◆ **What differentiates your company from competitors?**

At ESI Ergonomic Solutions, we differentiate ourselves first and foremost through our exceptional customer service specialists. We have been presented with countless awards for the “Best Customer Service”. We believe that a knowledgeable customer service team that is empowered to make critical decisions is a core differentiator.

ESI can fulfill orders in as little as 48 hours based on product on-hand availability.

We do this by maintaining high inventory levels of the most popular products so our customer can meet ambitious deadlines and schedules. ESI's exceptional fulfillment service ensures you get the products you want, when you want them. Unless otherwise specified in our catalog, most of ESI's products ship within two business days after the order is placed and acknowledged.

ESI also encompasses an initiative to keep a controlled focus on our product line and maintain competitive pricing. We keep our focus primarily on ergonomic work tools and height adjustable products in an effort to be the best in our industry. We consistently monitor our competitors to ensure we are priced at or below the market norm.

◆ **Describe how your company will market this contract if awarded.**

This team, along with the ESI sales team, will be actively involved with Region 14 ESC/NCPA and events such as NIGP and multiple other regional trade shows targeting Region 14 ESC/NCPA end users.

We will create a master marketing plan for Region 14 ESC/NCPA contract that will include

- A comprehensive training program for our sales team
- Regular emails to our resellers
- Working with Region 14 ESC/NCPA on marketing opportunities to their members
- Keeping Region 14 ESC/NCPA in front of our sales team and distribution through newsletters and marketing materials focused on Region 14 ESC/NCPA for our sales team to distribute.

We have a Vertical Market Contract Manager dedicated to Nationwide contracts and they will be managing the Region 14 ESC/NCPA Contract. Region 14 ESC/NCPA will be a priority for ESI and the Vertical Market Contract Manager will be dedicated to keeping the contract current and ensure any changes/updates are being communicated effectively to the sales team.

The Vertical Market Contract Manager will work closely with Region 14 ESC/NCPA to ensure we are doing everything we can to market to the Region 14 ESC/NCPA Member effectively as well as our sales team and dealers and to make sure we are utilizing all of the tools available to us through Region 14 ESC/NCPA.

◆ **Describe how you intend to introduce NCPA to your company.**

ESI is proud to currently be a supplier of NCPA. For over a decade, ESI has been providing federal agencies, state and local government, higher education and non-profit organizations with the tools to create high-performance work environments. First and foremost, ESI will notify our Regional VP of Sales who will coordinate training with our Independent Sales Representatives and our Authorized Distributors/Dealers.

- ESI's Vertical Markets Contract Manager, along with the Director of Vertical Markets, will review, train, and present contract changes with our Regional VP of Sales, Independent Sales Reps, Customer Service, Order Entry, and Marketing teams.

Within 90 days of award:

- ESI will develop a training schedule for ESI's Regional VP of Sales, Independent Sales Reps, and our Authorized Dealers that highlight the new award and any contract changes.
- ESI will design or update all co-branded marketing materials on our internal website and NCPA's website and distribute to our Independent Sales Reps.
- ESI will complete training presentation and roll out to ESI's Authorized Dealers.
- ESI will develop tracking plan for new contract progress.

◆ **Describe your firm's capabilities and functionality of your on-line catalog / ordering website.** ESI's Authorized Dealer Network can specify, order, sell, install, and provide the services to carry out the contract. The primary and preferred method for Participating Entities to order is through this Authorized Dealer Network. ESI will hold the agreement with Region 14 ESC/NCPA and services will be performed through the Authorized Dealer Network. This will allow ESI to provide quality products as a manufacturer and the Authorized Dealers to provide the necessary local services needed to best serve the Participating Agency.

Green Initiatives (if applicable)

- As our business grows, we want to make sure we minimize our impact on the Earth's climate. We are taking every step we can to implement innovative and responsible environmental practices throughout NCPA to reduce our carbon footprint, reduce waste, energy conservation, ensure efficient computing and much more. To that effort we ask respondents to provide their companies environmental policy and/or green initiative. ESI is committed to promoting sustainability through the products we offer and in how we operate as a company. Our goal is to give consideration to people and the planet in all our decision-making. Our strategy is to implement business practices that incorporate life-cycle analysis into the design, manufacturing, use, and end-of-life management of our products. We always work towards the continuous improvement of our environmental performance and pollution prevention.

Sustainability initiatives are a top priority for our organization. As an active BIFMA participant, we stay involved in the policy and direction the furniture industry is taking as it relates to sustainability.

We continue to work with our suppliers to collect data that is more commonly being requested in the marketplace, such as the amount of recycled content and the amount of waste generated in the manufacturing process. While we understand attempts to obtain this information are not always fruitful, we will continue to request or require this information until our mission is met.

We are pleased with our performance against our goals, and we look forward to improving year-over-year. A challenge for our company in the coming years is to create and follow our tangible goals in product development, while also making design considerations to conserve raw materials and minimize energy waste in the manufacturing process.

See our Sustainability Report in Vendor Profile Supporting Documents, [Attachment 4](#).

Anti-Discrimination Policy (if applicable)

- Describe your organizations' anti-discrimination policy. We value and celebrate diversity and believe it is everyone's responsibility to support equal opportunity for employment, development and advancement. ESI is committed to the principles of Equal Employment Opportunity and Affirmative Action. It is the obligation of each officer, manager, and supervisor to ensure all employment activities are conducted in an equal and equitable fashion, without regard to race, religion, color, national origin, sex, sexual orientation, gender identity, age disability, or veteran status. Such activities include, but are not limited to: hiring, promotion, demotion, transfer, recruitment, advertising, layoff, discharge, rate of pay, and selection for training.

◆ Vendor Certifications (if applicable)

- ▶ Provide a copy of all current licenses, registrations and certifications issued by federal, state and local agencies, and any other licenses, registrations or certifications from any other governmental entity with jurisdiction, allowing respondent to perform the covered services including, but not limited to, licenses, registrations, or certifications. Certifications can include M/WBE, HUB, and manufacturer certifications for sales and service.

ESI does not hold the mentioned certifications above; however, ESI's purpose is to pursue and conscientiously partner with a full range of diverse suppliers on a global scale. We have adopted the importance of supplier diversity and support building partnerships with small businesses. We will continue to grow and expand on this important element by focusing on Minority/Women-owned Business Enterprise (MWBEs) and Service-Disabled Veteran-Owned Business Enterprises (SDVOBs) as our core strategy. ESI's expansive network of Authorized Dealers includes many MWBE and SDVOB dealers. Participating Agencies may utilize a MWBE and SDVOB Authorized Distributor/Dealer through our Master Agreement. Pricing will remain the same as if purchased through any of our Authorized Dealers.

ESI has provided our Authorized Dealer List, with those that hold Certifications Vendor Profile Supporting Docs, [Attachment 2](#)

Sustainability Report

About the ESI Sustainability Report

Thank you for taking the time to look through ESI's yearly Sustainability Report. This report is an opportunity for ESI to communicate to company stakeholders ESI's movement towards becoming a more sustainable business while growing operations, and continuously improving sustainability performance.

ESI has identified company stakeholders to be our owners, employees, dealers, end customers, and suppliers. As well as the local community, trade organizations, governmental and regulatory agencies, certifying bodies, and consultants. The list was developed upon considering all groups who have influence over company decisions and those who may be impacted by company decisions.

ESI is proud to continue with our Sustainability Initiative, achieving the Business and Institutional Furniture Manufacturing Association's (BIFMA) LEVEL® Certification for most of our products in 2021. LEVEL® Certification is awarded based on conformance to a multi-attribute sustainable product standard, also known as the BIFMA e3-2014e Furniture Sustainability Standard. Broadly, conformance to various aspects of the e3 standard requires

analysis of our environmental, health and wellness, and social impacts, which are addressed in this report. Efforts to obtain this certification are audited by a third party certifying body, Scientific Certification Services (SCS).

ESI has written this report for the 2021 calendar year and intends to publish future reports every year. In the years to come, ESI aims to provide company stakeholders with data and performance indicators that can be monitored over time and that are material to day-to-day operations.

This report contains Standard Disclosures and Performance Indicators from the GRI G4 Sustainability Reporting Guidelines. More information about the *Global Reporting Initiative (GRI)* can be found at www.globalreporting.org. To learn more about BIFMA LEVEL® Certification, visit www.levelcertified.org.

ESI hopes that you find the disclosures informative. Any comments, feedback, or suggestions for improvement are welcomed by emailing us at customerservice@esiergo.com.

Thanks again—we appreciate your interest!

Letter from the President

ESI is committed to promoting sustainability through the products we offer and in how we operate as a company. Our goal is to give consideration to people and the planet in all our decision-making.

Our strategy is to implement business practices that incorporate life-cycle analysis into the design, manufacturing, use, and end-of-life management of our products. We always work towards the continuous improvement of our environmental performance and pollution prevention.

In addition to making a positive environmental impact, it is a priority for ESI to have a positive social impact on our community. We partner with organizations at a national level to support our country's wounded veterans. At a local level, we support homeless families and those who are experiencing hardship.

Sustainability initiatives are a top priority for our organization. As an active BIFMA participant, we stay involved in the policy and direction the furniture industry is taking as it relates to sustainability.

We continue to work with our suppliers to collect data that is more commonly being requested in the marketplace, such as the amount of recycled content and the amount of waste generated in the manufacturing process. While we understand attempts to obtain this information are not always fruitful, we will continue to request or require this information until our mission is met.

We are pleased with our performance against our goals and we look forward to improving year-over-year. A challenge for our company in the coming years is to create and follow our tangible goals in product development, while also making design considerations to conserve raw materials and minimize energy waste in the manufacturing process.

Our strategic approach to product development is to design and produce flexible and adaptable products that can be re-purposed over time as the user's needs change – as an alternative to discarding existing product and replacing it with new. Our All-Flex™ adjustable table is an example of this flexibility that supports sustainability, not only for the facility needs of today, but also for the future.

Respectfully,

Mark Rhoades

President

Environmental Stewardship

ESI is committed to promoting sustainability and being a responsible corporate citizen by giving consideration to people and the planet in all that we do; our goal is to integrate sustainability into all of our decision making. To meet this end, we will ensure that all employees remain fully aware of our Corporate Sustainability Policy and commit to implementing and improving these policies. We employ various measures to review, annually report, and work to continuously improve our sustainability performance.

ENVIRONMENTAL POLICY

ESI is committed to being environmentally responsible – through the products we offer and in how we operate as a company. We will, at a minimum, comply with all relevant local, state and federal environmental regulations. Our goal is to implement business practices that prevent pollution, incorporate life-cycle thinking into the design, manufacture, use, and the end-of-life management of our products, and work toward the continuous improvement of our environmental performance. Our environmental policy and related goals will continue to be clearly communicated to our employees, suppliers, and customers.

DESIGN FOR ENVIRONMENT

ESI takes into account the impact that our products have on the environment and adopt strategies for design that maximize their sustainability. ESI strives to produce products that incorporate renewable, recycled, recyclable and biodegradable materials; make design considerations to conserve raw materials, water and energy used in the manufacturing process; and address the end-of-life management and recovery options for the materials that make up our products.

DESIGN FOR DURABILITY / UPGRADEABILITY

ESI will design and manufacture products that have a long useful life; can withstand repeated service, repair, and handling; and utilize standardized product parts and components available to facilitate maintenance, servicing, reassembly, and/or component replacement if deemed necessary.

SOLID WASTE MANAGEMENT

ESI has implemented a 100% Landfill Diversion goal for all of its manufacturing waste from our operations. We will aim to minimize waste through efficiency measures, promotion of recycling, and employ the use of products with recycled content which will help to reduce the amount of waste sent to landfills. We have continuously worked to meet this end by setting objectives and targets for our waste streams and implement efforts that will, over time, divert all manufacturing waste from our operations from being sent to the landfill. ESI has operated as a paperless organization since 2015 drastically reducing paper usage.

CHEMICAL MANAGEMENT

ESI works to mindfully reduce or eliminate chemicals that are hazardous to human and ecosystem health throughout our manufacturing facilities; from our finishing and assembly operations, to the use of janitorial cleaning products. ESI has built a chemical inventory to identify and track all new and existing chemicals coming into and leaving our facility that could have a negative impact on the health of our employees, as well as the environment outside of our walls. We maintain Safety Data Sheets through an electronic filing system so that chemical information can easily be accessed by all members of our team. This commitment includes regular evaluation of the current state of our chemical management and hazard communication plans.

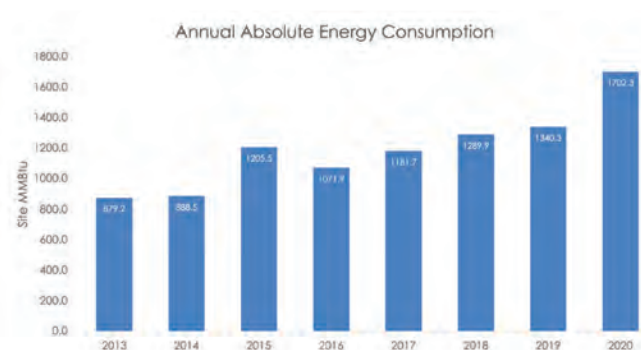

ENERGY & GREENHOUSE GAS EMISSIONS

Our goal is to minimize our carbon footprint. ESI is committed to energy conservation which includes reducing our overall energy consumption and greenhouse gas emissions. It is our policy to continuously improve upon and regularly monitor our energy performance; acting in accordance with all current and future local, state, and federal legislation required of our operations in this area. Through our environmental management system (EMS), we set objectives and targets directly related to energy conservation, which are reviewed at least annually.

ESI has set a 5% reduction goal for absolute energy consumption, at our corporate facility in Mesa, Arizona, from a 2013 baseline. We are hopeful we will reach this target by the year 2022. In order to achieve this, we have begun, and will continue, to implement energy savings projects to reduce our energy consumption. See the metrics we use to track both our energy consumption and greenhouse gas emissions (GHGs).

TRANSPORTATION

ESI is committed to reducing transportation related emissions through idling reductions, carrier selection, and reductions in unnecessary inter-company movement. ESI has employed an idling reduction policy at its manufacturing facility for its internal and 3rd party fleet vehicles. Attention is given to environmental criteria when selecting 3rd party carriers for inbound and outbound products and materials.

BULK SHIPMENT PRACTICES

ESI employs a freight management system that requires any order larger than our minimum threshold be shipped in a bulk freight shipment rather than standard ground shipment. This practice helps to reduce fuel consumption as it allows us to ship a smaller number of large orders versus a high volume of small orders. Furthermore, our inventory replenishment system, automatically initiates single bulk purchase orders for stock replenishment when inventory reaches its lowest allowable limit, so that inventory is maintained and small orders are not required. This results in fewer inbound and outbound shipments for our transport partners, saving fuel and related greenhouse gas emissions, and man hours. This practice of bulk purchasing also helps to streamline our manufacturers' processes and reduces the amount of energy and emissions that would be required to fulfill multiple smaller orders.

Social Responsibility

ESI has a strong commitment to maintaining the highest possible standards in all that we do. We act vigilantly to be as fair as possible with our customers, employees, and our manufacturing partners and to benefit the community in which we operate.

We understand the importance of integrity and reliability to our success as a business. All officers and employees of ESI are expected to conduct their business affairs in accordance with all applicable laws of the United States and observe the highest standards of business ethics; acting honorably while considering the impact of our decisions on our stakeholders.

COMMUNITY INVOLVEMENT

It is important to ESI to be able to make the biggest impact possible on our community and the organizations we support, both locally and nationwide. ESI seeks out activities that contribute to the community in which we operate. Activities include volunteerism, donations, and sponsorship opportunities, among others. We make every effort to involve our employees in these decisions and encourage their participation.

ESI supports *Save the Family Foundation of Arizona* by providing for local families who need support to once again achieve self-sufficiency. ESI employees participate in multiple activities throughout the year such as stuffing backpacks for children, assembling Thanksgiving meals, and sponsoring families around the holidays.

It is important to ESI to be able to make the biggest impact possible on the organizations we support both locally and nationwide. Therefore, any financial donations given by ESI are not used on indirect costs or overhead.

ESI has committed to a minimum of four volunteer efforts and/or financial contributions occurring within the community in which it operates, annually. During 2020, ESI contributed to the following efforts:

- **Save the Family Foundation of Arizona –**

Save the Family Foundation of Arizona offers a variety of programs designed to empower families to conquer homelessness and achieve life-long independence. Through targeted services, families at Save the Family end the damaging effects of family homelessness by improving their education and employment opportunities, accessing safe, permanent housing, and building family competencies. Today, the foundation offers an array of additional programs for adults, youth, and children, including parenting skills, personal development classes, and support for victims of domestic violence; career development, literacy support, and financial education; dental, vision, and legal services; tutoring, after-school classes, and camps and activities for youth. During 2019, ESI contributed to Save the Family in the following ways:

- Mother's Day – ESI partnered with Save the Family Foundation of Arizona to come up with a special ESI only donation for the mothers going through their program. Save the Family hosts a Mother's Day gathering and 30 volunteers from ESI provided gift baskets filled with items for the moms to pamper themselves with. All ESI employees came together to decorate and fill each gift basket.

- **Back 2 School** – The highest population of homeless people in Arizona are school age children. Because of this, 60 volunteers from ESI partnered and provided backpacks to the Save the Family children. ESI employees gathered together to stuff the backpacks full of all of the necessary school supplies for elementary aged children. Save the Family Foundation of Arizona then hosted a back to school bash where they celebrate the children and pass out backpacks to each student.
- **Holiday Donations** – ESI provided a cash donation for both to provide holiday meals for families for both Thanksgiving and Christmas.

House of Refuge – a financial donation was made to this organization which is a faith-based, 501(c)(3) non-profit organization located on 20 acres in Southeast Mesa, Arizona. Our community includes 88 2-bedroom homes that we rent to families experiencing homelessness. By providing a home and comprehensive, wrap-around supportive services, we help these families overcome homelessness, become self-sufficient and move to sustainable housing.

To learn more about House of Refuge, please visit houseofrefuge.org/.

Concern America – this globally focused community development organization works with communities in economically impoverished regions so that community members themselves become empowered to improve their own lives — focusing on health, sanitation, education, and income-generation projects.

For more than 45 years, they have worked in 15 countries on 4 continents and have measurably impacted the lives of more than 2 million people. They currently operate community-centered programs in materially impoverished areas of Colombia, Guatemala, and Mexico.

GIVE Program – ESI partners with our parent company Fellowes to support their GIVE program. GIVE is dedicated to building local and global partnerships which address humanity's greatest needs.

The programs' guiding principles align with our strong values as a company and are the hearts of our people. GIVE is committed to supporting initiatives in four key areas: Social Services, World Aid and Development, Education and Medical Research.

We are honored to work as a team in building strong communities, improving lives, and providing a better tomorrow for our world today. Fellowes partners financially with 501(C)3 organizations and projects, which are committed to bringing sustainable improvement to our four key areas of focus.

- Two current projects include a clean water initiative in Mozambique through World Vision, and a vocational school project in Nicaragua through Opportunity International.
- All employees have an opportunity to volunteer for designated community projects.

LABOR AND HUMAN RIGHTS

It is company policy to protect and respect the basic human rights of our employees and associates. ESI commits to providing decent work hours, wages, and conditions as well as upholding all local, state, federal, and global regulations prohibiting forced, compulsory, and child labor.

ESI is dedicated to treating associates fairly; providing competitive wages, benefits, and good working conditions; maintaining a strong communication link between supervisor/manager and associates; and providing an attractive, challenging, and fun environment in which to work. Respecting the needs of each team member as an individual, ESI encourages employees to use every opportunity the company affords them to do their best, give their best, and be the best!

ESI works to maintain a dominant market position and continued profitable growth, and is committed to fill open positions in the company with the most capable person available. Individual capability, initiative, willingness and ability to take responsibility coupled with performance – are prime criteria for advancement.

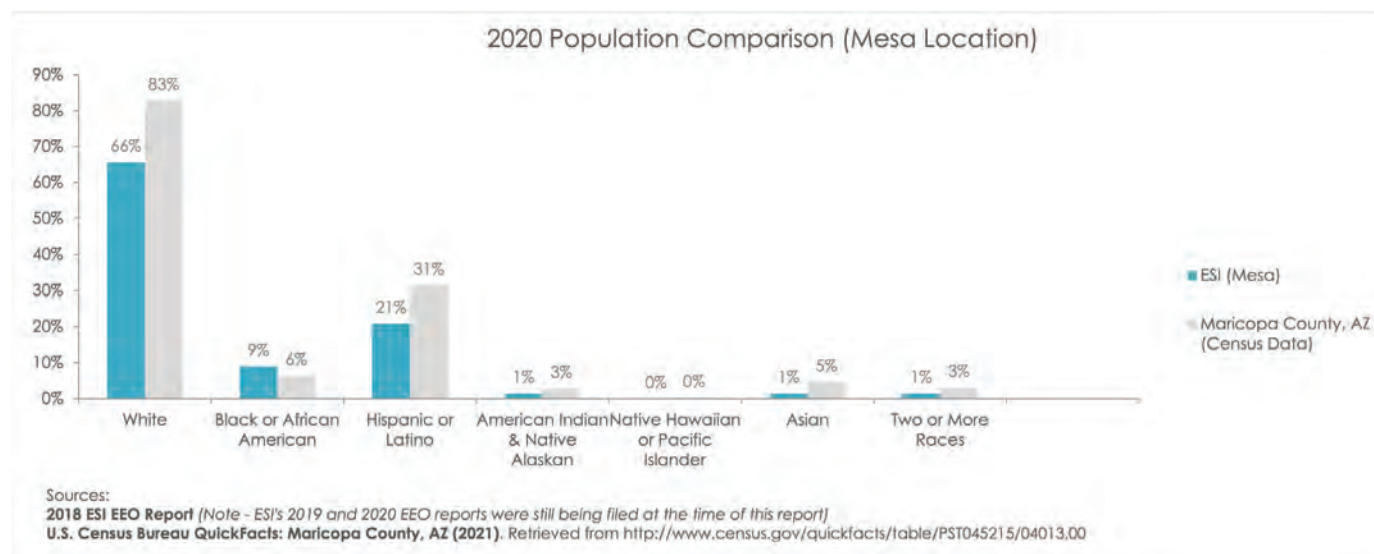

ESI has also implemented a requirement of its suppliers, both domestic and internationally, to sign off on our Supplier Code of Conduct which addresses various human rights issues. ESI also assesses the companies it contracts with globally to ensure that decent working conditions are provided and that basic human rights of workers are protected.

INCLUSION

ESI is an equal opportunity employer that is dedicated to treating employees fairly; providing competitive wages, benefits, and good working conditions; maintaining a strong communication link between supervisor/manager and employees; and providing an attractive, challenging, and fun environment in which to work.

Employment and promotion decisions will be factored by qualifications of an individual and without regard to personal characteristics, including race, color, religion, national origin, sex, sexual orientation, age, veteran status, disability or any other basis protected by federal, state, or local fair employment practice laws.

An inclusive workplace is important to ESI because it is an essential part of the company's overall commitment to attract, hire and develop strong, talented and diverse work force. ESI holds monthly employee meetings where we discuss current company events and facts as well as celebrate employee birthdays and anniversaries. Every quarter, we hold an employee luncheon where all employees get to interact. To further solicit comments, ESI provides a suggestion box in the employee break room and annually surveys all employees giving them an additional opportunity to provide feedback and ideas. Upper management, reviews the top or most concerning issues and creates an action plan.

HEALTH & SAFETY

ESI is committed to continually improving our performance through effective safety management. The company complies with all health and safety regulatory requirements to maintain a safe workplace. In fulfilling this commitment, we strive to eliminate any actual or potential safety threats to our employees', and the company's, wellbeing.

ESI has a health and wellness program that helps engage our employees in activities that help to improve overall personal health and knowledge such as health webinars, personal biometric screenings, and CPR trainings. Risk assessments, related to specific job functions, are conducted annually in an effort to identify job hazards and who might be harmed and how. The results of the risk assessments are recorded in writing, and safety procedures adjusted to ensure adequate levels of health, safety, and welfare.

Safety rules are strictly enforced; to ensure their success, management provides information, instruction, training, and supervision that is necessary to ensure that each worker is safe from injury and risks to health. On an annual basis it is mandatory for each employee to participate in online, interactive safety trainings. This policy includes a commitment to consult and co-operate with workers in all matters relating to health and safety management at ESI.
