

BI Agency Assist[®]

BI Agency Assist[®] services and 24/7 support center increase agency coverage and help reduce and manage the large amount of data officers receive. These administrative and data management services are configurable based on agency needs and can relieve officers of up to 50% of their clerical or data processing workload, allowing them to spend more time with clients.

CONTACT DOCUMENTATION SERVICE

Contact Documentation is a paperless data entry service for officers to dictate and record case notes while in the field. Our highly trained support specialists transcribe officer's first-hand account in real-time, thus increasing an officer's ability to quickly and efficiently manage cases. Support specialists also record mandated supervision requirements such as substance use treatment, counseling sessions, and more.

SCHEDULING SERVICE

The Scheduling Service is a high-touch solution that reinforces compliance. BI support specialists take client calls to verify, schedule, or amend appointments as well as make outbound calls to verify schedule requests and obtain documents regarding a client's allowed movement. Officers approve or deny individual requests by phone or through BI TotalAccess[®]. Officers can also supply pre-approved client movement information, allowing specialists to approve certain client requests on the officer's behalf.

ENHANCED MONITORING SERVICES

Live support specialists provide Enhanced Monitoring Services by conducting initial outbound to resolve alerts prior to dispatching information to the officer. Calls are made to troubleshoot equipment issues or locate a missing monitored individual. If unsuccessful, the alert is escalated to the supervising officer for additional action. BI Agency Assist support specialists handle more than 596,000 violation alerts a month.

CLIENT DOCS SERVICE

Reduce time spent on paperwork and streamline the record-keeping process. With Client Docs, officers and support specialists can upload important documents and photos, such as pay stubs, court documents, work/school schedules, pictures, and records directly to a client's case file in TotalAccess. All docs are stored in TotalAccess to safeguard data and to allow officers to manage files in a single location.

AUTOMATED SERVICES

Our Automated Services help agencies save time by streamlining client check-ins, contact updates, and reminders through Interactive Voice Response (IVR) technology. Clients call the system as required to check-in and the system verifies each caller through a series of questions. If there are changes or exceptions to the expected responses, the caller is promptly routed to a live support specialist to provide updated information.

KEY FEATURES

- Five configurable services
- 24/7 live support specialists
- Real-time updates available in BI TotalAccess
- Centralized data for seamless case management
- Client management services include profile, fingerprint and name matches, hold and page, supervision level assessments
