

Choose the right disinfectant to reduce your people's risks

Many disinfecting wipes carry chemicals with toxicity levels that can trigger contact dermatitis, asthma and more.¹

Powered by hydrogen peroxide, WypAll® Disinfecting Wipes effectively kill pathogens like norovirus, Staph and MRSA[†] while meeting the lowest human impact levels for ingestion, inhalation, eye and skin contact.²

1 Quaternary Ammonium Compounds in Cleaning Products, Health & Safety Information for Health Professionals, 09/2015 https://www.mountsinai.org/files/MSHealth/Assets/HS/Patient-Care/Service-Areas/Occupational-Medicine/OACsInfoforPhysicians_18.pdf

2 Category IV formulas meet the lowest EPA-defined toxicity levels for ingestion, inhalation, and eye and skin contact (e.g., WypAll® Disinfecting Wipes)

3 Hydrogen Peroxide breaks down into water and oxygen after several days, depending on the conditions

4 WypAll® Disinfecting Wipes are eligible for recycling through the RightCycle by Kimberly-Clark Professional® program that diverts wipes from landfills, transforming them into new goods as long as they are non-hazardous as classified by federal, state, and local regulations

5 Based on canister configurations listed on .com sites as of Dec. 2023. High count is defined as at least 2x the number of wipes in a common 75ct. canister, i.e., 150 wipes or greater

† Staph refers to *Staphylococcus aureus*, MRSA to Methicillin Resistant *Staphylococcus aureus*, E. coli to *Escherichia coli*

* Based on publicly available on-pack label information for each denoted EPA registration numbered product as of Dec. 2023
