- ◆ What differentiates your company from competitors?
 - ▶ Unlike many of our competitors KM International offers a wide array of products pertaining to the road maintenance industry. As you can see in Tab 5 under the products section KMI has a wide range of products all pertaining to the road maintenance industry. KMI feels being able to meet customers needs and have several product offerings enables us to offer turnkey solutions to an assortment of issues municipal organizations face.
 - ▶ Additionally, KM International has a plethora of knowledge and expertise in the field and we feel this is extremely important when assisting customers in identifying their exact needs and recommending different pieces of equipment. The equipment is only one part of a successful customer interaction, every single KM employee believes in fully educating our customers when it comes to machine usage, functionality, service, and maintenance, and most importantly the processes KM's equipment enable. KMI make a concentrated effort to listen to our customers' needs and solutions whether it be equipment wise or just general practices.
 - ▶ KM International has built a highly touted industry reputation for manufacturing innovative and dependable equipment that will stand up to the everyday wear and tear of the road maintenance industry. Because of the well thought out design of KM's equipment maintenance costs are traditionally 1/3 of our competitors and downtime is often nonexistent.

- ◆ Describe how your company will market this contract if awarded.
 - ▶ As a current NCPA vendor KM International uses the NCPA logo and contract information in all our municipal marketing initiatives. KMI has a comprehensive marketing plan as it relates to municipal organizations. KMI utilizes online campaigns such as Google AdWords, content marketing strategies, and banner advertisements on notable website such as The Municipal

and National League of Cities websites. KMI runs regular print advertisements in trade magazines such as the APWA Reporter, American Infrastructure, The Municipal, and several other regional trade publications geared towards municipalities organizations. KMI always includes the NCPA logo and our individual contract information to create awareness and if awarded we would continue to do this. KM International also attends national trade shows such as PWX and the APWA Snow Show which are both held annually. KM International distributors also attend dozens of local municipalities shows a year.

As municipalities continue their shift to cooperative purchasing programs our sales representatives are trained to ask during the fact-finding process with potential customers how they plan to purchase, and this is when we typically introduce the NCPA contract and walk them through the process. We have had great success with this in the past and been able to really familiarize customers with the NCPA.

- ◆ Describe how you intend to introduce NCPA to your company.
 - ▶ As a current NCPA contract holder KM International employees and distributors are familiar with our NCPA contract and how it is utilized in the governmental sales process. As the equipment manufacturer and contract holder KMI continually pushes the use of our NCPA contract to our distributors and have empowered all of them to use it in their governmental sales process.

- ◆ Describe your firm's capabilities and functionality of your on-line catalog / ordering website.
 - ▶ KM International has a fully functional website that allows users to conveniently browse all equipment and options KM International offers. Because most of KMI's units are highly customizable we do not offer online ordering for equipment. KMI does however offer online ordering for a wide array of parts. Quotes/Estimates for equipment can be requested through the KM International website and are sent to KMI's dedicated sales teams to contact the prospective customer and provide a quote.

- ◆ Describe your company's Customer Service Department (hours of operation, number of service centers, etc.)
 - ▶ KM International employs 4 full time service technicians at our headquarters in North Branch, MI. Service requests are initiated either via email or from call from the customer. It is then determined whether the unit was purchased factory direct from KM International or if the unit was purchased from a KMI distributor. All KMI distributors employ at a minimum one trained KM service technician so if a unit was purchased from a distributor, we typically recommend the customer contact the distributor first. One of the determinations of where the machine was purchased from the troubleshooting process begins. A service technician will do some fact finding of the issues the customer is having and then take the customer through a short checklist of troubleshooting steps. Once the service technician has diagnosed the issue, they will offer potential solutions. If the determination is made that a part has malfunctioned, then that parts order will be processed and sent out to the customer. KM distributors keep minimum stock levels of common "consumable parts" so that they can be delivered to customers in a quick and

timely manner. KM International also houses minimum inventory levels of all parts at our factory in North Branch, MI and those can be shipped same day in most scenarios.

KM's internal parts and service department is available from 8am-4:30pm EST Monday through Friday. Service technicians can be reached via email 24/7 and will respond to request at their earliest convenience. Much of the time KM service technicians will provide customer with their direct cell phone numbers as well in the event there is an after-hours emergency.

Most of the time service issues can be easily resolved over the phone or via email. In the rare instance a service technician is unable to diagnose and fix a unit over the phone arrangements for an onsite visit or transportation to the closest distributor or KM International headquarters can be arranged.

To that effort we ask respondents to provide their companies environmental policy and/or green initiative.
 - Asphalt is the most recycled product in the world and KM Internationals' entire equipment line perpetuates asphalts recyclability.
