

DocFinity Cloud

DocFinity Cloud is the optimal choice for organizations of all sizes looking to reduce the IT burden and minimize large upfront investments. When you choose DocFinity Cloud, you will:

- Launch and start operating quickly.
- Enjoy automatic updates and upgrades.
- Meet data security requirements.
- Pay a predictable monthly fee.

DocFinity Cloud utilizes Amazon Web Services (AWS), an industry-leading technology infrastructure platform with over 1 million active customers that meets many of the current compliance standards (view AWS standards: <https://aws.amazon.com/compliance/>).

An all-inclusive offering, DocFinity Cloud provides access to everything you need to intelligently manage your mission-critical content and transform the way you work:

- DocFinity Core
- BPM/Workflow
- Records Management
- Dashboards
- eForms
- High-Speed Importers
- DocFinity Enterprise Search
- DocFinity API
- Print to DocFinity
- COLD/ERM (Text Stream)
- Hierarchical Storage Management (HSM)
- Microsoft Office Integration
- DocFinity Exporter

If desired, you can further expand your capabilities by adding Intelligent Capture, Advanced Capture, E-Signature, or HL7 for a fee.

Security, monitoring, networking, storage, backups, and more are completely managed by Companion Data Services staff and 24/7 support is provided by AWS. With AWS's five regional availability zones, you will have the ability to place resources, such as instances, and data in multiple locations.

Data and SQL retention can be customized to meet your needs. AWS hosting systems' availability is generally 24/7 with the exception of potential downtime for maintenance on Sunday with a 5pm to 10pm ET window.

DocFinity Cloud comes with two environments for production and testing. Production runs 24/7 and testing is available 50 hours per week, as scheduled according to the client's timetable. Extended testing times can be scheduled. The environment scales according to usage demands—you simply purchase more users or storage as needed.

Features of SaaS	DocFinity Cloud
Cost Effective Usage Structure Priced by User/Month*	
Cost Effective Storage Priced by GB/Month Consumed ^{1**}	
Data Center Industry Compliances/Standards	✓
Disaster Recovery	✓
