

# Brock USA

**BROCK**<sup>®</sup>  
FIRMER. FASTER. SAFER.

Region 4 Education Service Center, Houston, TX has awarded a cooperative purchasing agreement for Sports Surfaces, Installation and Related Material. This competitively solicited and publicly awarded contract is available to agencies nationwide via National IPA.

## ABOUT NATIONAL IPA

National IPA is redefining the future of cooperative purchasing. The cooperative purchasing organization is dedicated to serving public agencies and educational institutions nationwide. All cooperative agreements have been competitively solicited and publicly awarded by a public agency/governmental entity.

## BROCK USA

Brock USA believes in one simple truth about sports: Protecting athletes, protects the game. Brock USA is the industry leader in shock pads for artificial turf with the largest body of scientific data proving their ability to maintain the highest performance of the field, and marry it with unmatched safety for the athlete. Concussions and concerns about all levels of head and body trauma are driving accelerated use of shock pads under artificial turf.

Beyond safety, their Cradle to Cradle environmental certification and warranties far outlast the turf, ensuring owners their investment will last. Schools, parks and other public institutions choose Brock USA for their quality, service, and scientific approach to the crucial area of athlete safety, and overall field longevity and performance.

## Brock Contract #: R162202

Sports Surfaces, Installation and Related Material

## CONTRACT HIGHLIGHTS

- Safety performance benchmarked by partnering with leading research organizations
- Broadest product line engineered for all sports and levels of athletes
- Oversight and design assistance to ensure highest project quality outcome

## BENEFITING PUBLIC AND PRIVATE SCHOOLS, COLLEGES AND UNIVERSITIES, CITIES, COUNTIES AND ALL GOVERNMENT ENTITIES.

### THE SAFEST CHOICE

You wouldn't buy a used, recycled helmet to put on a valued athlete, and a shock pad under your turf performs the same function. Each year Brock USA partners with hundreds of schools, parks, universities, and professional leagues on their artificial turf projects. Artificial turf fields are now a sophisticated system of components all aimed at mimicking a quality natural turf playing surface. The University of Tennessee Center for Athletic Field Safety provided the benchmarks to do just that.

Brock USA has studied the brain, concussions, footing, speed, and how the surface impacts the athlete - literally. These fields are built for the players in your program today, but they need to last for years to come - without degrading in safety or performance. It also needs to work for your climate and the hours of use needed. Brock USA's long history in all climates, at all levels of play, and under every turf brand, has provided unmatched knowledge about how to help you with your project, and reduce risk to your athletes and programs.
