

Demco®

Impactful spaces impact students

“ I believe that well designed spaces can impact kids deeply and give them a sense of belonging that’s not just a connection to other people, but also a connection to the place in which they learn. ”

Dr. Robert Dillon, Learning Space Designer

Build a space that builds belonging

What makes a learning space
a favorite place for students?
A sense of belonging.

When learners feel they belong, they achieve more. And part of creating a welcoming environment that boosts academic success is ensuring your space reflects your students. They want a space they can adjust, personalize, and most importantly, call their own.

Make space for success

Let us help you create impactful designs that students love. Demco provides everything you need to maximize the potential of your space — on time and on budget.

Inspiri

Early education is about more than academic achievement, and learning spaces are more than the furniture inside them. Holistic design nurtures every aspect of young learners' growth and well-being.

Demco® FLEXplore

No two students are the same. Why should the places they learn be any less unique? With FLEXplore desks and tables, you can create spaces that meet every student's distinct needs so innovation, connection, and growth can come first!

- Lightweight designs are easy to rearrange
- Height-adjustable work surfaces support good ergonomics
- Dry-erase surfaces let students brainstorm
