Companies shall complete and submit the form below regarding the products or supplies required to perform the Services.

Question	Response
Recycled Content. Products must contain a certain percentage of recycled content. Please include the amount of recycled content, both pre- and post-consumer, included in your product.	The Exemplis LLC Supply Chain team has built-in goals and incentives to source components with higher recycled content and from regional partners. On average, SitOnIt Seating, IDEON Soft Seating, and Symmetry Office products have anywhere from 10% - 20% recycled content in the finished product. Our fabric selection includes a variety of choices made of 100% recycled material. With any component we buy, besides the percentage of recycled content, our greatest priority is the quality and craftsmanship of the component.
Recyclability. Please include the types of materials included in your product, and if they are considered recyclable in typical municipal recycling streams.	Exemplis LLC's design and material selection process supports sustainability and recyclability for all of our products. Our products consist of plastics, aluminum, steel, wood, and fabric.
Biodegradability. Products must be capable of decomposing under natural conditions. Please state whether each Product offered in your proposal is biodegradable.	Reducing the environmental impacts of our products begins with our new product development process. All new products or major design modifications on existing products go through our Design for Environment process, which seeks to incorporate energy and water efficiency, renewable, recycled, recyclable and biodegradable materials and to account for end-of-life impacts.
	Exemplis LLC's textile selection includes a variety of choices made of 100% post-consumer and/or preconsumer fiber.
Composability. Products must be capable of composting at a commercial composting facility. Please state whether each product offered in your proposal is compostable.	We are currently working with a United States-based textile manufacturer who is able to extrude yarns that will be compostable. This textile will be available to our customers starting in 2020.
	Exemplis LLC has set a 40% reduction goal for normalized energy consumption at our facilities. We are hopeful we will reach this target by the year 2025. In order to achieve this, we have begun, and will continue, to implement energy savings projects to reduce our energy consumption.
Energy Consumption. Please include the total amount of energy consumed for product or service manufacture, use and disposal. Different sources of energy are associated with different environmental impacts.	In addition, Exemplis LLC has committed to purchase Renewable Energy Certificates (RECs) to offset a portion of the energy consumed from our manufacturing operations on an annual basis.

	The normalized reductions we achieved from our 2008-2010 established baseline for energy consumption and greenhouse gas emissions for the 2018 reporting year were 27.8% and 16.8%,
Engage Efficiency	respectively.
Energy Efficiency.

reformulation or redesign of products,
substitution of raw materials, and
improvements in housekeeping,
maintenance, training or inventory control.

During assembly, our team uses environmentally-friendly water-based adhesives. Our precision design and state-of-the-art cutting machines minimize waste during production.

Each month, we collect material waste like leather and fabric scraps, plastic drums, carboard and metal and recycle them at local recycling centers.

We are committed to reducing the human and ecosystem health impacts of our products and processes through regularly evaluating our chemical management and hazard communication plans. We will continuously evaluate and monitor the chemicals used in our facility and maintain current Safety Data Sheets through an electronic filing system. Using this process, we will build a chemical inventory system to identify and track all existing chemicals within and leaving our facility, as well as all future purchased chemicals that are not currently in our system.

Reducing the environmental impacts of our products begins with our new product development process. All new products or major design modifications on existing products go through our Design for Environment process, which seeks to incorporate energy and water efficiency, renewable, recycled, recyclable and biodegradable materials and to account for end-of-life impacts.

Life Cycle Management.

Please state how many times your product may be reused. (Since reusable products generally require more upfront costs than disposable products, they are often subjected to a cost/benefit analysis to determine the life cycle cost).

Exemplis LLC's products are brand new, custom built-to-order. Our lifetime warranty (excluding any exceptions) provides multi-year coverage for our products which encourages our customers to maximize its use over a period of time.

End of Life Management.

Will the manufacturer or designee accept the product back at the end-of-life? (who pays for the transportation of the product may be situation-specific). Exemplis LLC offers the Take-Back Program to minimize product waste and make environmental responsibility easy for our customers. To honor this, we have partnered with the nonprofit environmental organization ANEW to offer a return program for surplus product – regardless of condition.
