

MEET IGGY!

100% Safe, Easy to Use hand rinse that kills coronavirus, norovirus, influenza, c-diff and all other tested viruses. No other device does this. No chemicals, No Soaps, No Alcohol!
Available exclusively to OMNIA Partner members through NSI (Contract #R192007)

30^e SCIENTIFIC™
IGGY™ INFORMATION

Who is 30e Scientific?
 30e Scientific is an Indiana-based innovative technology company advancing aqueous (dissolved) ozone technology for use in municipalities, schools, transportation, and other public spaces.

What is aqueous ozone?
 Aqueous ozone is a potent, natural disinfectant that kills coronavirus, norovirus, influenza, c-diff and all other test viruses, bacteria and fungi that commonly cause illness in schools and hospitals, including resistant pathogens and germs that cause healthcare associated infections.

What is IGGY™?
 30e created a hand rinsing system called IGGY™ that uses a miniaturized ozone generator allowing for precise concentrations of ozone to be delivered and controlled at the specific point of use through proprietary custom spray nozzles that create a mechanical drag (frictional) force on the skin that have been shown to remove skin contaminants.

Benefits of IGGY™

Universal Design

Eco-friendly. Ozone is a natural, "green" disinfectant

ADA compliant

30e offers...

- **Fast and effective** - Eliminates 99.9% of germs in 7 seconds
- **100% safe** – NO chemicals, NO soaps, NO alcohols, NO harmful environmental impact, NO pathogen resistance, NO skin irritation – leaves skin feeling soft
- **Smart Technology** – Device "knows" when hands are in the water stream and simply turns off when cycle is complete
- **Easy to Use** – Patented hood spray array is designed to cover the entire hand without having to move the hands or estimating the right amount of product to use, eliminating technique concerns. No hand rubbing required
- **Data** – Each customer will receive a dashboard of information which will have the ability to inform compliance status
- **One of a Kind** – No other device does this! 30e technology is adaptable to multiple products across multiple market sectors

Did you know...

- 80% of communicable disease is transmitted through touch, including COVID-19.
- Only 5% of the population follow proper hand sanitation guidelines while 95% claim they do.
- 1 out of 3 public restroom users do not perform any hand hygiene.
- Average hand washing time is 7 seconds while the CDC guidelines recommend 20 seconds.

30e offers...

- Dedicated customer success contact. We will provide training, troubleshooting, coordinate service/maintenance, etc.
- Introductory pricing for first location
- Partnership
