Re: Company Initiative of Energy

As our company continues to grow on a national level and the growth is squarely positioned within the LED industry, it is important to build and execute a strategy on energy and reducing our carbon impact.

Focus #1: LED Digital Displays

- We will only partner with and provide digital displays that are energy efficient and have no fans or AC units for cooling purposes. Our focus top to work with heat sync diodes and insure our customers are receiving the most energy efficient displays in the industry.
- These displays will also come with the industry's longest warranties so that changing out these displays will happen less and thus keep our energy consumption and footprint to a minimum

Focus #2: Staffing and Travel

- We will begin placing our staff strategically across the country versus being officed in Florida. This will allow for less travel and a more strategic allocation of resources throughout the US.
- Our focus has already shifted greatly to video-conference, however I am challenging our entire team to focus on less flights and drive-time, and more video meetings. In the event you must travel to see a school for sales purposes the requirement is to have a minimum of 4 appointments confirmed for any individual trip.

Thank you for adhering to the travel mandate. I am also proud to say that our initiative on our LED manufacturing and supply to the US will be focused on staying ahead of the industry in product quality, warranty, and energy consumption. Feel free to let me know if you have any questions, or added suggestions to lower our impact across the country.

Sincerely,

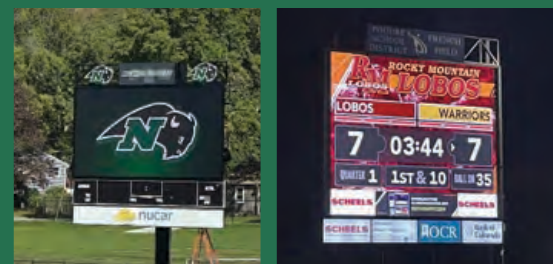

Chris Kirn
Chief Operating Officer
