- All contract documentation is available on [www.NationalIPA.org](http://www.NationalIPA.org)

## METEOR EDUCATION'S MISSION

To Inspire and support communities and their students in creating transformational learning experiences.

Despite the best intentions and efforts of dedicated educators, in many instances our educational system isn't properly aligned with our rapidly evolving world. Over the last several decades, we have made enormous advances in technology and game-changing discoveries about how kids learn, but many of our students and teachers are still stuck in classrooms that were designed during the industrial revolution. Those environments and the teaching methods they support are no longer relevant in the 21st century.

MeTEOR Education is here to help communities across the country modernize and humanize the learning experience so that their teachers and students are empowered to reach their full potential.
