

## HVAC Asset Planning and Analysis Tools

### Energy Savings

#### Boost your budget impact by meeting energy and carbon footprint reduction goals.

Your HVAC system is one of your building's largest energy draws – consuming roughly 40% of your building's energy expense. It can be a substantial impact for your overall organizational goals; some energy costs can increase overall annual expenses by 20 percent if not managed closely. Rely on the Daikin Building Solutions team to unlock savings potential with a full analysis of your utility usage and explore how technology can reduce your consumption and save you money.

With a Daikin-designed energy audit, our team of experts will help discover where your opportunities lie: identifying energy conservation measures and spotting facility improvements to reduce your energy spend by more than 10 percent. The audit goes beyond the HVAC system to include an evaluation of lighting, occupant usage, and even windows and roofs. As a result of the process, you will gain perspective on potential energy savings and can see a steep change in building performance.

In the end, your audit will reveal the financial opportunity and potential business impacts with estimated costs to influence and support your building's energy and carbon footprint reduction goals. Together, we will determine the right solution to optimize energy savings for your building, giving your financial performance the boost your business needs and your building holds.

Call your local Daikin Building Solutions Sales Representative to provide you with a sample of our Preliminary Energy Audit Report to show the savings that can be unlocked.

Unlock energy savings. In this audit you will gain:

- An evaluation of utility bills from the past year, taking weather into consideration, to understand where your system may be falling short.
- Financial opportunity and potential impacts with estimated costs to influence and support your building's energy and carbon footprint reduction goals.
- Recommendation on the right solution to optimize IAQ and energy savings for your building.

**Contact your local Daikin Building Solutions Sales Representative to learn more about your options.**

## OMNIA PARTNERS

*OMNIA Partners is the largest and most experienced group purchasing organization. We bring together industry-leading buying power and world-class vendors to offer an extensive portfolio of sourcing solutions and partnerships. Our members and suppliers execute more contracts, in more verticals, with transparent, value-driven pricing.*

*We are dedicated to helping our members and suppliers soar past every growth goal and marker of success. Together we are going well beyond what procurement previously knew to be possible.*
