Contract Waiver

Any waiver of any provision of this contract shall be in writing and shall be signed by the duly authorized agent of Region 14 ESC. The prospective vendor must submit a signed Signature Form with the response thus, eliminating the need for a formal signing process. Contract award letter issued by Region 14 ESC is the counter-signature document establishing acceptance of the contract.

NCPA Administrative Agreement

The vendor will be required to enter and execute the National Cooperative Purchasing Alliance Administration Agreement with NCPA upon award with Region 14 ESC. The agreement establishes the requirements of the vendor with respect to a nationwide contract effort.

Differentiators

Ensuring safety is our top priority. In today's world, it is more important than ever to be able to notify law enforcement of potential threats quickly and easily. With the LEN platform, the public will be able to do just that in real-time. The LEN platform is a solution for over 5,500 Police and first responders' emergency call centers across the country. These call centers can obtain real-time updates, photos, and locations of emergencies, violations, and hazards.

The Len platform is also equipped with AI technology to identify and track violators in real-time. This system will help keep our communities safe by detecting weapons as soon as they are visible on camera, flagging potential threats before shots are fired, and violators are captured as quickly as possible.

Marketing

If awarded, BeMotion's goal is to have a major campaign in place that includes PR, events and social media. We will also provide marketing materials such as PowerPoint slideshows for demonstration purposes or brochures with descriptions about their services

PRODUCTS AND SERVICES / SCOPE

The BeMotion LEN platform is a game-changer for law enforcement and community leaders. It provides a secure, reliable way for citizens to share information in real-time, which helps to improve communication and coordination between first responders and community leaders. With LEN, citizens play a crucial role in keeping their communities safe by sharing violations and information with law enforcement agents. And because it's accessible from any smartphone, anyone can use it to make a difference. So, if you see something suspicious, or have information about a crime, share it on LEN. It could help save lives. Also, it includes LEN A.I. Technology can detect weapons as soon as they appear on camera. This means that potential threats can be flagged before anything happens. This is a great way to prevent accidents and keep everyone safe.

Warranty

The goal of the LEN Platform is to provide clients the ability to leverage existing equipment and infrastructure. Client facing functionality is provided by a mobile app, and the AI technology leverages images produced by the client's existing surveillance cameras and DVR's.

AI processing of video feeds is done via mini server which is installed on location by BeMotion or a local implementation partner, when video feeds do not push to external sources / cloud. Instances where the video feed is sent to the cloud, BeMotion initiates a virtual server within the LAN environment of the organization.

All on premises hardware comes with a one year manufacturer warranty, and 24/7 online technical support, provided by our local implementation partners.

Products

- Mobile App Citizens - Is provided to the general public to initiate alerts, communicate with security (text and voice), share real time photos and videos, real-time location sharing, emergency call center/911 and local law enforcement. The app is supported by iOS and Android devices
- Mobile App Responders - Is provided to first responders in order to receive location based alerts, communications from citizens (text and voice), ability to receive real time photos and videos, real-time location of citizens, and the ability to initiate a call for backup alert to other first responders. The app is supported by iOS and Android devices
- Management Console (Web based) - Is provided to emergency call centers, 911 dispatch and the clients internal technology department. The Management Console is used to configure all client related profiles, message chain, reporting, look and feel (branding), resource management (employee location tracking), time tracking (check-in/out), and crowd control based on alerts being sent to all protected citizens in the area of its choice (hot mapping).
- AI Mini Server - Installed on location by BeMotion or a local implementation partner, when video feeds do not push to external sources / cloud.
- AWS - Is used for AI processing when video imaging is send by the client to a remote cloud based location.

Construction

Instances where the client maintains all video imaging on premises, BeMotion or local implementation partner/s will install an AI Mini Server and configure for video stream access on location.

- Sound Detection - via a partnership with Shot Spotter
- Walk through technology - via a partnership with First Republic
- BeMotion provides support on a 24/7 basis and an app uptime of 99%
- LEN apps (Citizen and First Responder) process alerts on a manually initiated basis (Citizen), and an automated/touchless basis (AI Detection). In both cases, alert-based messaging can be preconfigured to go to key staff, security, emergency call centers, 911, and citizens in the immediate area (crowd control).
- LEN is a solution rather than a service, leveraging existing equipment, staff, and resources to add efficiencies across the spectrum of incident management.
- LEN's weapon detection alerts are always accompanied by an image (every 3-5 secs) of the detected object. All key staff, security, centers, and responders receive images with an incident alert, allowing for easy distinction between an actual alert and a false positive. LEN's AI also takes into consideration a proprietary confidence algorithm, which can be managed by the organization (ranging from 10% - 90% confidence), prior to an alert being initiated. This and all other AI detection parameters are controlled per camera, allowing for many specifications as they relate to specific needs and environments.
- BeMotion's Data Visualization and Reporting Division – Can supply a full real time suite of data analytics apps. Allowing the organization and its users access to reporting and predictive analytics algorithms (once enough historical data is captured).

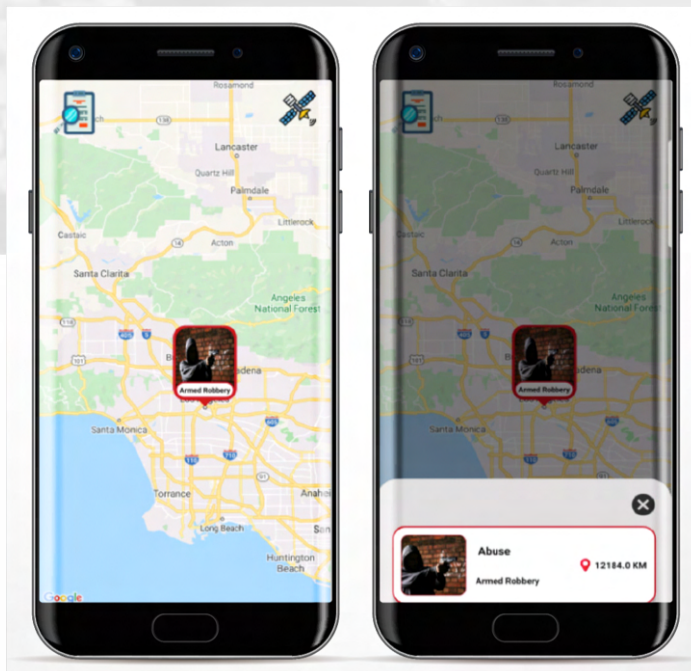

LEN Platform: Key staff security and/or First Responder check-in/check-out screen

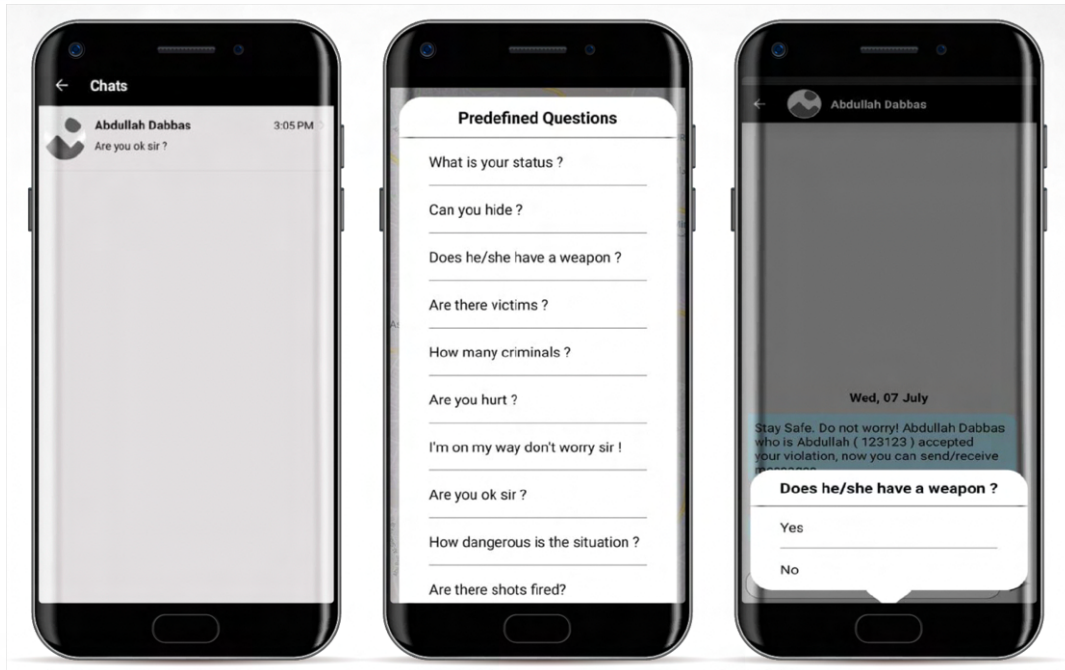

LEN Platform: Citizen emergency alert screen

LEN Platform: Single click SOS Alerts

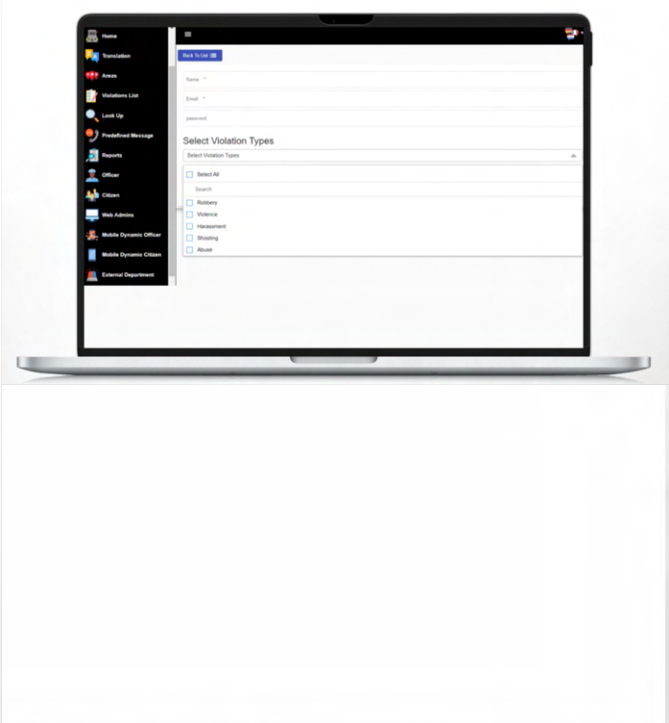

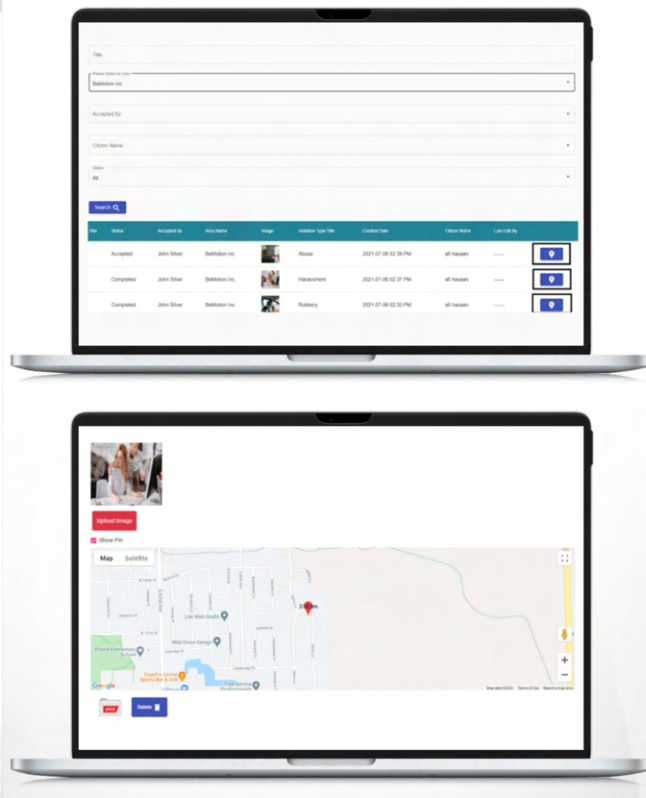

LEN Platform: Real-time HPS location of the citizen who initiated the alert

LEN Platform: Chat screens allow citizens and First Responders to communicate verbally and via texts

LEN Platform: This screen allows organizations and the emergency calls centers the ability to initiate area-based alerts to easily inform staff and citizens of the emergency incidents

Management Console: Used to configure all client related profiles, message chain, reporting, look and feel (branding), resource management (employee location tracking), time tracking (check-in/out), and crowd control based on alerts being sent to all protected citizens in the area of its choice (hot mapping).

Deployment Timeframe

Deployment depends on a site assessment to identify a number of video aggregation points, network security, and surveillance management software being used by the organization. A typical deployment timeframe is 7-10 working days.

Supply Chain Issues

BeMotion LEN leverages existing infrastructure, be it mobile devices or surveillance infrastructure in place. This allows us to have very little supply chain risk. Even in cases of computing hardware, there is no special spec requirement that couldn't be bought in any Best Buy or similar location in case of an immediate need.

Legacy Equipment

LEN works with any legacy equipment, because the AI component of our platform leverages the video itself, rather than any portion of the hardware or equipment used in its creation.

Infrastructure Upgrades

No additional hardware infrastructure upgrades are required on the existing systems. BeMotion will simply install an AI specific mini-server for AI video analysis and computing.

Network/Cyber Security Plan

BeMotion understands the importance of mitigation of security risks. Therefore, all activity and security are maintained by the organization as is. Thereby limiting any new risks which may be brought on by requirement processes that live outside of the current structure.

In all solicitations, either by competitive bidding or negotiation, made by Contractor for work to be performed under a subcontract, including procurements of materials or leases of equipment, each potential subcontractor or supplier shall be notified by Contractor of Contractor's obligations under this Contract and the regulations relative to non-discrimination on the grounds of race, color, creed, sex, disability, age or national origin.

- 4) Sanctions of Non-Compliance. In the event of Contractor's non-compliance with the non-discrimination provisions of this Contract, Public Agency shall impose such Contract sanctions as it or the FTA may determine to be appropriate, including, but not limited to: 1) Withholding of payments to Contractor under the Contract until Contractor complies, and/or; 2) Cancellation, termination or suspension of the Contract, in whole or in part.

Contractor agrees to include the requirements of this clause in each subcontract financed in whole or in part with Federal assistance provided by FTA, modified only if necessary to identify the affected parties.

DISADVANTAGED BUSINESS PARTICIPATION

This Contract is subject to the requirements of Title 49, Code of Federal Regulations, Part 26, "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs", therefore, it is the policy of the Department of Transportation (DOT) to ensure that Disadvantaged Business Enterprises (DBEs), as defined in 49 CFR Part 26, have an equal opportunity to receive and participate in the performance of DOT-assisted contracts.

- 1) Non-Discrimination Assurances. Contractor or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this Contract. Contractor shall carry out all applicable requirements of 49 CFR Part 26 in the award and administration of DOT-assisted contracts. Failure by Contractor to carry out these requirements is a material breach of this Contract, which may result in the termination of this Contract or other such remedy as public agency deems appropriate. Each subcontract Contractor signs with a subcontractor must include the assurance in this paragraph. (See 49 CFR 26.13(b)).
- 2) Prompt Payment. Contractor is required to pay each subcontractor performing Work under this prime Contract for satisfactory performance of that work no later than thirty (30) days after Contractor's receipt of payment for that Work from public agency. In addition, Contractor is required to return any retainage payments to those subcontractors within thirty (30) days after the subcontractor's work related to this Contract is satisfactorily completed and any liens have been secured. Any delay or postponement of payment from the above time frames may occur only for good cause following written approval of public agency. This clause applies to both DBE and non-DBE subcontractors. Contractor must promptly notify public agency whenever a DBE subcontractor performing Work related to this Contract is terminated or fails to complete its Work, and must make good faith efforts to engage another DBE subcontractor to perform at least the same amount of work. Contractor may not terminate any DBE subcontractor and perform that Work through its own forces, or those of an affiliate, without prior written consent of public agency.
- 3) DBE Program. In connection with the performance of this Contract, Contractor will cooperate with public agency in meeting its commitments and goals to ensure that DBEs shall have the maximum practicable opportunity to compete for subcontract work, regardless of whether a contract goal is set for this Contract. Contractor agrees to use good faith efforts to carry out a policy in the award of its subcontracts, agent agreements, and procurement contracts which will, to the fullest extent, utilize DBEs consistent with the efficient performance of the Contract.

ENERGY CONSERVATION REQUIREMENTS

Contractor agrees to comply with mandatory standards and policies relating to energy efficiency which are contained in the State energy conservation plans issued under the Energy Policy and Conservation Act, as amended, 42 U.S.C. Sections 6321 *et seq.* and 41 CFR Part 301-10.

FEDERAL CHANGES

Contractor shall at all times comply with all applicable FTA regulations, policies, procedures and directives, listed directly or by reference in the Contract between Public Agency and the FTA, and those applicable regulatory and procedural updates that are communicated to Contractor by Public Agency, as they may be amended or promulgated from time to time during the term of this contract. Contractor's failure to so comply shall constitute a material breach of this Contract.

INCORPORATION OF FEDERAL TRANSIT ADMINISTRATION (FTA) TERMS

The provisions include, in part, certain Standard Terms and Conditions required by the U.S. Department of Transportation (DOT), whether or not expressly set forth in the preceding Contract provisions. All contractual provisions required by the DOT and applicable to the scope of a particular Contract awarded to Contractor by a Public Agency as a result of solicitation, as set forth in the most current FTA Circular 4220.1F, published February 8th, 2016, are hereby incorporated by reference. Anything to the contrary herein notwithstanding, all FTA mandated terms shall be deemed to control in the event of a conflict with other provisions contained in this Contract. Contractor agrees not to knowingly perform any act, knowingly fail to perform any act, or refuse to comply with any reasonable public agency requests that would directly cause public agency to be in violation of the FTA terms and conditions.

NO FEDERAL GOVERNMENT OBLIGATIONS TO THIRD PARTIES

Agency and Contractor acknowledge and agree that, absent the Federal Government's express written consent and notwithstanding any concurrence by the Federal Government in or approval of the solicitation or award of the underlying Contract, the Federal Government is not a party to this Contract and shall not be subject to any obligations or liabilities to agency, Contractor, or any other party (whether or not a party to that contract) pertaining to any matter resulting from the underlying Contract.

Contractor agrees to include the above clause in each subcontract financed in whole or in part with federal assistance provided by the FTA. It is further agreed that the clause shall not be modified, except to identify the subcontractor who will be subject to its provisions.

PROGRAM FRAUD AND FALSE OR FRAUDULENT STATEMENTS

Contractor acknowledges that the provisions of the Program Fraud Civil Remedies Act of 1986, as amended, 31 U.S.C. §§ 3801 *et seq.* and U.S. DOT regulations, "Program Fraud Civil Remedies," 49 CFR Part 31, apply to its actions pertaining to this Contract. Upon execution of the underlying Contract, Contractor certifies or affirms, to the best of its knowledge, the truthfulness and accuracy of any statement it has made, it makes, it may make, or causes to be

made, pertaining to the underlying Contract or the FTA assisted project for which this Contract Work is being performed.

In addition to other penalties that may be applicable, Contractor further acknowledges that if it makes, or causes to be made, a false, fictitious, or fraudulent claim, statement, submission, or certification, the Federal Government reserves the right to impose the penalties of the Program Fraud Civil Remedies Act of 1986 on Contractor to the extent the Federal Government deems appropriate.

Contractor also acknowledges that if it makes, or causes to be made, a false, fictitious, or fraudulent claim, statement, submission, or certification to the Federal Government under a contract connected with a project that is financed in whole or in part with Federal assistance originally awarded by FTA under the authority of 49 U.S.C. § 5307, the Government reserves the right to impose the penalties of 18 U.S.C. § 1001 and 49 U.S.C. § 5307 (n)(1) on the Contractor, to the extent the Federal Government deems appropriate.

Contractor agrees to include the above clauses in each subcontract financed in whole or in part with Federal assistance provided by FTA. It is further agreed that the clauses shall not be modified, except to identify the subcontractor who will be subject to the provisions.
