

# A Smarter Way to Healthier Shared Spaces™

CLOROXPRO

People want to feel confident that shared spaces are clean, especially with the increase in return-to-office and back-to-school mandates. Cleaning and disinfecting your facility has become critical for maintaining productivity and creating a safe space for occupants to learn, work, and interact. CloroxPro is a trusted brand with efficient solutions that can help you clean for health and prevent the spread of germs in frequently visited, high-traffic spaces around your facility.

## Creating Clean, Shared Spaces Makes a Difference

- ▶ Reducing the spread of germs helps lower incidents of absenteeism and improves productivity.<sup>1</sup>
- ▶ 94% of workers say they feel more productive in a clean space.<sup>2</sup>
- ▶ 50% of children complete schoolwork faster and are more creative in a clean space.<sup>3</sup>

## CloroxPro Solutions Designed for High-Traffic Shared Spaces

RESTROOMS

WORK SPACES

EATING AREAS

When it comes to cleaning and disinfecting busy areas within your facility, there are unique challenges that require more than basic daily cleaning products. Let CloroxPro solutions do the work for you!

# 3 Simple Steps to Creating Healthier Shared Spaces

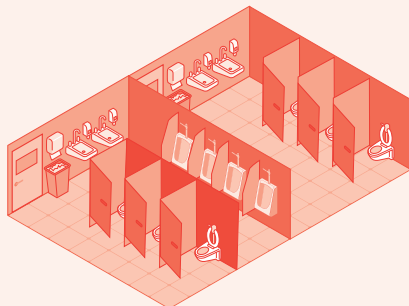

CLOROXPRO

There is no “one-size-fits all” approach when it comes to cleaning and disinfecting your facility. Protocols vary based on the kind of space, type of cleaning challenge you face, and time of day. CloroxPro is here to help!

## 1. Identify Key Challenges in Shared Spaces

Urine, odors, stains, mold & germs

RESTROOMS

Illness-Causing Germs

WORK SPACES

Grease & Grime

EATING AREAS

## 2. Determine the Type of Cleaning Task

**TOUCH-UP TASKS:** When spaces are occupied, touch-up tasks, such as wiping office desks and surfaces help improve occupant comfort and should be performed throughout the day.

**RESET TASKS:** Reset tasks, such as disinfecting all high-touch surfaces in classrooms after students leave should be done daily, once spaces are unoccupied.

**TOUGH TASKS:** For overall maintenance of a facility, tougher tasks like removing mold & mildew require specialized cleaning and disinfecting. These tasks should be performed after hours on a weekly basis at minimum.

## 3. Choose the Right Product for Space & Task

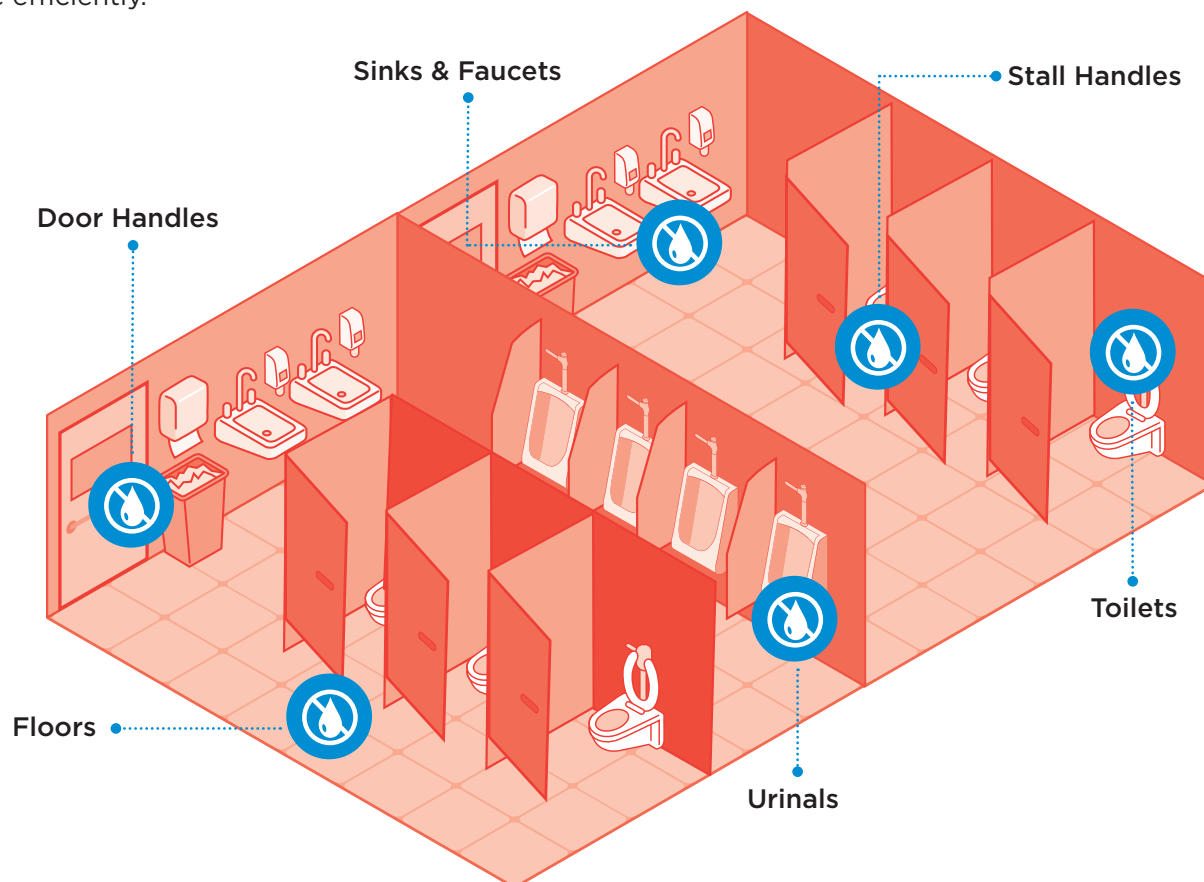

TASKS	RESTROOMS	WORKSPACES	EATING AREAS
	 <b>Clorox EcoClean™ Disinfecting Cleaner</b>	 <b>Clorox® Disinfecting Wipes</b>	 <b>Clorox® Anywhere® Daily Disinfectant &amp; Sanitizer</b>
	 <b>Clorox® Toilet Bowl Cleaner with Bleach</b>  <b>Clorox® Urine Remover</b>	 <b>Clorox EcoClean™ Disinfecting Cleaner</b>	 <b>Pine-Sol® Multi-Surface Cleaner Original Pine</b>
	 <b>Tilex® Instant Mold &amp; Mildew Remover</b>	 <b>Pine-Sol® Multi-Surface Cleaner Original Pine</b>	 <b>Formula 409® Cleaner Degreaser Disinfectant</b>

# Creating Healthier Restrooms

CLOROXPRO

Restrooms are high-traffic areas that can quickly become dirty, as they are often plagued with issues like urine odors, stains, visibly dirty surfaces, and mold. When people use restrooms, they expect them to be clean, odor-free, and well-stocked and if restrooms are not properly maintained, people may be driven away from the facility.

Despite the importance of restroom cleanliness, it is often cited as one of the most challenging areas for cleaning professionals.<sup>1</sup> To effectively clean and disinfect restrooms, CloroxPro offers a range of solutions that can get the job done efficiently.

## Did you Know?

- ▶ More than half of cleaning professionals rank removing urine stains and odors as the most difficult cleaning and disinfecting task.<sup>2</sup>
- ▶ Many people don't wash their hands after using the restroom. This fact likely contributes to what one study found: Viruses can quickly spread within a public restroom, even distances up to 50 feet from the restroom door!<sup>3</sup>
- ▶ Mold and mildew thrive in damp areas like restrooms and can grow when exposed to dirt and germs.<sup>4</sup>

# Refresh Restrooms

CLOROXPRO

With varying levels of traffic throughout the day and problems like urine stains and mold, keeping restrooms clean and smelling nice is not an easy feat. CloroxPro has you covered with efficient and effective cleaning and disinfecting solutions to tackle restroom challenges head-on.

**Clorox EcoClean™  
Disinfecting Cleaner**

9/32 fl. oz. Spray, UPC: 60213  
4/128 fl. oz. Refill, UPC: 60094

- ▶ A quick, ready-to-use solution that can help protect your restroom against odor-causing bacteria.
- ▶ In 15 seconds\*, this eco-conscious disinfecting cleaner can sanitize hard, nonporous surfaces, making it easy to clean visibly dirty surfaces.

**Clorox® Toilet Bowl Cleaner  
with Bleach**

12/24 fl. oz., UPC: 00031

- ▶ Bleach-based formula that cleans, deodorizes and whitens bowls, while leaving a fresh scent.
- ▶ A powerful gel cleaner that kills germs and eliminates odor-causing bacteria.

**Clorox® Urine Remover**

9/32 fl. oz., UPC: 31036  
4/128 fl. oz. Refill, UPC: 31351

- ▶ Quickly addresses short- and long-term urine stains and odors, which are the most difficult cleaning problems, with the cleaning power of hydrogen peroxide.
- ▶ This versatile formula removes urine from difficult surfaces that tend to trap urine odors, such as porous grout.

**Tilex® Disinfecting Instant  
Mold & Mildew Remover**

9/32 fl. oz. Spray, UPC: 35600  
4/128 fl. oz. Refill, UPC: 35605

- ▶ A specially formulated solution that disinfects while removing tough stains from hard surfaces and is designed to kill mold, preventing regrowth for up to 4 weeks.†
- ▶ Brightens tiles and other surfaces while cleaning, without wasting effort scrubbing.

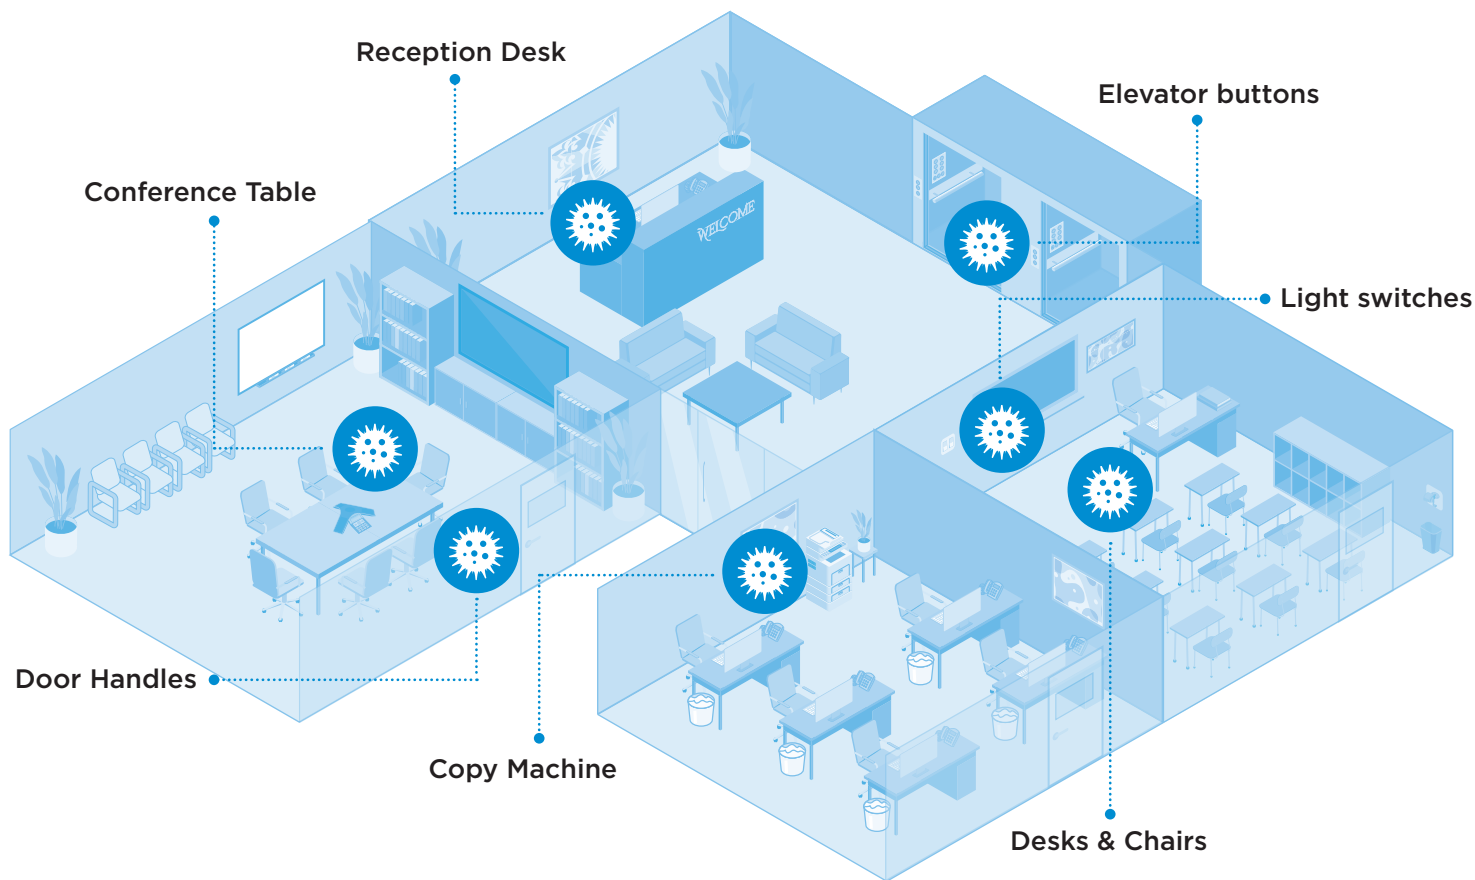

# Creating Healthier Work Spaces

CLOROXPRO

Shared work spaces such as classrooms are an essential part of any facility and have many commonly touched surfaces. When people gather in these spaces, viruses and bacteria can transfer through direct person-to-person contact, through the air, and by touching a contaminated surface.<sup>1</sup> If left untreated, illnesses caused by these germs can lead to further issues such as loss of productivity and absenteeism.

A key challenge for facility managers is maintaining multiple surfaces that are frequently used. By using a trusted brand with effective solutions, like CloroxPro, you can help building occupants feel more at ease in shared work spaces around your facility.

## Did you Know?

- ▶ Germs that cause illness like cold & flu, RSV (a common respiratory virus) and Norovirus can live on surfaces for days or even weeks.<sup>2</sup>
- ▶ The average worker's desk has more than 20,000 germs per square inch.<sup>3</sup>
- ▶ A study found that in just 4 hours, more than half of surfaces were contaminated and people were infected with at least one of the viruses mimicking the cold, the flu, and the stomach bug.<sup>4</sup>

# Create Worry-Free Work Spaces

CLOROX<sup>®</sup>PRO

Since work spaces are full of shared surfaces, that can easily be contaminated again after being cleaned, it is important to use cleaning and disinfecting products that will get the job done. CloroxPro products are designed to ensure the most important cleaning tasks are managed as effectively and efficiently as possible—saving time and money while keeping shared work spaces clean and healthy all day long.

**Clorox<sup>®</sup> Disinfecting Wipes**  
Fresh Scent 6/75 ct., UPC: 15949 .  
Lemon Scent 6/75 ct., UPC: 15948

- ▶ Use the #1 choice for Disinfecting Wipes\* for quick cleanups on various surfaces, that can easily be performed by building occupants and cleaning staff.
- ▶ Clean and disinfect 99.9% of bacteria and viruses such as those that cause the flu.<sup>†</sup>

**Clorox EcoClean<sup>™</sup> Disinfecting Cleaner**  
9/32 fl. oz. Spray, UPC: 60213  
4/128 fl. oz. Refill, UPC: 60094

- ▶ A gentle, but powerful, ready-to-use solution that kills 99.9% of germs in 2 min.<sup>‡</sup>
- ▶ This product has the added benefit of being an eco-conscious disinfectant, with a plant-based active ingredient.

**Pine-Sol<sup>®</sup> Multi-Surface Cleaner Original Pine**  
3/80 fl. oz., UPC: 60606

- ▶ Now 2X concentrated, so you can use 1/2 as much and get twice as much cleaning power out of every bottle.<sup>§</sup> Tough on grease, grime and odors, leaving nothing but the smell of clean behind.
- ▶ This versatile cleaner kills 99.9% of germs and disinfects both full strength and when diluted.<sup>\*\*</sup>

\* Based on Precision B2B market share unit sales data, 12 month ending July 2023

† Influenza A virus, Influenza Virus Type B, Human Coronavirus

‡ When used as directed on hard, non-porous surfaces. See product label for list of organisms

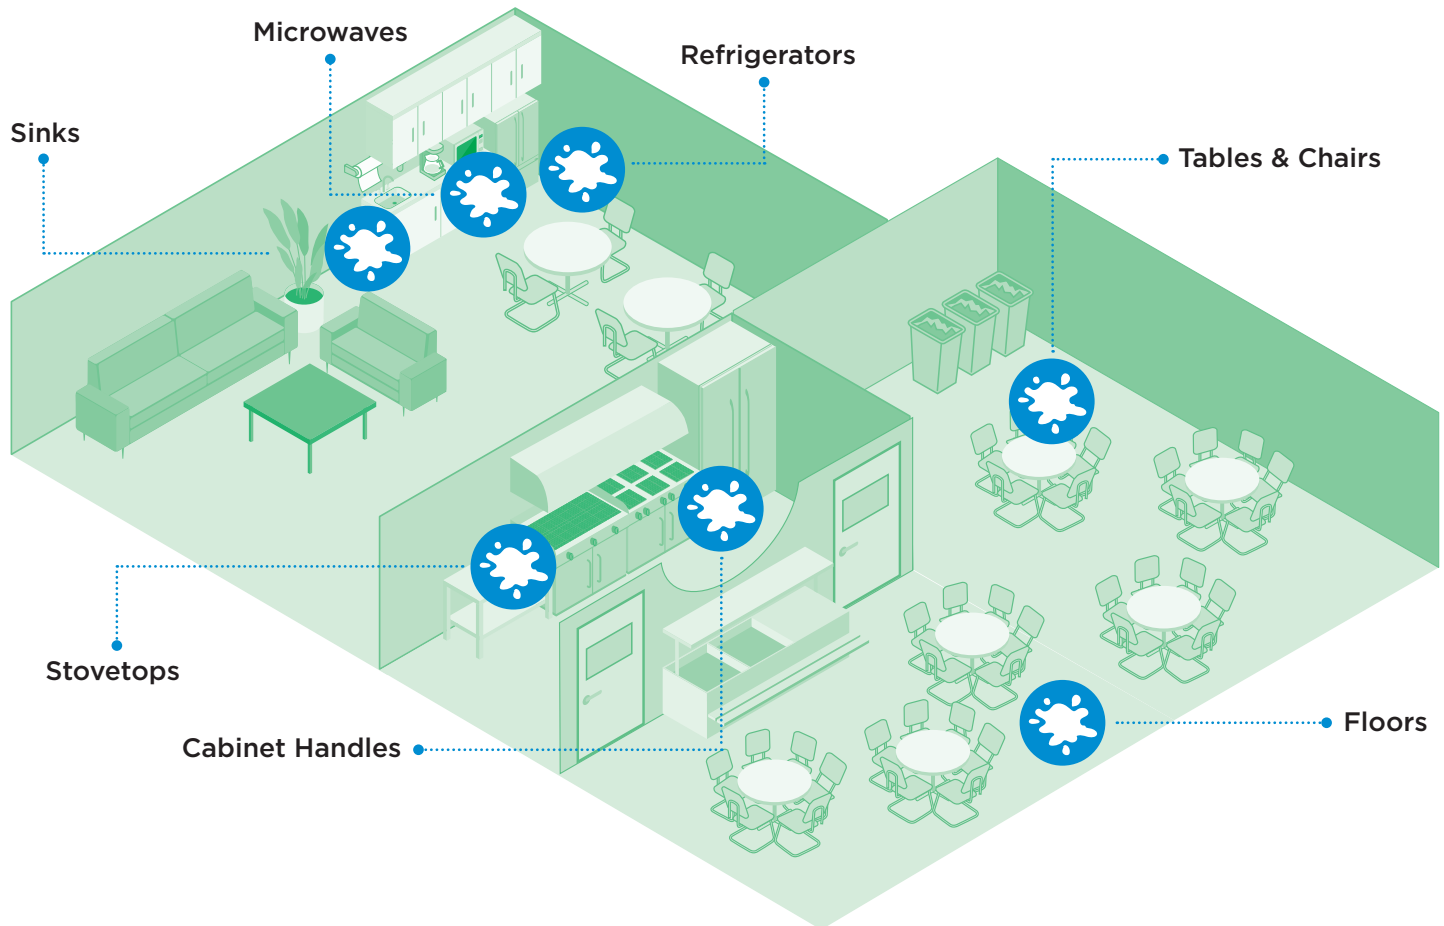

§ When compared to previous 144oz. Pine-Sol Multi-Surface Cleaners

\*\* Of all Pine-Sol<sup>®</sup> products depicted, only Pine-Sol<sup>®</sup> Multi-Surface Cleaner is a registered disinfectant. Use as directed on hard, nonporous surfaces

# Creating Healthier Eating Areas

Eating areas, like cafeterias and breakrooms, can get dirty quickly and are prone to grease and grime buildup. Grease can cause slippery surfaces that can result in injuries to both building occupants and cleaning staff. If left untreated, grease can become grime which is tougher to clean and can lead to bacteria growth and damages to your facility, like clogged pipes. To prevent unwanted issues caused by grease and grime, use CloroxPro products to clean and disinfect eating areas in your facility.

## Did you Know?

- ▶ In one study 75% of breakroom sink faucet handles, 48% percent of microwave door handles, and 26% percent of refrigerator door handles in breakrooms were contaminated with germs.<sup>1</sup>
- ▶ More than half of liability claims in facilities are associated with trips, slips, and falls from grease on floors.<sup>2</sup>
- ▶ 81% of educators believe cafeterias are one of the most germ-prone areas in a school.<sup>3</sup>

# Elevate Eating Areas

CLOROX<sup>®</sup>PRO

Grease and grime are more common in facilities than you might think, especially in areas where food is prepared and consumed. To maintain eating areas in your facility and avoid the build-up of bacteria, use CloroxPro solutions specifically formulated to cut through grease and grime and kill germs.

**Clorox<sup>®</sup> Anywhere<sup>®</sup> Daily Disinfectant & Sanitizer**  
12/32 fl. oz., UPC: 01698  
4/128 fl. oz. Refill, UPC: 31651

- ▶ With just one spray, this ready-to-use solution can clean and disinfect surfaces to help prevent the build-up of soils and germs.
- ▶ It's as gentle as water and can kill 99.9% of bacteria\* on food-contact surfaces with no rinsing necessary.

**Pine-Sol<sup>®</sup> Multi-Surface Cleaner Original Pine**  
3/80 fl. oz., UPC: 60606

- ▶ Multi-purpose cleaner that can be used on a wide variety of surfaces and is free of strong alkali so you can combat greasy floors in eating areas without making them slippery.
- ▶ Even when diluted, this disinfectant cleaner can help cut through dirt and grime (when used daily) while also killing germs.†

**Formula 409<sup>®</sup> Cleaner Degreaser Disinfectant**  
12/32 fl. oz., UPC: 35306  
4/128 fl. oz. Refill, UPC: 35300

- ▶ With the deep cleaning power of a degreaser and the anti-streaking performance of a glass cleaner, this ready-to-use spray can cut through grease while disinfecting surfaces and removing odors throughout your facility.‡
- ▶ This powerful solution can also help remove smudges, especially on commonly touched surfaces like refrigerator door handles, and breakdown buildup on harder to reach surfaces that are cleaned less often, like high shelving and light fixtures.

Use as directed

\* *Salmonella enterica* (Salmonella), *Escherichia coli* (E. coli), *Staphylococcus aureus* (Staph) and *Streptococcus pneumoniae* (Strep)

† Rinsing is required for surfaces that may come in contact with food

‡ For food-contact surfaces such as institutional kitchen counters, tables, and appliances, rinse disinfected surface with potable water
