

Achieve Regulatory Excellence

Fisher Scientific Compliance Services Program

The Fisher Scientific Compliance Services program is here to help you adhere to important regulations, including those outlined in 21 CFR (FDA), 29 CFR (OSHA), and 40 CFR (EPA). By following best practices, implementing robust monitoring systems, and taking proactive steps, you'll not only mitigate risks but foster a culture of compliance. Lean on our team for products, resources, and more that bring safety, quality, and compliance to the forefront.

Food and Drug Administration Compliance (21 CFR)

From good manufacturing practices to labeling and packaging compliance, finding the right products will help keep you on track. It's important that you not only establish safe systems but that you're maintaining accuracy and quality throughout your process. Lean on our team to help you find contamination control, sterilization, and cleaning solutions, as well as products for your controlled environments.

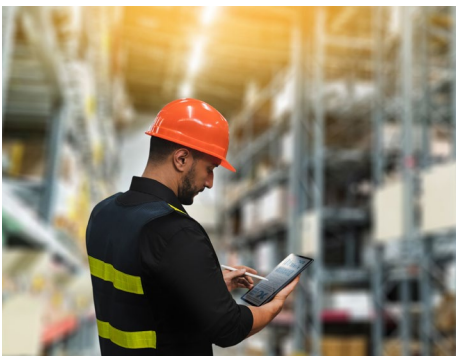

Occupational Safety and Health Administration Compliance (29 CFR)

To help prevent workplace injury, it's important to regularly conduct hazard assessments and host safety trainings and have an emergency response plan in place. This includes ensuring that the right PPE is selected, used, and maintained, and that the health of your employees is always being considered.

Environmental Protection Agency Compliance (40 CFR)

Keep hazardous waste management and air and water quality under control by implementing the right protocols, monitoring emissions, inspecting regularly, and taking action when needed. This includes handling, storing, transporting, and disposing of materials according to EPA regulations. Explore sustainability and recycling resources to help you comply with environmental standards.

Logistics and Procurement

Properly managing storage and distribution can help you deliver on time to the right places. To streamline operations, costs, and inventory levels, you may need to focus on sourcing suppliers, negotiating contracts, or placing orders. Find products, financial solutions, and other resources for your logistics and procurement needs.
