Permits Managed.
Enforcement Solved.

iParq's permit management and enforcement system provides a virtual front counter for permit sales and an administrative system for complete back-end control.

# Permit Management Module
Access granted-anywhere, anytime.

iParq's cloud-based permit management module gives community managers full control of the property's parking, including individualized permission-based permitting.

Parking Managers will receive a customized online portal, specific to their operation, that allows for permit applications and pre-approved permit orders. All permit information is *automatically* communicated to the enforcement devices.

Parkers can glide through an easy-to-use online portal to request access and receive digital parking permits. Physical parking permits will be automatically mailed if necessary, whereas virtual permits will be assigned and ready to use, in real-time.
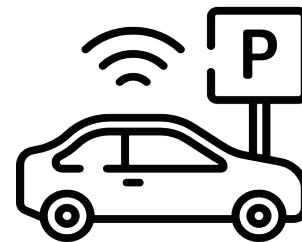

Features

- Manage all virtual and physical permit sales online
- Sell an unlimited variety of permits
- Accept online payments through a PCI-Compliant portal
- Permit inventory tracking and control
- Secure online administrative access
- Unlimited number of administrators
- Detailed audit trail/permit tracking
- Easily integrated with existing systems
- Robust and easy-to-use reporting tools
- Custom branded landing pages
- Intuitive design for self-service
- Dedicated customer support
- Average 99.9% uptime
