Expanding the Potential for Learning

Expanding the Potential for *learning*

At HON, we believe every space throughout the school begins with the cohesive design of furniture and the tools students and educators use every day. From student seating for all grades, to collaborative soft-seating, desks from seated-to-standing heights, tables, and multi-purpose storage options—every solution we craft helps create flexible environments that support all levels of learning, engagement, and creativity.

A New Chapter in Education

Education spaces have evolved. Although the traditional classroom components remain—think desks, seating, and storage—how those environments and tools support a wide variety of needs is changing every day.

Every school year, leadership must address a myriad of challenges. Recruiting and retaining talented teachers, supporting diverse learning capabilities, and maintaining student well-being are just a few of the concerns decision makers need to manage. From thoughtful organization to comprehensive comfort to creative classroom configuration, ensuring educators and students have the support they need to be successful and happy requires inclusive vision and steadfast commitment.

It's been proven that well-designed learning spaces—media centers, quiet rooms, classroom environments, and everything in between—play a vital role in supporting the efforts of schools determined to make a difference. Enhancing those spaces with furniture solutions designed to foster connection, creativity, and imagination is key.

At HON, we're not satisfied with the status quo. We're thinking outside the box with innovative environments that encourage big dreams and accomplishments at every learning level. And that starts with classroom furniture solutions that go beyond the basics. It's time to expand the potential for learning. HON will lead the way.

Classrooms

Whether it's English 101 or Advanced Calculus, classroom design is vital to student success. The key? Flexibility. With a creative approach focused on emerging education trends, any learning space can offer inclusive support and ignite imaginations of all ages and aptitudes. That starts with easily configurable and remarkably durable classroom furniture that makes ongoing success accessible for everyone.

 One practical way dynamic classrooms support teachers is that well-designed learning spaces can help mitigate behavior issues. Students are also more effectively engaged in their learning when the classroom is flexible and collaborative. Both scenarios result in a better work experience for teachers, which in turn boosts wellness and morale.¹

Grades K-4

Kids thrive in classrooms that allow for movement, and those classrooms are powered by flexible furniture. Settings that can be rearranged easily foster collaboration and connection, while keeping active minds and bodies engaged.

Increased studies indicate that students in flexible, active classrooms are more frequently successful in academic pursuits. Enhancing the physical characteristics of learning spaces resulted in improved performance in reading, writing, and mathematics by 16%, with classroom flexibility credited for a full quarter of that improvement.²

Grades 5-8

Whether students are working together or individually, their classroom needs furniture that quickly and easily supports both. That's why flexibility is an upgrade desired by 63% of teachers.

A learning environment that is flexible and welcoming enables students to find their place within the classroom, promoting a sense of psychological safety and empowerment. Relaxed students are more able to focus on instruction, and empowered students are more inclined to stay engaged.³

Grades 9-12

Preparing students for the real world becomes all the more important in high school. The right furniture supports individual creativity and group collaboration, which helps students build for the future in a flexible and diverse environment.

Neurodiverse Classroom

Learning isn't one size fits all. Recognizing and supporting emotional and cognitive differences is imperative to the growth and success of neurodiverse students. Sensory-friendly spaces designed around flexible, kinesthetic furniture and tools help create structure, psychological safety, and engagement for everyone.

Active learning classrooms offer a variety of seating options. Tall bistro tables and stools, couches, or bean bag chairs, for example, in addition to traditional desks and chairs, or modular tables for collaborative grouping. This allows students to choose the area where they're not only most comfortable, but one that best suits their learning style. As a result, students are more engaged, which reduces the possibility of off-task behavior.⁴

 A recent survey of one school district's student wellness centers indicates that 96% of student respondents reported that the calming room improved their sense of safety and well-being.⁵

Wellness Room

Everyone deserves time and space to decompress during the day. With inviting soft seating, power hubs, and easily accessible storage, wellness environments encourage busy students to relax and recharge so they can hit the books with renewed energy later.

Reading Room

For imaginations to take flight, students need spaces that allow them to go at their own pace. By creating subject specific hubs designed to support personalized learning, valuable connection and engagement is within everyone's reach.

STEAM

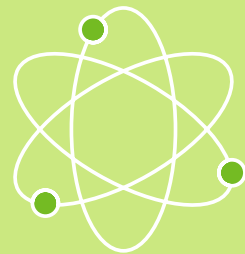

Spark their imaginations! Exploration stations invigorate the learning environment and let students participate in unique, creative and hands-on ways. Our multi-height Build Makerspace tables are fun, full of storage and collaboration-friendly. Because teamwork isn't just good for them today—it's a lifelong skill that future leaders need, too.

STEAM

STEAM—an experiential learning approach that uses Science, Technology, Engineering, the Arts, and Mathematics to guide critical thinking—requires spaces that encourage problem-solving and collaboration. With smart storage for easy accessibility, mobile workstations to foster connection, and sturdy, easily cleanable seating and surfaces, any STEAM environment can put student success on the map.

Flexible classrooms with movable furniture can be arranged to facilitate diverse activities and groups of various sizes. Increased opportunities for students to work in groups engenders more frequent, and higher quality relationships with their peers.⁶

Using creativity and hands-on activities, Exploration Stations reinforce lessons by appealing to students' natural curiosity. Students work on personal projects of their choice, which helps improve independent thinking skills, process-based problem solving and visual communication.

Art

Self-expression through creativity is vital to a well-rounded curriculum. An art room is essential for confidence, connection, and individuality. Special attention to vibrant color, ample storage, and mobile seating helps open imaginations while encouraging movement and kinesthetic engagement.

Deck out your table or storage with optional Fuse™ accessories or SmartLink storage bins for all the accessory options!

Music

Music opens minds and hearts. A designated space that celebrates and encourages vocal and instrumental education is imperative to a well-rounded curriculum. Equipped with supportive, mobile seating and ample, durable storage, music rooms give students of all abilities a unique opportunity to express themselves creatively during and after school.

 A learning environment that is flexible and welcoming enables students to find their place within the classroom, promoting a sense of psychological safety and empowerment. Relaxed students are more able to focus on instruction, and empowered students are more inclined to stay engaged.⁷

Utilize the Stacking Cart for easy moving and storage!

Social Spaces

Learning happens everywhere! Big ideas and bold dreams. Let's make room for them. Beyond teacher-led instruction, it's important to provide a variety of spaces that foster discovery and collaboration.

Knowledge Center

Flexible spaces that streamline student engagement help amplify a comprehensive school experience. Creating a safe and comfortable environment with solutions designed to connect people and places promotes meaningful communication, making the most of both scholastic and social interactions.

Spaces designed to be flexible allows educators to engage students in the way each of them learns best. Students who learn best through reading/writing will likely be seated, while kinesthetic learners may be on their feet. Auditory learners might be engaged in a group discussion, and visual learners could be watching videos on the subject being taught.⁸

 Be sure to include access to outlets and charging stations for digital technology. A variety of postures, equipment, technology, and dedicated spaces to choose from is very empowering, in terms of students' recovery, and ultimately their academic success.⁹

Study Hall

Schools of all sizes have moved beyond basic study hall rooms. Instead, educators are leaning into spaces that not only encourage students to hit the books, but also collaborate on group projects, engage in tutoring sessions, and more. With dynamic seating equipped with power hubs and work surfaces, study hall areas can foster growth, connection, and year-long academic success.

Media Center

Media centers are the heartbeat of both the school and the community—they encourage connection and creativity for people of all ages and experiences. Comfortable nooks and thoughtful collaborative environments supported by dynamic, multifunctional furniture solutions help bridge the gap between people and places.

One recent study indicates that in schools with a full-time, certified librarian, nearly 8% of students scored Advanced on their reading assessments. Schools with full-time librarians also had fewer students score below the Basic level than those without librarians. And this proportional difference continued through high school.¹⁰

Computer Lab

The purpose of a computer lab goes far beyond surfing the internet—it encourages students to learn vital digital skills that are imperative to today's evolving workforce. From experimenting with software applications to learning programming languages (and more), these innovative environments tap into future success and connect students beyond the classroom.

Connected Learning reflects the growing use of technology in the classroom via desktop and laptop, AR/VR activities and “M-learning” using mobile devices. Through a mix of teacher-led instruction and self-directed learning, students learn the safe, appropriate use of technology.

Esports

Although relatively new in concept, Esports environments have seen rapid growth in K-12 education. Designed to promote social and emotional skillsets, strategic thinking, technology awareness, and creative collaboration, a dedicated Esports space allows students to practice, problem solve, and play competitively in a fun, safely monitored environment.

Collaborative learning plays a significant role in the development of social interaction skills, which parents drawn to charter and private schools cite as an important factor in their choice. Soft seating options, or an arrangement of cushions, are conducive to brainstorming sessions and group discussions about your team's project.¹¹

Administration

What can thoughtful design do for you? The answer is...a lot! A carefully planned space creates a welcoming environment for students and parents—and it makes room for school staff to carry out the day-to-day business of helping each student be successful.

Utilizing common spaces is also a perfect way to encourage the anytime, anywhere learning that the ubiquity and portability of mobile devices makes possible.^[i] Booths or benches along the wall offer a place for students to set their books down when inspiration strikes and do a quick search for information related to a project they're working on.¹²

Welcome Spaces

Whether you're a student, a staff member, or a guest, the first space you see in a school sets the stage for what comes next. A warm, cheerful communal environment designed to put people at ease fosters comfort and trust when it matters the most.

Administration Office

One of the most high-traffic spaces in the school is an administrative office. Often a conduit for parents, teachers, and staff alike, these spaces require a lens on efficiency and trust without sacrificing soothing aesthetics and easy comfort. Soft seating, accessible surfaces, and a clean, seamless workflow are key to any smart administrative space—large, small, or in-between.

Establishing trust among students is key. The learning environment can support trustworthiness and transparency with clearly defined spaces designated for specific types of activities. Consistency and organization help students understand where to go for various tasks, so there's no stressful confusion or surprises.¹³

Principal's Office

Every school principal deserves an efficient, well-organized private sanctuary designated for both solo projects and discreet meetings with parents, teachers, and students. With dynamic task seating, tech-savvy desking solutions, comprehensive storage, school leadership can be supported with substance and style.

?

Environments that offer choice and allow students' voices to be heard promote a sense of psychological safety, which in turn allows students to relax and focus on instruction. 70% of public schools report an increase in the number of students seeking mental health services at school since the beginning of the pandemic.¹⁴

Guidance Counselor's Office

From navigating future academic steps to offering emotional and social support, guidance counselors are a beacon of trust for students within the school. An office environment designed to foster well-being, confidence, and comfort is key. With soft seating, sensory-sensitive fabrics and color—plus ample storage to help accommodate a wide variety of needs—any school can create a designated safe space that encourages ongoing academic and social success.

With mental health concerns in students on the rise, adding psychologists and counselors is one means of support. Weaving social and emotional learning (SEL) into instruction is another, principles that develop healthy identities as well as skills to manage emotions, cultivate empathy, and establish supportive relationships.¹⁵

Teacher's Lounge

Teachers need a place where they can relax and recharge, collaborate with peers, or simply engage with other adults. Lounges should be inviting, with couches and tables. They should offer individual soft seating as well, so teachers can find a place that works for their needs in the moment.

Nationally, teacher turnover in public school districts costs upwards of \$8.5 billion each year. Bearing this in mind, supporting educators' well-being is a key strategy for superintendents to improve teacher retention and reducing attrition.¹⁶

Product Spotlight

Limitless potential is the hallmark of a great classroom. We believe in empowering the big thinkers and leaders of tomorrow, and it starts with furniture that makes your space the best it can be. With our comprehensive offering built for active and engaged learning (and crafted for quality and durability), there's nothing you and your students can't accomplish.

Student Chairs

SmartLink®

SmartLink Seating progresses with learners as they grow, from kindergarten through high school!

Product Features

- Keep books and supplies neatly tucked under select heights with an added wire storage basket
- Casters available for added mobility and ease of moving on select heights
- Place cantilever chairs on top of the desk for easy cleaning, while rubber stoppers prevent scratches on the work surface
- Chairs and Stools stack 5-high allowing for more space
- Powder coated legs are scratch-resistant for durability where it matters most
- Passing the pressured map test to ensure maximum comfort through the day

SmartLink Counter-Height 4-Leg Stool
Available in 24"H to fit table heights around 36"H

SmartLink Café-Height 4-Leg Stool
Available in 30"H to fit table heights around 42"H

Supports students sitting in multiple different positions for comfort - front, back, sideways

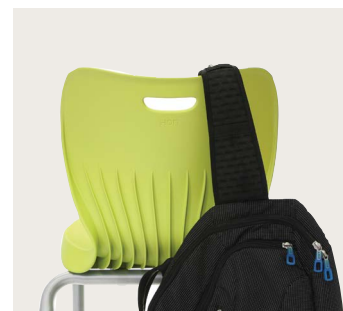

SmartLink 4-Leg Stacking Chair
Available in 6"H

SmartLink 4-Leg Chair with Book Basket
Available in 12", 14", 16", 18"H

SmartLink Cantilever Chair
Available in 14", 16", 18"H

Contoured back shape keeps bag from sliding off and built-in handle for ease of moving.

SmartLink Task Chair
360-degree swivel and casters

SmartLink Task Stool
360-degree swivel, casters and an adjustable footring

Student Desks

SmartLink

Lightweight, easy-to-move desks enable on-the-spot collaborative learning, which helps students develop interpersonal skills as they work together to solve problems.

SmartLink Rectangle Desk
Adjusts from 23-33"H

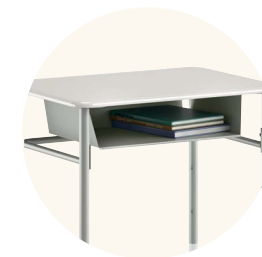

SmartLink Triangle Desk
Adjusts from 23-33"H.
Also available in a fixed-height option

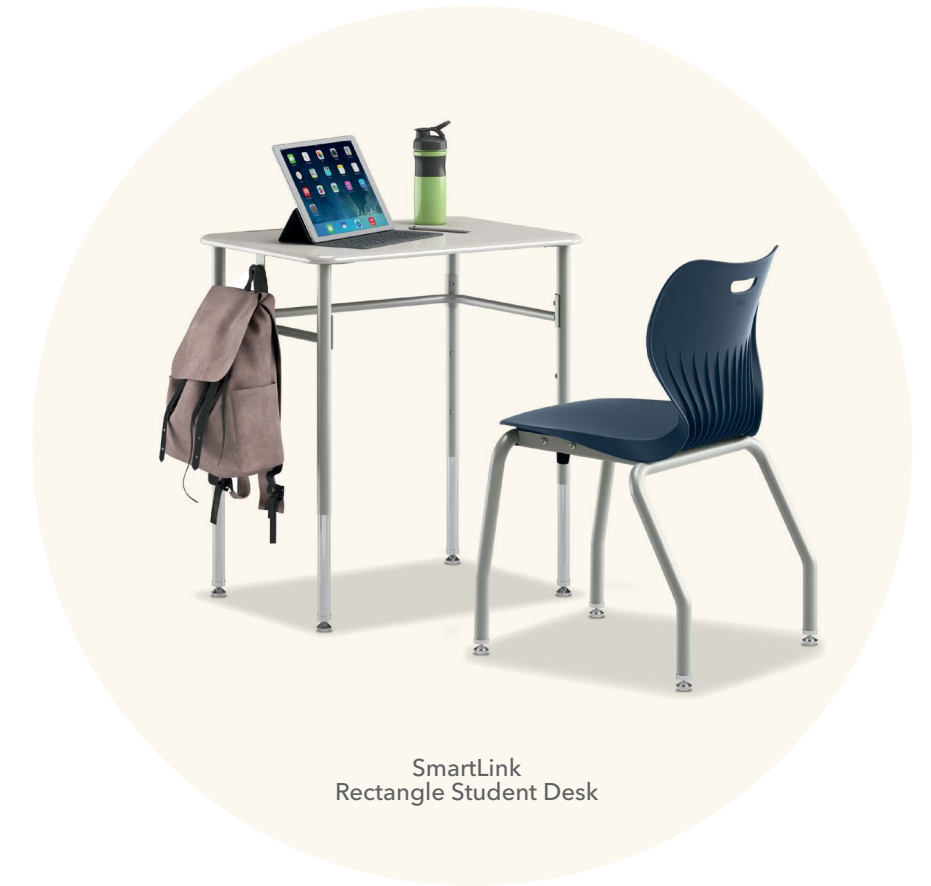

SmartLink Sit to Stand
Converts from 30" seated-height to 43" standing-height

Backpack Hook
Add this optional hook to keep backpacks off the floor

Book Box
Optional storage space keeps the desk area neat and organized

SmartLink Rectangle Student Desk

One desk to support left-or-right handed users

Product Features

- Unique shape that allows teachers to get creative with multiple layout options
- Glides allow for easy mobility and movement of desks
- Hard plastic tops include pencil grooves to keep writing utensils from rolling away

Build™ Desks

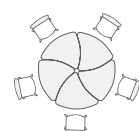

Attentive listening. Idea sharing. Learning comes in many forms, and your classroom needs the flexibility to support them all. Build student desks are designed with unique top shapes that allow them to adapt to changing needs throughout the day. With countless combinations, you can choose the right shape, size and finish to fit any space, aesthetic and budget.

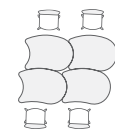

Fin

40"x20"

Product Features

- All legs adjust from 22"-34"H
- Lightweight and a breeze to move
- Lots of flexible configurations with the unique shape options
- Optional whiteboard finish to let the ideas flow
- Backpack hook and book box to keep items and materials organized

Book Box Bracket with SmartLink 3" H Bin

Backpack Hook

Student Tables

Build Tables

Projects. Hands on activities. Study sessions. Today's students are learning together, working in groups and interacting like never before. Let imaginations run wild with these Table and Makerspace solutions to support all the big ideas.

Product Features

- Endless options to reconfigure classrooms for flexible learning
- Add casters for mobility
- Optional whiteboard finish to let the ideas flow
- Backpack hook and Book Box Bracket + Bin to keep items and materials organized

Build Makerspace

What does innovation look like? Well, it can be messy. And colorful. But most of all, it should be fun. Build Makerspace tables are ideal for constructing, crafting and letting the imagination run free. They're durable, configurable and made for inspiration.

Build Makerspace Seated Height
42"x60" or 42"x72"

Build Makerspace Counter Height
42"x60" or 42"x72"

Build Makerspace Standing Height
42"x60" or 42"x72"

Build Makerspace Seated Height Stool

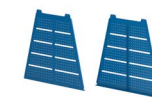

Build Makerspace Standing Height Stool

Product Features

- Tested beyond standard requirements to meet the needs of any Exploration Station assignment
- 42"D top is designed for easy removal and reassembly for moving throughout doorways
- Rounded corners are gentle on arms and active bodies moving around to explore
- Stools are lightweight and easy to stack while it has a convenient handle for quick rearrangement
- Lightweight and easy to stack, stools feature a convenient carry handle
- Available in Laminate or Butcher Block

Build Accessories

Slotted Pegboard End Panels
Optional for seated-, counter- and standing-height tables

Solid End Panels
Optional for seated-, counter- and standing-height tables

Shelf and Dividers
Optional for standing-height tables

SmartLink Storage Bins
Optional for standing- and counter-height tables

Fuse™ Hanging Accessories
Optional for seated-, counter- and standing-height tables with slotted pegboard end panels

Product Features

- Slotted pegboard end panels to hand additional storage. Pair with Fuse hanging accessories to outfit your entire space
- Solid end panels provide added modesty, a magnetic space along with an optional whiteboard finish option for more space to brainstorm
- Shelf and dividers to provide spaces for SmartLink storage bins to keep materials stored for easy access
