client and our firm. We are excited about the quality and cost-efficiency of the Lithified Technologies total road solution and we anticipate many future opportunities for Lithified Technologies as a part of our engineering options.

If you have any questions please contact me at Claudia.Diaz@wilsonco.com.

Sincerely,

Claudia Diaz, EI
