Define your standard terms of payment:

Our standard terms of payment are annual software service fees, plus monthly consulting fees if applicable.

Who is your competition in the marketplace?

We compete with other software companies that provide capital building and purchasing software to public entities. Companies like, E-Builder, Procore, Ionwave, and Planet Bids.

What differentiates your company from competitors?

Colbi designed their tools to comply with the complexities that public agencies need to follow in order to utilize public funds to build or procure anything. Our tools will reconcile directly with their annualized fiscal systems but will also provide them the ability to report on multi year projects that could have multiple funding sources. What makes us truly unique is our software is customized to each entities own coding system so they can reconcile quickly but also track everything their system is not setup to track.

Software updates and maintenance

Our training process begins with a **personalized** Workflow Workshop to identify your district's way of working while looking at optimization options to eliminate redundancies and streamline processes, if desired.

Resulting training is **targeted** to the type of user as identified in the process workshop so that personnel learning time is minimized and takes *3 days overall*.

- ☑ The first day is on **general software usage and budgeting**. Participants will develop budget templates for initial planning and learn how budgets progress through planning, design, construction, and closeout.
- ☑ **Contract management** training comes next, and includes simple purchase order contracts, contracts with reimbursables, and construction contracts, including all types of withholds and change management.
- ☑ On the third day, we focus on your **specific** Agency needs.

Software access control based on roles

Role-based security is built-in. Roles are configurable and are tailored to meet district needs as defined by our Workflow Workshop. They can be modified by the agency as needed, or by us upon request.

End of program data records in useful format

At the end of the building program or at the end of use of the software whichever is first, the optional Archive Exit Plan will provide the district one permanent, single, secure, read-only login to the **Account Ability** Transaction module. This will facilitate **viewing all data and printing reports**. In addition, read-write access is provided to the Budget Development module which facilitates use of financial planning tools for future building programs and facilitating use of **Account Ability** when new funding becomes available.

Program tracking and reports, including budget balances, projected expenditures, fund demands

In our **Fund Revenue Manager**, the pacing of incoming bond funds and other contributing sources are laid out and tracked as they become real.

In our **Budget Module**, working budgets plan/track expenditures and demands on those **fund revenues**, and scenario budgets do the same for “what if” evaluation.

Changes are recorded as revenues and expenditures become real for management review and analysis.

Multiple reports addressing hard/soft cost ratios, budget balances, projected balance to finish, and fund demands are ready at your fingertips.

Alignment of all revenue and expenditures with agency chart of accounts

We customize our database to mirror **your account code string**.

Your fund codes and object codes, with your titles, are used by **Account-Ability**.

Our reports align with your chart of accounts for **ease of reconciliation**.

Uses industry standard language that is familiar to users

The user interface uses **plain language in logical order** to make data entry quick and easy, but powerful!

We use **standard accounting principles** in our reports and screens so that the output makes sense and is **consistent** across various reports and analysis.

We use the **agencies account code string** for easy reconciliation and will facilitate your district’s current processes for seamless integration into our software tools.

We have **training resources** available not just on the basic use of the software, but agency specific best practices and trainings to guide staff during audits, construction contract specific issues, project, and program closeout, and more!

Financial management across multiple fiscal years and multiple projects

We developed **Account-Ability** to provide school districts with a tool to track all the **finances of a capital building program**, from each individual contract transaction to the strategic whole program view.

The financial portion of our software can track everything from **multiple-funding sources** and **multiple bond measures** with **multiple** issuances over **multiple years** for **any or all projects or project groupings**.

Ease of use by personnel, i.e. user-friendly interface

Our clients report that the user interface is **intuitive and easy**.

We use **colors and alerts** to bring user attention to areas that may need attention, and warn users when anomalies exist, including a few utility reports just to check the condition of the data input to make sure things are on track.

We developed the software with the likely event of personnel changes in mind, using **intuitive formats and helpful messages**, and we offer to train new employees.

Vendor information and contract tracking, payment tracking and management, including retentions & withholdings

When contracts are awarded, **vendor information** is input once and used many times using your vendor number.

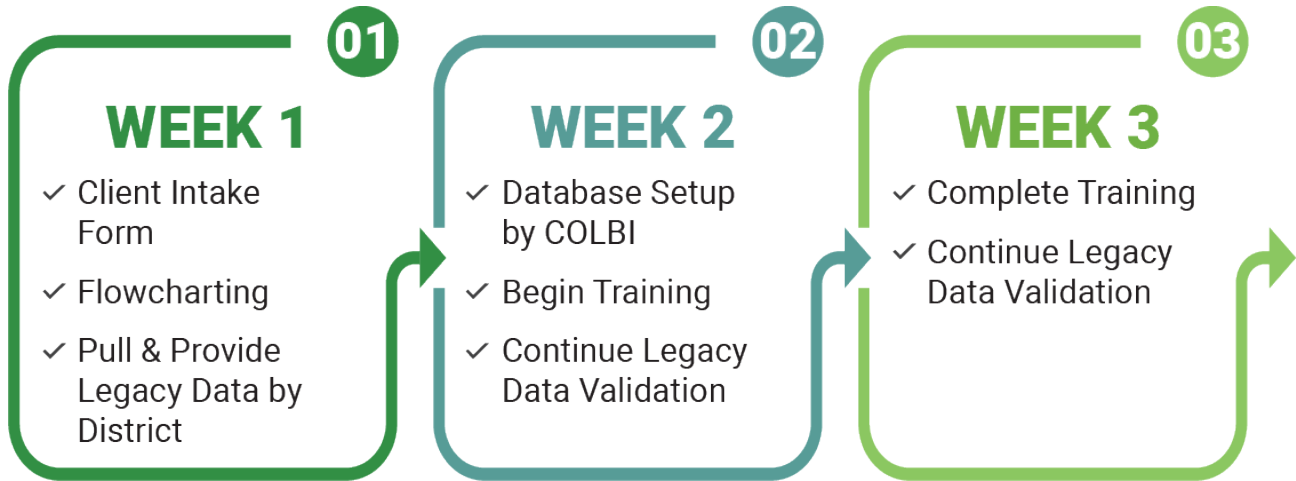

Our **Contract Records** track every commitment, expenditure, pending change, allowance draw, stop notice and other **withholds**, change order, payment, and **retention** holds and releases.

Real-time tracking allows you to manage the contracts responsibly, and to catch discrepancies before they go out the door in the form of a large disbursement.

All of this comes with **robust transparency**, via reporting at every level from contract and project reports to program-level reports that combine revenue, fund demands, project budgets, expenditures, projected costs, and schedules and many other reports in between!

Implementation Timeline

All tasks during the initial implementation involve our staff working closely with your staff. We will work closely with you to assist with the pulling of legacy data. The only setup task the Agency doesn't participate in is the database setup.

Readily Available with a Short Delivery Time

Should your agency contract with **COLBI**, we are prepared to provide the Workflow session within 2 weeks of signature and complete all trainings and configuration modifications in as little as **3 weeks** from that session, depending on the agency's availability. Training takes only 3 days.

Training on software use and optimization

All standard software updates occur behind the scenes by our technical staff. Typically, updates are scheduled overnight on a Friday, so they do not interrupt daily activities. Should an update be urgent, we work to personally contact any logged-in users prior to any interruption.

- Pursuant to Federal Rule (A) above, when a Participating Agency expends federal funds, the Participating Agency reserves all rights and privileges under the applicable laws and regulations with respect to this procurement in the event of breach of contract by either party.

(B) Termination for cause and for convenience by the grantee or subgrantee including the manner by which it will be effected and the basis for settlement. (All contracts in excess of \$10,000)

- Pursuant to Federal Rule (B) above, when a Participating Agency expends federal funds, the Participating Agency reserves the right to immediately terminate any agreement in excess of \$10,000 resulting from this procurement process in the event of a breach or default of the agreement by Offeror as detailed in the terms of the contract

(C) Equal Employment Opportunity. Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of “federally assisted construction contract” in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, “Equal Employment Opportunity” (30 CFR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, “Amending Executive Order 11246 Relating to Equal Employment Opportunity,” and implementing regulations at 41 CFR part 60, “Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor.”
