Climate change is undeniable. And reversible. Our mission is to prove it. Join the #ClimateTakeBack and help create a climate fit for life.

GET CONNECTED

WITH FLOORING FOR EVERY SPACE ACROSS CAMPUS

Choosing the right flooring for your university or campus shouldn't be a challenge, so we're making it easy to find just what you need. Our integrated system of carpet tile, LVT and nora® rubber offers the best of hard and soft surfaces working together as a system to create areas for collaboration or individual work, wherever students work, play or live. We've even noted which products are QuickShip to easily identify the best options for quick turnaround projects.

SCAN FOR MORE CONTENT

Scan the QR code to learn more about how Interface flooring can help you create beautiful, more sustainable education spaces.

“DOES IT COME IN OUR SCHOOL COLORS?”

TO SUPPORT YOUR UNIVERSITY'S SUSTAINABILITY MISSION, ASK TOUGHER QUESTIONS OF YOUR FLOORING PARTNER.

“What is your carbon profile?” is a great place to start. Flooring can be one of the largest contributors to the carbon footprint of your higher education facility's interior renovations. It can also be one of the largest volumes of waste you send to the landfill if you don't have a recycling plan. By harnessing your purchasing power and specifying Interface flooring products, you can create a modern, flexible learning environment, manage the bottom line, and contribute to helping restore the health of the planet.

Interface® for higher education

YOUR INSTITUTION'S IMPACT ON THE ENVIRONMENT **STARTS AT THE GROUND FLOOR.**

Interface carpet tile, LVT and nora rubber flooring products are carbon neutral across their full product life cycle through our third-party verified Carbon Neutral Floors™ program.

REDUCE WASTE THROUGH OUR REENTRY® PROGRAM

- Discarded carpet accounts for five billion pounds of landfill waste in the U.S. each year.
- Interface's ReEntry program positions us as the only flooring manufacturer that has a 3rd party certified, closed-loop recycling program, through which we take back Interface carpet tile and Sound Choice™ LVT products.
- Our Construction Waste Take-Back Program also makes it possible to return waste and scrap material from new installations of nora® flooring. That material can be reused in the production of new nora® floor coverings, down-cycled into other products or used to generate energy.

CHOOSE HEALTHY PRODUCTS FOR A HEALTHY LEARNING ENVIRONMENT

- Interface carpet tile, LVT and nora rubber flooring offer increased acoustical benefits that reduce unwanted noise, which can improve academic performance and fosters better behavior among students.
- Interface flooring products are 3rd party certified for low VOC emissions, contributing to better indoor air quality.

YOUR Design Partner

We make finding design solutions easier with Interface Design Studio. These expert designers know Interface products inside and out—and their services are complimentary. From concept to completion, they can work closely with you to create distinct designs that meet your vision and budget no matter how large or small the project. Plus, the to-scale floor plan layouts can project overall waste and act as an installation guide for the flooring contractor. Just contact your Interface rep to get started.

A SOFTER

HARD SURFACE

Flooring that's so durable it can last for decades—and still look good—is a must-have for any educational environment. nora® rubber does just that and more.

- Works together with our carpet tiles and LVT products for a flooring system that performs in virtually any space on a university or campus
- Dimensionally stable and installs over most subfloors
- Non-porous, highly dense surface of nora rubber creates a long-lasting floor that cleans easily with little more than water
- Doesn't require coatings and scratches can be remediated
- Highly resistant to chemicals and stains
- nora technical services available for consulting before, during and after installation
- Offers impact sound reduction of up to Δ IIC 21
- Contributes to better indoor air quality
- Third-party verified Carbon Neutral Floors™
- nora® nTx floor covering with self-adhesive backing is easily installed as a part of renovation or new construction, even in areas of high level residual moisture

HARD ON TRAFFIC

SOFT ON NOISE

Interface's Sound Choice™ LVT offers high-performance resilient flooring in patterns and colors that range from "on-campus" professional to "off-campus" fun.

- Works as a system with our carpet tiles and nora® rubber
- Available in 25 cm x 1 m planks and 50 cm x 50 cm squares
- Ceramor™ coating provides a durable finish that resists scuffs and scratches
- Offers impact sound reduction of up to Δ IIC 19
- Optimal dimensional stability and flexibility thanks to an incorporated fiberglass layer
- Offers ease of installation and maintenance
- 39% recycled content
- Recyclable through our ReEntry™ program
- Third-party verified Carbon Neutral Floors™

Interface® for higher education

THE SOFTER SIDE

OF HIGH PERFORMANCE

Our modular carpet is everything you love about soft flooring with the flexibility of tile. We've been perfecting it for more than 40 years.

- Extensive selection of patterns, colors and sizes that work as a system with our LVT and nora rubber
- Dense construction with premium nylon fibers holds up to heavy traffic
- Solution dyed fibers withstand harsh substances like bleach or hand sanitizers
- Structured, dimensionally stable backing system keeps tiles in place and flat on the floor
- Ease of installation and replacement with our glue-free TacTiles™ installation system
- Intersept™, our proprietary preservative, is permanently incorporated into the backing to protect carpet tiles against mold growth and odor—even at the seams
- Interface's i2™ styles have mergeable dye lots that allow for selective replacement, reduce the need for attic stock, and many install nondirectional, reducing installation waste to just 1.5%
- Our CQuest™GB backing offers superior performance with a lower carbon footprint. CQuestGB is made with post-consumer carpet tiles, bio-based additives, and pre-consumer recycled materials, resulting in a carbon negative backing
- Recyclable through our ReEntry™ program
- Third-party verified Carbon Neutral Floors™

CQuest™GB

ALL THE EXTRAS

FROM ENTRYWAYS TO STAIRS AND MORE

When we say we have an integrated system of products for EVERY space, we mean it. That includes walk-off products for entryways, nora® stairwell solutions, and a range of accessories for norament® and noraplan® floor coverings to complete the perfect floor.

Interface Walk-Off Carpet

- Unlike most walk-offs, ours can be cleaned just like carpet, making it ideal for entryways and high-traffic areas
- Stiff fibers in our Step Repeat™ Collection styles grab dirt and debris before it's tracked inside, trapping it until it can be vacuumed later
- Interiors stay fresher, creating a better indoor environment with reduced maintenance

nora Stairwell Solutions

- Fast installation with decades-long endurance of heavy traffic
- norament® stairtreads offer a pre-shaped stair nosing, riser and tread all-in-one piece
- nora® stair nosings with a slide-in lip for installation on all types of staircases—for use on noraplan/norament floor coverings with a smooth or hammered surface
- nora® visually impaired strips offered in smooth or textured surface, available in different colors, including a photoluminescent option

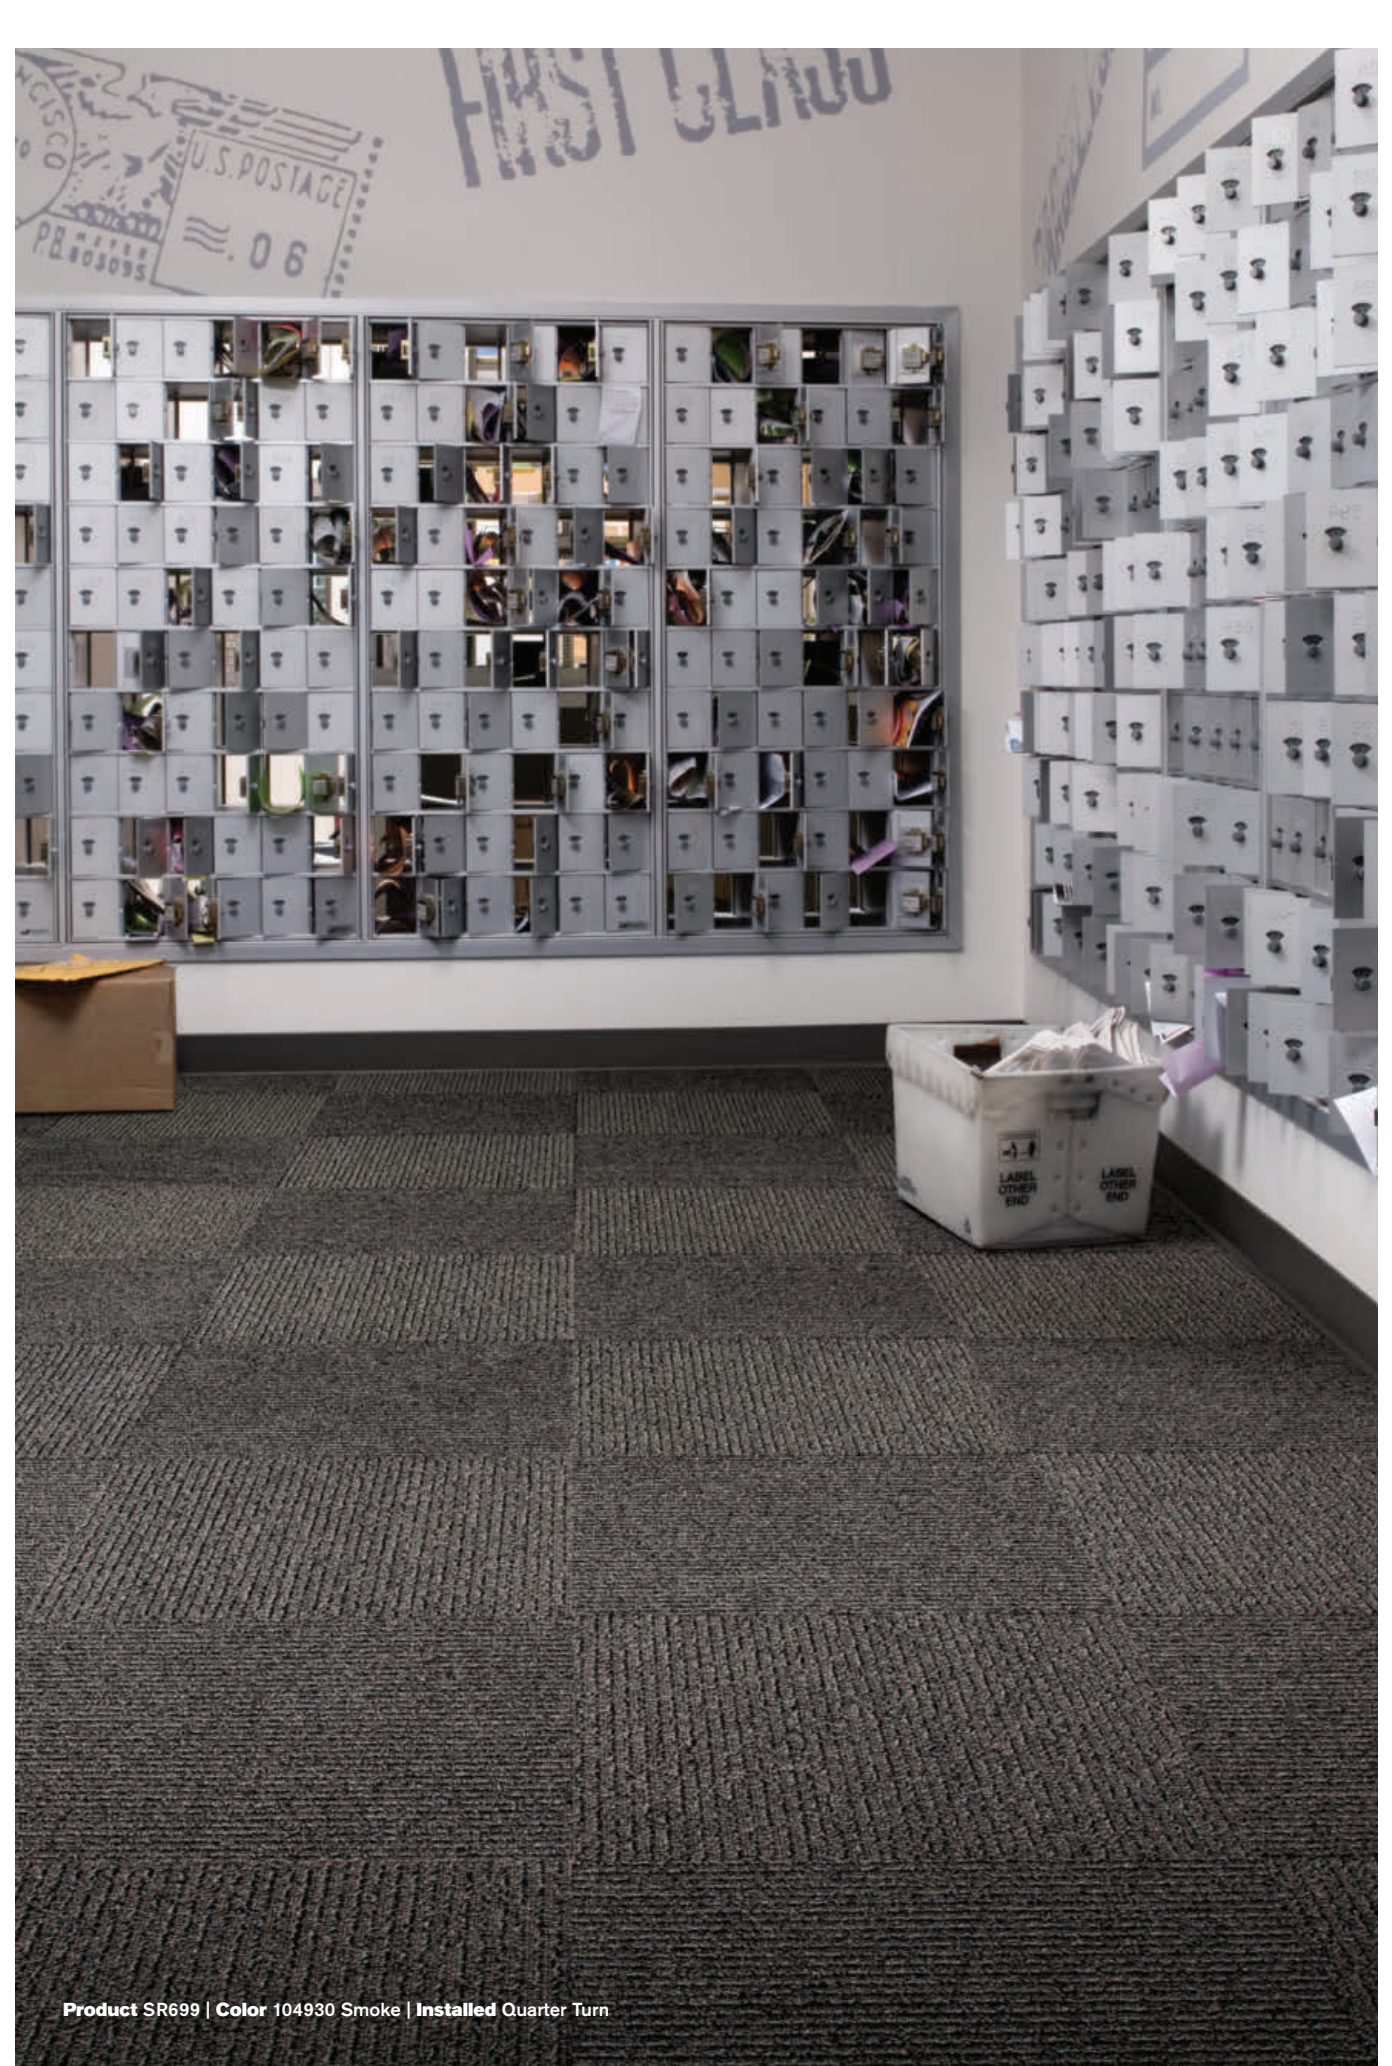

nora Accessories

- nora® wall base adds that final touch to your installation
- Joint sealing when needed with nora® heat weld or nora® cold weld
- High-quality installation materials tailored to nora rubber

Rubber Product norament® grano stairtreads | Color 5329 Bergamot

nora® Flooring Accessories

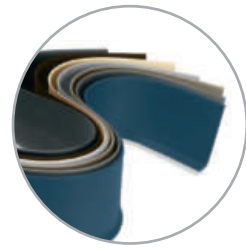

nora® heat weld

nora heat weld was developed for use with noraplan® flooring. nora® heat welding is recommended when the nora® flooring has been installed in rooms with continual and intensive wet cleaning, in areas with stringent requirements for hygiene, or areas with special requirements, such as operating rooms and laboratories. Welding is required for noraplan acoustic.

nora® cold weld

noraplan and norament® floor coverings do not need to be sealed because they do not contain any plasticizers. Thus, there is no shrinkage after installation. It is recommended to seal the joints (seams) in areas with intensive and continual wet cleaning, in labs or other areas with specific hygienic requirements for a dense, homogeneous surface.

nora® wall base

Delivering a consistent height and toe dimension you can depend on, nora wall base exudes a professional appearance that adds that final touch to your installation. If the color you need is not already available, nora wall base can be custom color matched to any floor, wall, fabric or paint swatch.

Interface®

TacTiles Installation System

Just peel, pull and stick tabs for a hassle-free, floating and durable carpet tile installation. No mess, no drying time and little, if any, future floor prep. And TacTiles connectors can be recycled right along with Interface carpet tiles.

Adhesive: XL Brands 2000 Plus (2500 Plus in Canada) for 4.5 mm Sound Choice LVT and carpet tile

This releasable, water-based, spread adhesive is available for our carpet tile and LVT and contains our proprietary antimicrobial preservative, Intersept™, for enhanced protection against mold and mildew.

Adhesive: XL Brands HM99 for CQuest™Bio and CQuest™BioX backing systems

This high moisture adhesive is a high-strength, high-tack adhesive for installing Interface ReadyBac™ modular carpet tile and Interface LVT over porous substrates. The unique adhesive offers extended open time, fast dry time and ease of application.

nora® Adhesives

nora® AC 100

nora AC 100 is an easy-to-use, wet set, water-based acrylic adhesive that has been specifically formulated for the installation of specific nora rubber floor coverings (2mm-4mm) on absorptive substrates.

nora® PU 102

nora PU 102 is a two-component urethane adhesive designed specifically for the installation of specific nora® rubber floor coverings on suitable substrates. When parts A & B are thoroughly mixed together, they form a reactive adhesive that cures to a tough, flexible film with a good resistance to surface moisture and many chemicals. Speak with a nora® representative before selecting your adhesive to confirm the suitability for your project.

nora® ED 120

nora ED 120 is an easy-to-use, fiber-reinforced, wet set, conductive, water-based acrylic adhesive that is specifically formulated for the installation of specific nora ED rubber floor coverings (2mm-4mm) on absorptive substrates, so be sure to consult a representative first.

nora dryfix™ 750

nora dryfix 750 adhesive tape provides you with a safe, cost- and time-effective alternative to conventional flooring adhesives. There is no mixing or adhesive clean-up necessary, and it allows for immediate traffic upon completion of installation.

nora® stepfix 240

Specifically developed for norament® stairtreads, nora stepfix 240 adhesive tape makes installing stairtreads quick, clean and easily manageable—making them the optimum solution. With nora stepfix 240, you can easily dry-fit the tread right on the covered adhesive tape, and stairs can be walked on immediately following installation. On stairs with round nosings, use nora® metal repair stair angle and/or nora® epoxy stair filler to fill the void.

REDUCE YOUR CARBON FOOTPRINT THROUGH THE MATERIALS YOU SELECT

—AND THE PARTNERS WITH WHICH YOU WORK.

As you consider your university's sustainability mission, who will best support your goals? You need more than a flooring provider. You need a partner. Flooring is such a critical capital investment—and the cost can be far greater than just the monetary investment, given just how much environmental impact is generated from an organization's operations. By choosing Interface, you're selecting a single-source solution that will not only help you reduce your overall carbon footprint, but also lower the total cost of ownership over time. Stand out from other higher education institutions by giving your faculty and students something to stand for with something better they can stand on.
