Flexibility and Style

In addition to being specifically designed for easy specification and simple, quick installation, Etarran is focused on providing the necessities. From straightforward electrical components and effortless connectors to flexible storage configurations and multiple leg designs, this panel system sets the bar high and delivers.

Create Spectacular Spaces

Etarran adds confidence and style to any work hub by offering just the right amount of design flexibility, welcoming comfort, and durable components. With a spectrum of surface material options and metal paint colors, Etarran has the functional features and aesthetic elements to outfit any floorplan with ease.

Thought Starters

Inspire interaction while providing individual spaces.

Versatile and Convenient

From open configurations to those that offer more privacy, Etarran's flexible design accommodates all. Incorporate adjustable height worksurfaces and storage components to add more personalization.

Etarran's flexibility makes it easy to design workstations that provide privacy.

Accomplish it All

With Etarran, create the right setup for any situation. From single person touch down stations and work spaces to areas that invite collaboration and interaction, utilize Etarran to define spaces for a variety of activities.

Create reception stations that welcome guests and encourage collaboration.

Enhance Your Experience

Utilize Etarran’s comprehensive statement of line and built-in electrical capabilities to outfit open plan areas that make sense. Add stackers or storage units to design a highly functional and personalized space and utilize a variety of leg options to complement your style. Etarran allows you to create spaces for maximum functionality without compromising style.

Etarran’s frames are available in six widths and five base heights. They can be built up to 80" tall by adding a 12"H Stacker.
