

ENGINE BESTPRICE

Engine BestPrice helps portfolio companies book hotel rates with confidence by protecting against overpayment. If a lower qualifying rate is found after booking, Engine issues the difference as travel credits.

GAIN PEACE OF MIND. ALWAYS GET THE LOWEST AVAILABLE RATE.

Reduce Price Leakage

Book the hotel you need through Engine without second-guessing rates. If a lower qualifying price is identified after booking, submit a BestPrice claim to recover the difference.

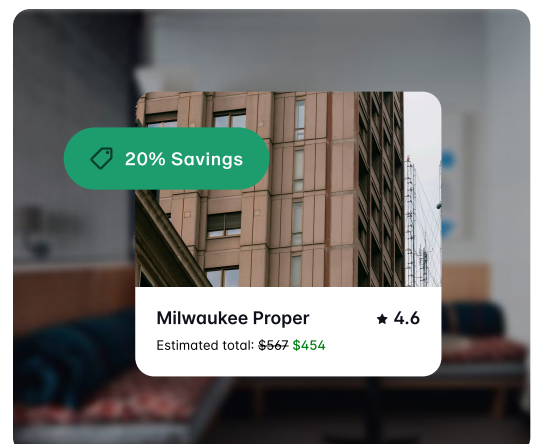

Clear Claims Process

Engine BestPrice uses a defined process and transparent terms, making it easy for finance or operations teams to recover value when rate discrepancies occur.

This ensures hotel bookings made through Engine are protected against overpayment. When a lower qualifying rate is verified, the difference is issued as travel credits after the stay, helping reduce unnecessary travel spend.

SIMPLE CLAIM PROCESS

1. Book your hotel room through Engine.
2. If you spot a lower qualifying rate within 12 hours of booking, submit a claim with a screenshot or official documentation of the lower price.
3. Once verified (claims are reviewed within 3 business days of submission), you'll receive travel credits for the price difference after your stay.

For further details, refer to the [terms and conditions](#). To submit a claim or ask a question email bestprice@engine.com.
