

Optimize performance & streamline security operations with a **cloud-based system monitoring service**

Convergint value

Convergint offers **cloud-based monitoring** as a proactive approach to system maintenance. By continuously monitoring system health status for early detection of abnormalities, this service **minimizes downtime** and **ensures optimum performance**. Convergint uses Microsoft Azure cloud to connect security systems and devices to the cloud-based platform. By monitoring regional client sites in a secure, centralized location, dedicated professionals are prepared to carry out remote troubleshooting or immediately dispatch engineers to **solve system issues**.
