

Lexmark makes it easy with Google in schools

Google Cloud Print is available standard on your Lexmark device. Once registered, you can easily print from your smartphone, tablet or Chromebook.

With the Lexmark Google drive app, you can print, save, store and organize files on google drive using the touch screen of your Lexmark smart MFP.

Out of the box compatibility

Google Cloud Print benefits

- ▶ Mobile printing with minimal IT investment
- ▶ Works on Chromebooks, mobile and PCs
- ▶ Minimal IT resources for set up (if any)
- ▶ Mobile device does not have to connect to the network—only internet access is required
- ▶ No discovery—printers are pre-shared
- ▶ Set common print options
- ▶ Printer securely retrieves and prints

Google Drive benefits

- ▶ **Easy to use** - intuitive interface simplifies tasks and speeds document management.
- ▶ **Efficient** - streamline the process of saving to and printing from Google Drive by initiating activity directly from your MFP.
- ▶ **Secure** - control access to uploaded files and protect data integrity with customizable sharing settings.

Google Drive key features

- ▶ **Print on Demand** - Use your smart MFP touch screen to browse, select and print directly from Google Drive at the moment you need it.
- ▶ **Scan and upload** - Scan and upload files from the MFP directly to Google Drive for secure storing and sharing.
- ▶ **Share, view and collaborate** - Scan a document into a shared folder for fast and easy collaboration between multiple employees, departments or agencies.
