## Why Fastenal?

We don't just fill orders; we invest in your success with world-class inventory management solutions that drive cost savings, productivity, and profits – all powered by local Fastenal personnel and same-day product solutions.

### E-BUSINESS

Whether you're looking to simplify online ordering and order management, improve the accuracy and efficiency of your procurement process, or gain visibility and control over your entire value chain, Fastenal has the right solutions for your e-business needs.

### BIN STOCK

We offer a range of manual and electronic solutions to streamline replenishment of your bin stock inventory. Choose who monitors the bins, generates orders, and puts the product away (your team or ours), and we'll tailor a solution that keeps just the right amount of product flowing, when and where you need it.

### VENDING

We provide the machines and keep them filled with an evolving mix of supplies to meet your changing needs. You benefit from 24/7 point-of-use access, a hands-free replenishment process, detailed usage reporting, and a significant reduction in consumption and spending (typically 25 to 35%).

### ONSITE

With an Onsite partnership, we bring full-time experts and Fastenal-owned inventory (essentially a dedicated 'store') within your facility to take on the burden of inventory acquisition, ownership and management. The results: increased productivity and a lower total cost of ownership.

### INTEGRATED SUPPLY

Builds upon our Onsite model by introducing an additional element of service: procurement and management of supplies that fall outside Fastenal's core product offering. It's an opportunity to further consolidate and streamline the supply chain by relying on our experts to manage a truly world-class procure to pay process.
