

Web Payments

One-time and recurring online payments with a mobile-responsive user experience

- Guest checkout, stored wallet, and recurring autopay
- Full functionality on desktop, mobile, and tablet devices
- PCI Level-1 security, eCheck verification, fraud prevention

Guest Checkout and Recurring Autopay

Let your customers make a one-time full or partial payment, store payment methods in a digital wallet for faster checkout, and set recurring auto-payments.

Your Branding, Our Security

Payments for every department are consistent in your branding, and native to your web domain. We take you out of PCI security scope.

Transparent and Convenient

Easy account lookup using any data in your source system. Take card payments in the same place as eCheck, with clear language explaining fees.

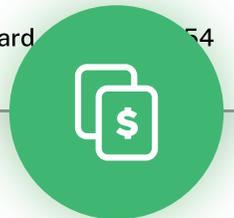

Digital and In-Person Payments

Launch kiosks and POS on the same secure, integrated payment platform. A powerful revenue management solution comes standard with all CityBase payment products and centralizes reporting across payment channels.

Set Up Autopay

<input checked="" type="radio"/>	<input type="checkbox"/>	Checking account ending in 4
<input type="radio"/>	<input type="checkbox"/>	Card ending in 0007
<input type="radio"/>	<input type="checkbox"/>	Card ending in 54
