

KONICA MINOLTA

Powering Your Digital Transformation

Available through the OMNIA Partners GPO Program

Intelligent Automation

Designed to increase workflow efficiency, storage, security, and compliance by automating manual processes.

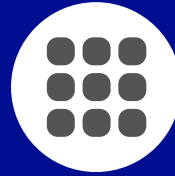

Records Scanning

Convert physical documents and other records into digital content to be utilized by business applications and free up space.

Content Management

Seamlessly integrate critical business applications, ensuring your documents are accessible and secure in a cloud environment.

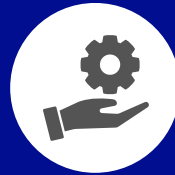

Application Development

Design and build custom applications and intranets in the M365 platform. Create data visualizations with business intelligence tools.

Device Services

From deployment to lifecycle management, streamline the processes supporting end-user IT hardware.

IT Projects

Augment IT efforts with project support, outsource low value projects that pull corporate IT resources away from high priority assignments

Physical Security

IoT cloud-based intelligent video surveillance systems, access control, and advanced analytics designed to secure high value assets, buildings and people.

Cybersecurity

Increasing organizations security posture through offensive and defensive cybersecurity services. Keep threats out, and your organization secure.
