Software Strengths

Globally Accessible

CleanCityNetworks is accessible around the clock, anywhere in the world on a desktop (web browser) or smartphone (mobile app). Easy to use and always up to date.

CleanCUBE Installation Best Practice

Sunlight

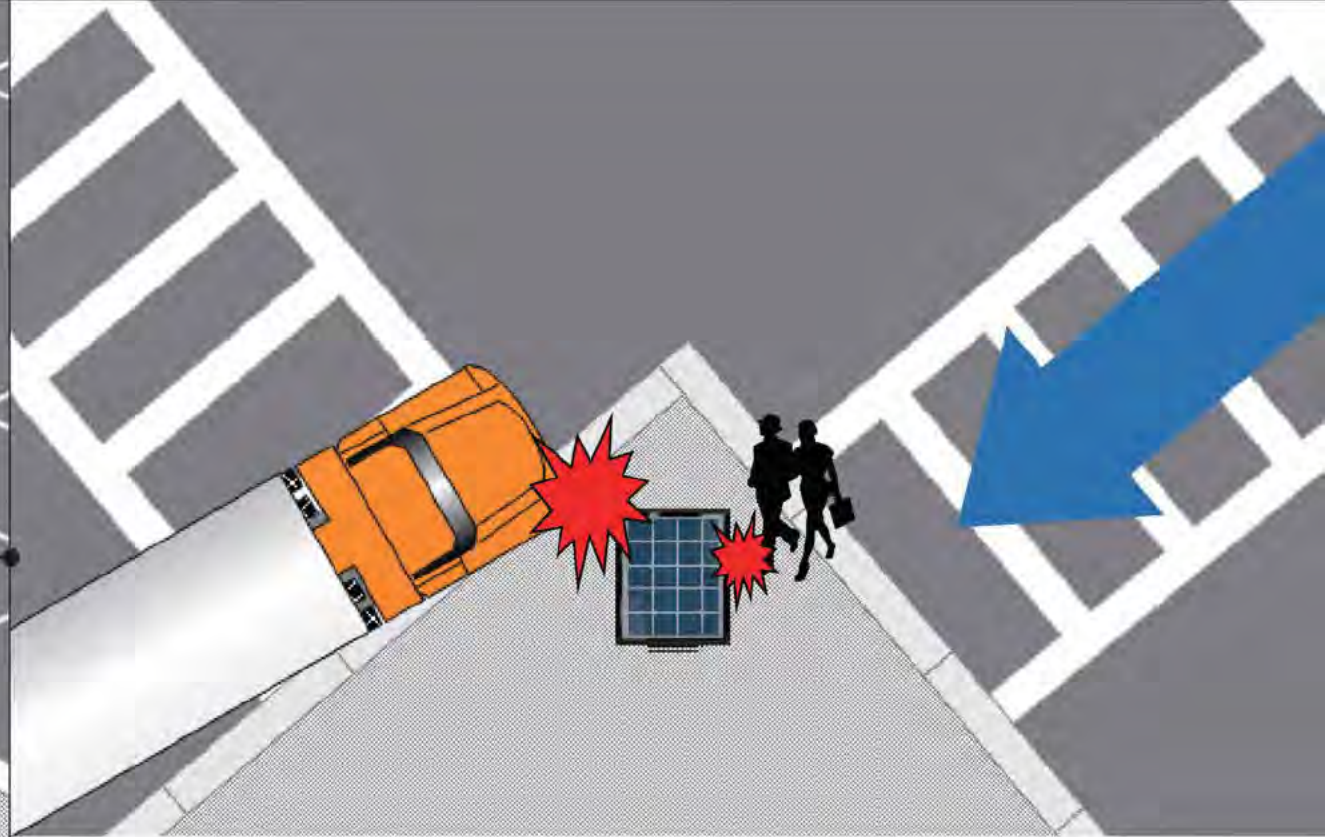

- Select installation sites where sunlight is unobstructed
- To ensure the unit has optimal access to sunlight, the best times for installations (in most regions) are between 10:00 to 14:00 when the sun is highest in the sky
- Avoid sites that are surrounded with buildings or other infrastructure which block the sunlight for most of the day
- Avoid installing near trees that can grow branches and leaves in warmer months and obstruct the sun

Street Parking

Make sure to choose sites that do not impede the entry and exit of motor vehicles

Intersections & Street Corners

Avoid street corner installations; motor vehicles have been known to damage units on careless turns

Pedestrian Flow

Do not block pedestrian pathways

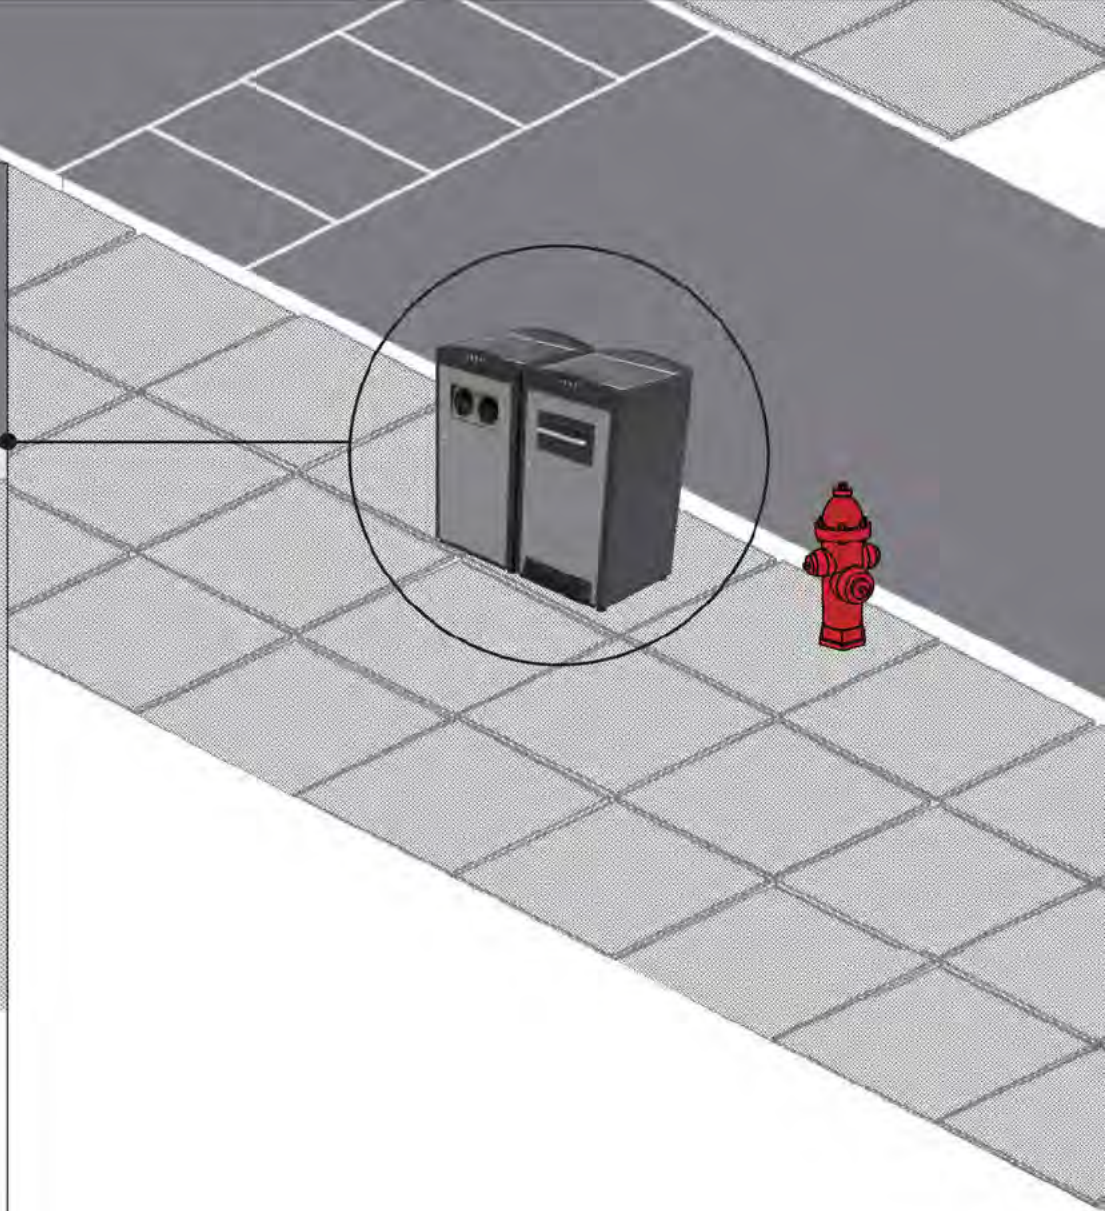

Fire Hydrant

100cm
(=1m)

Fire Hydrant

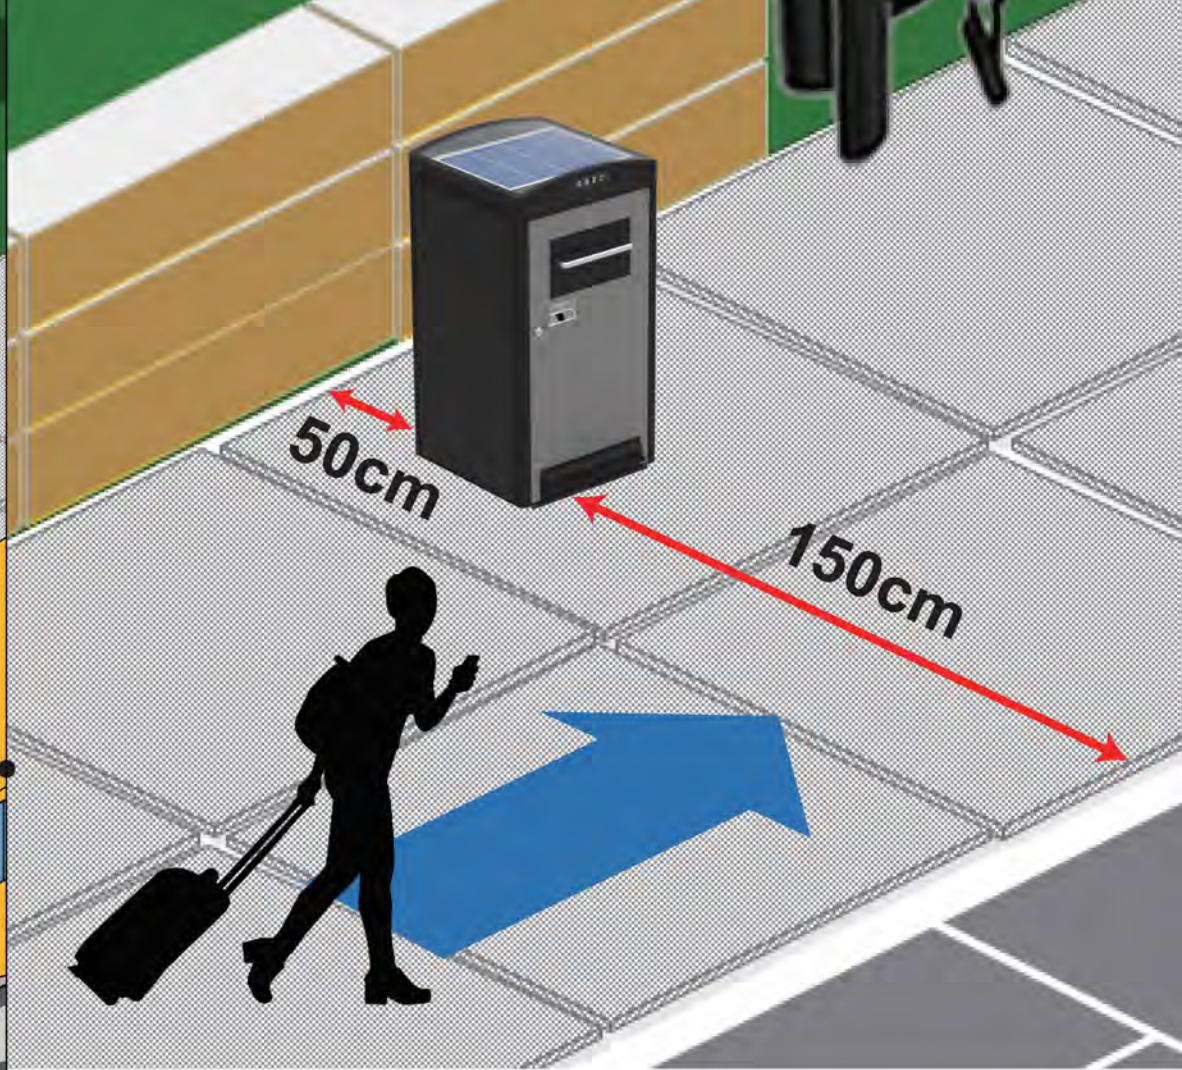

Keep the CleanCUBE at least 1 meter away from all hydrants

Sidewalks & Handicap Access

Make sure there is enough space on sidewalks for wheelchairs, strollers (prams), and pedestrians

Bus Stops & Shelters

- Make sure passengers have enough space to get on and get off the bus
- Take note that CleanCUBEs need at least 50cm of clearance in the back for maintenance procedures

Loading Zones

Avoid installing near loading zones as this increases the likelihood of the unit being damaged and/or upsetting local businesses

Baltimore USA

Baltimore is giving residents new reasons to take pride in their city.

Baltimore, the largest city in Maryland with a metropolitan area population of 2.8 million, is taking bold steps to become a smart city of the future. Since September 2018 the city has deployed solar-powered CleanCUBEs to clean up its streets and go green. It has immediately seen a drastic drop in waste collections resulting in less fuel emissions and traffic congestion. And by using cloud software, city officials can optimize collection schedules and quickly identify unsightly overflow. Hoppers have also been equipped with wireless locks to prevent terrorism ahead of big events. Residents are enjoying safer and cleaner streets and finding renewed pride in the city's image.

Solution

Result

- **Collections reduced by 98.5%**
General waste collections dramatically reduced by 98.5% from twice a day per bin to an average of once a month.
- **Waste volume down 97.7%**
- **Savings in time, carbon emissions, and costs**
Haulers can visually check bins with low levels and skip them saving time, fuel emissions, traffic congestion, and money.
- **Recycling volume averaged 704 gallons per bin each month**
Collection frequency for recyclables reduced by 74.3%.
- **Waste overflow incidents minimized to once a day**
- **Online ability to lock hopper openings to ensure safety before large scale events**
- **Possible deployment of 4000 CleanCUBEs under consideration**

Melbourne AUSTRALIA

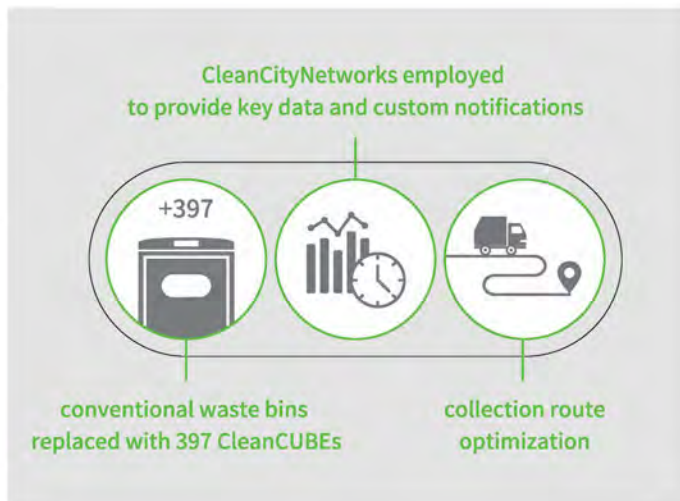

By implementing innovative smart city solutions, Melbourne plans to continue dominating the rankings as the world's most liveable city.

A cosmopolitan city with a population of 4.8 million and 30 million visitors a year, Melbourne's top priorities include aesthetics and cleanliness. Without any data on waste generation, trash collections involved emptying bins multiple times a day to minimize overflow, an eye sore to residents and tourists. Since deployment of CleanCUBE[®]s in early 2018, the city has been able to dramatically lower its collection frequency, quickly remedy overflow, and maximize efficiency by identifying times, seasons, and areas with high levels of waste. CleanCUBE[®]s have helped the city uphold the highest standard of living for its residents.

Solution

Result

- **Collections reduced by 96.3%**
Monthly collection frequency fell 96.3% from an estimated average of one collection every 6 hours to an actual average of once every 7 days.
- **Waste volume dropped 95.4%**
During one year period, monthly waste volume fell by 95.4% compared to previous conventional bin estimates.
- **Overflow incidents down to 11.5 per month**
Only 2.38% of all CleanCUBEs see overflow in a month.
- **CleanCUBEs are being installed in municipalities all over Australia**

Everland KOREA

Everland successfully eliminated overflowing bins and established a smarter waste management plan to cement its position as the premier theme park in South Korea.

As the 17th most visited amusement park in the world with 6.3 million visitors a year (over 17,200 per day), preventing waste overflow is critical for the park's image. Therefore it was typical for the park to schedule numerous collections throughout the day even during peak operating hours. Once CleanCUBEs were installed (early 2018), its waste compaction feature allowed the park to postpone collections to the evening. CleanCityNetworks also empowered park staff to identify and remedy daytime overflow right away, keeping waste out of sight for guests.

Solution

Result

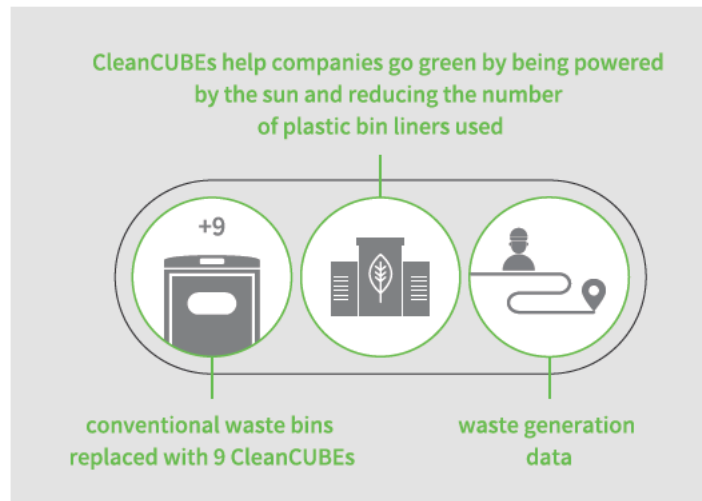

- **No overflow incidents for 6 months**
Waste overflow incidents minimized to an average of once a month for the entire park with 6 months recording no overflow incidents at all.
- **Collections reduced by:**
High season: 87% (from once every 9.4 hours to once every 72 hours)
Mid-season: 94% (from once every 9.4 hours to once every 7.6 days)
- **Significant savings in collections and operational costs**
One-third reduction in waste management expenses.
- **Collections scheduled in the evening, out of sight from most guests**

San Francisco Premium Outlets USA

Simon Properties purchased CleanCUBE[®]s for two of their outdoor malls in its commitment to provide a premium experience for both customers and tenants.

In spring 2018, nine CleanCUBE[®]s were deployed at the San Francisco Premium Outlets in Livermore, California. During peak months, the mall was faced with the challenge of upholding facility aesthetics (i.e., floors, décor, and restrooms) with a limited custodial team. For the first time ever, CleanCityNetworks provided property managers with actual waste generation data helping them adjust collection frequency and freeing up their custodial team from unpleasant duties like emptying waste so they can focus on keeping their facilities looking clean and pristine.

Solution

Result

- **Peak months: trash volume averaged 872 gallons (3,300 L) a month**
- **Non-peak months: 347 gallons (1,314 L) a month**
- **Peak months: 98% reduction in collections**
Collections dropped 98% from an estimated 10 collections a day per bin to an actual frequency of 0.2 collections a day.
- **Non-peak months: 98.3% reduction in collections**
Collections dropped 98.3% from an estimated 5 collections a day per bin to an actual frequency of once every 13.2 days (or 0.08 collections per day).
- **Custodians can focus on other duties of facility management**
Custodians freed up from frequent and arbitrarily scheduled waste collections so they can focus on upholding the premium feel of the property.
- **Waste overflow minimized to just one incident over 8 months**

In all solicitations, either by competitive bidding or negotiation, made by Contractor for work to be performed under a subcontract, including procurements of materials or leases of equipment, each potential subcontractor or supplier shall be notified by Contractor of Contractor's obligations under this Contract and the regulations relative to non-discrimination on the grounds of race, color, creed, sex, disability, age or national origin.
 - 4) Sanctions of Non-Compliance. In the event of Contractor's non-compliance with the non-discrimination provisions of this Contract, Public Agency shall impose such Contract sanctions as it or the FTA may determine to be appropriate, including, but not limited to: 1) Withholding of payments to Contractor under the Contract until Contractor complies, and/or; 2) Cancellation, termination or suspension of the Contract, in whole or in part.

Contractor agrees to include the requirements of this clause in each subcontract financed in whole or in part with Federal assistance provided by FTA, modified only if necessary to identify the affected parties.

DISADVANTAGED BUSINESS PARTICIPATION

This Contract is subject to the requirements of Title 49, Code of Federal Regulations, Part 26, "*Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs*", therefore, it is the policy of the Department of Transportation (DOT) to ensure that Disadvantaged Business Enterprises (DBEs), as defined in 49 CFR Part 26, have an equal opportunity to receive and participate in the performance of DOT-assisted contracts.

- 1) Non-Discrimination Assurances. Contractor or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this Contract. Contractor shall carry out all applicable requirements of 49 CFR Part 26 in the award and administration of DOT-assisted contracts. Failure by Contractor to carry out these requirements is a material breach of this Contract, which may result in the termination of this Contract or other such remedy as public agency deems appropriate. Each subcontract Contractor signs with a subcontractor must include the assurance in this paragraph. (See 49 CFR 26.13(b)).

- 2) Prompt Payment. Contractor is required to pay each subcontractor performing Work under this prime Contract for satisfactory performance of that work no later than thirty (30) days after Contractor's receipt of payment for that Work from public agency. In addition, Contractor is required to return any retainage payments to those subcontractors within thirty (30) days after the subcontractor's work related to this Contract is satisfactorily completed and any liens have been secured. Any delay or postponement of payment from the above time frames may occur only for good cause following written approval of public agency. This clause applies to both DBE and non-DBE subcontractors. Contractor must promptly notify public agency whenever a DBE subcontractor performing Work related to this Contract is terminated or fails to complete its Work, and must make good faith efforts to engage another DBE subcontractor to perform at least the same amount of work. Contractor may not terminate any DBE subcontractor and perform that Work through its own forces, or those of an affiliate, without prior written consent of public agency.
- 3) DBE Program. In connection with the performance of this Contract, Contractor will cooperate with public agency in meeting its commitments and goals to ensure that DBEs shall have the maximum practicable opportunity to compete for subcontract work, regardless of whether a contract goal is set for this Contract. Contractor agrees to use good faith efforts to carry out a policy in the award of its subcontracts, agent agreements, and procurement contracts which will, to the fullest extent, utilize DBEs consistent with the efficient performance of the Contract.

ENERGY CONSERVATION REQUIREMENTS

Contractor agrees to comply with mandatory standards and policies relating to energy efficiency which are contained in the State energy conservation plans issued under the Energy Policy and Conservation Act, as amended, 42 U.S.C. Sections 6321 *et seq.* and 41 CFR Part 301-10.

FEDERAL CHANGES

Contractor shall at all times comply with all applicable FTA regulations, policies, procedures and directives, including without limitation those listed directly or by reference in the Contract between public agency and the FTA, as they may be amended or promulgated from time to time during the term of this contract. Contractor's failure to so comply shall constitute a material breach of this Contract.

INCORPORATION OF FEDERAL TRANSIT ADMINISTRATION (FTA) TERMS

The provisions include, in part, certain Standard Terms and Conditions required by the U.S. Department of Transportation (DOT), whether or not expressly set forth in the preceding Contract provisions. All contractual provisions required by the DOT, as set forth in the most current FTA Circular 4220.1F, dated November 1, 2008, are hereby incorporated by reference. Anything to the contrary herein notwithstanding, all FTA mandated terms shall be deemed to control in the event of a conflict with other provisions contained in this Contract. Contractor agrees not to perform any act, fail to perform any act, or refuse to comply with any public agency requests that would cause public agency to be in violation of the FTA terms and conditions.

NO FEDERAL GOVERNMENT OBLIGATIONS TO THIRD PARTIES

Agency and Contractor acknowledge and agree that, absent the Federal Government's express written consent and notwithstanding any concurrence by the Federal Government in or approval of the solicitation or award of the underlying Contract, the Federal Government is not a party to this Contract and shall not be subject to any obligations or liabilities to agency, Contractor, or any other party (whether or not a party to that contract) pertaining to any matter resulting from the underlying Contract.

Contractor agrees to include the above clause in each subcontract financed in whole or in part with federal assistance provided by the FTA. It is further agreed that the clause shall not be modified, except to identify the subcontractor who will be subject to its provisions.

PROGRAM FRAUD AND FALSE OR FRAUDULENT STATEMENTS

Contractor acknowledges that the provisions of the Program Fraud Civil Remedies Act of 1986, as amended, 31 U.S.C. §§ 3801 et seq. and U.S. DOT regulations, "Program Fraud Civil Remedies," 49 CFR Part 31, apply to its actions pertaining to this Contract. Upon execution of the underlying Contract, Contractor certifies or affirms the truthfulness and accuracy of any statement it has made, it makes, it may make, or causes to be made, pertaining to the underlying Contract or the FTA assisted project for which this Contract Work is being performed.

In addition to other penalties that may be applicable, Contractor further acknowledges that if it makes, or causes to be made, a false, fictitious, or fraudulent claim, statement, submission, or certification, the Federal Government reserves the right to impose the penalties of the Program Fraud Civil Remedies Act of 1986 on Contractor to the extent the Federal Government deems appropriate.

Contractor also acknowledges that if it makes, or causes to be made, a false, fictitious, or fraudulent claim, statement, submission, or certification to the Federal Government under a contract connected with a project that is financed in whole or in part with Federal assistance originally awarded by FTA under the authority of 49 U.S.C. § 5307, the Government reserves the right to impose the penalties of 18 U.S.C. § 1001 and 49 U.S.C. § 5307 (n)(1) on the Contractor, to the extent the Federal Government deems appropriate.

Contractor agrees to include the above clauses in each subcontract financed in whole or in part with Federal assistance provided by FTA. It is further agreed that the clauses shall not be modified, except to identify the subcontractor who will be subject to the provisions.
