

THE ONLY

Full Suite Identity Solution

Identity Access Governance

- Automated User Lifecycle Management
- Self-Service Profile Management
- Request Access & Approvals
- Help Desk User Management

Identity Access Governance (IAG) serves as the foundation for Zero Trust security, empowering your organization to enhance user and application security through automation. Fischer offers essential controls to build a robust security model, reducing risks effectively.

Access Management

- Authentication & Authorization
- HPAM
- Password Governance
- Identity Claim

Elevate your security and convenience with Fischer Access Management. Our platform includes intuitive Password Governance, Identity Claiming, and secure cloud single sign-on. Our platform supports OAuth, OIDC, SAML2, Social, Passwordless, and MFA authentication for enhanced security and effortless application access.

Compliance

- Certification
- Attestation
- Real-Time Risk Monitoring
- Continuous Governance Monitoring

In the ever-evolving security landscape, neglecting a clear risk framework and ongoing enforcement can lead to unexpected breaches. Embracing a strong risk model for access governance, in line with zero-trust principles, is now a crucial step to secure your organization's future.

Accelerated Identity™
