# What first impression does your building's exterior surfaces make?

QuestMark coatings help transform your property through improved aesthetics creating a more welcoming entrance for your facility.

In addition, our coatings are engineered to last longer and help preserve parking lots, decks and sidewalks.

We understand the need to maintain a safe environment and public access. That's why our coating solutions are environmentally friendly and apply quickly, minimizing business disruption.

## PARKING LOT AND DECK COATINGS

Add durability to withstand the heaviest traffic and harshest environments.

Parking lots and decks are constantly exposed to ever-changing weather conditions and abrasive traffic. QuestMark has engineered multiple systems specifically designed for pedestrian traffic and waterproofing solutions providing superior protection and durability.

### Specifically Formulated to:

- Protect asphalt and concrete against UV, water and chemical damage
- Prevent cracking and deterioration
- Allow flexibility in cold temperatures
- Keep pavement and exterior environments cooler with solar reflective colors
- Provide superior slip and skid resistance
- Renew existing asphalt or concrete areas
- Protect heavy traffic areas with high mil thickness
- Provide a water-based alternative that is safer for the environment

# SIDEWALK COATINGS

Exterior surfaces endure heavy foot traffic and natural elements which can destroy the finish, reduce its life expectancy and cause safety hazards.

Sidewalks, walkways and stairs are exposed to a lot of wear and tear. Heavy pedestrian foot traffic and natural elements, particularly water, can destroy the finish and reduce the life expectancy of concrete. This can cause cracking, sinking and potential trip hazards which can be dangerous to you, your employees and your customers.

## Sidewalk Services:

- Lip grinding
- Joint patch and repair
- Saw cutting and repair
- Winterizing: water repellent and salt guard
- Resurfacing

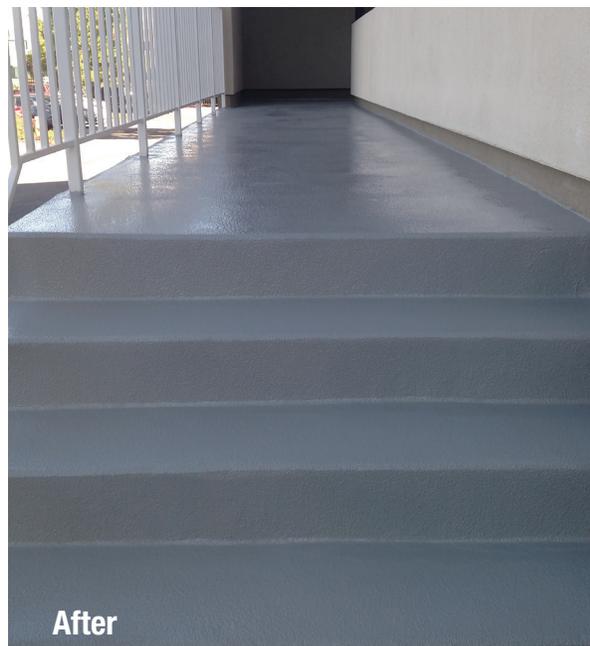

## Coatings Help Provide:

- Protection against natural elements, wear and tear
- Peace of mind that your building exterior is hazard-free
- Curb appeal which increases property value and makes a good first impression
- Protection for your investment and provide long-term options that will save time and money.
- ADA compliancy

## COATINGS Are Great For:

- Parking lots
- Crosswalks and sidewalks
- Pedestrian areas
- Driveways and Entryways
- Community areas
- Schools and playgrounds
- Decorative streetscapes
- Bus lanes and cycle lanes
- Parks and plazas
- Sport courts
- Medians
- Traffic flow

## Nationwide Coverage

We have a local network of offices in your community supported through the resources of a large corporation. We are there for you with solutions whenever and wherever you need us.

## Warranty Information

Ensure your investment is protected. QuestMark offers a single-source five-year coating warranty. Along with this, there is a preventative maintenance program that will help prolong the life of your investment.

## Durability

Deterioration is unavoidable. Just because asphalt and concrete is strong doesn't mean it's indestructible. Eventually, the weight of vehicular and pedestrian traffic along with the natural elements will wear it down. QuestMark's coatings sit on top of the surface forming a protective barrier. This protects the asphalt and concrete from the effects of UV degradation, chemicals and water.

## Safety

QuestMark's solutions keep your safety and that of your employees and customers in mind. QuestMark's solutions provide superior slip and skid resistance, both initially and over time. This is fully compliant with the Americans with Disabilities Act (ADA). Additionally, there is no odor or VOCs during installation and the process is water-based so it is safe for the environment.

## Aesthetics

Our coatings come in a variety of colors - customize, design and brand your exterior environment. Make your space your own. Coatings can even be used for directional signage.

## Extend the life cycle of your investment

QuestMark's solutions protect your investment and provide better looking, long-term options that will save you time and money. Our coating process is quick, does not track into your facilities and require minimum business disruption. Our solutions are long lasting and only require resealing every three to five years (five to ten years for parking decks).
