

A SMART INVESTMENT,
backed by an industry leader.

Contract Number: 17-6221

Contract Terms: May 15, 2021 – May 14, 2022

OMNIA[®]
PARTNERS

Grasshopper is proud to partner with OMNIA Partners to provide mowing equipment, implements, parts and service to OMNIA Partners registered participants.

Through this competitively solicited contract, Grasshopper supports the needs of government, educational institutions and non-profit customers through high-quality products and a strong commitment to customer service.

- Superior investment
- Longer service life while requiring less maintenance
- Perfect year-round grounds maintenance solution
- Easy to operate and maintain
- Many built-in comfort features
- Reduce operator fatigue

MidMount™ Mowers

Ideal for straightaway mowing applications, Grasshopper MidMount™ mowers offer superior performance and speeds up to 11 mph for flawless high-capacity mowing.

FrontMount™ Mowers

When mowing around and under obstacles is critical, a Grasshopper FrontMount™ mower is an ideal choice. Low-profile, out-front mowing decks reach under obstacles to reduce trimming and enhance visibility, allowing operators to complete complex jobs faster and more efficiently.

Why Grasshopper?

Durability, quality, versatility and performance are just some of the reasons to purchase Grasshopper True ZeroTurn™ mowers. Equipment is built to last and easy to maintain, extending service life well beyond competitive mowers.

- Built in Moundridge, Kansas since 1969
- Solid warranty, parts and service
- Choices of mid- or front-mounted deck models with gasoline- or diesel-powered engines
- Grasshopper MaxTorque™ diesel mowers use clean diesel fuel, which burns cleaner than propane- or gasoline-powered mowers while consuming up to 50 percent less fuel
- Easy on the budget. Commonality of parts across all models reduces time, training and parts inventory
- Easy to maintain with easy access to components and fewer grease points than other mowers
- Design-matched hydraulic drive systems apply more power to the cutting decks to get jobs done faster while delivering professional results
- Choice of cutting widths from 41- to 72-inches
- One deck converts from side discharge to mulching or vacuum collection without investing in single-purpose decks
- Rear-discharge decks available for nearly all mower models
- The exclusive PowerFold® feature on FrontMount™ decks raises the front of the deck to a near vertical position for cleaning and blade removal
- Ergonomically designed to help keep employees fresh and alert
- USB charging ports available on some models
- Grasshopper maintains many environmental initiatives, including powder coat paint and other processes that reduce raw material consumption, maximize recycling and reduce material waste
- Year-round versatility. The mower deck of a FrontMount™ power unit is easily removed to accept a large selection of turf renovation, debris management and snow removal implements

All-season Implements // // //

A complete line of implements handle a wide range of grounds maintenance jobs to extend the productivity of Grasshopper FrontMount™ mowers year round.
