# Supply Chain Transformation

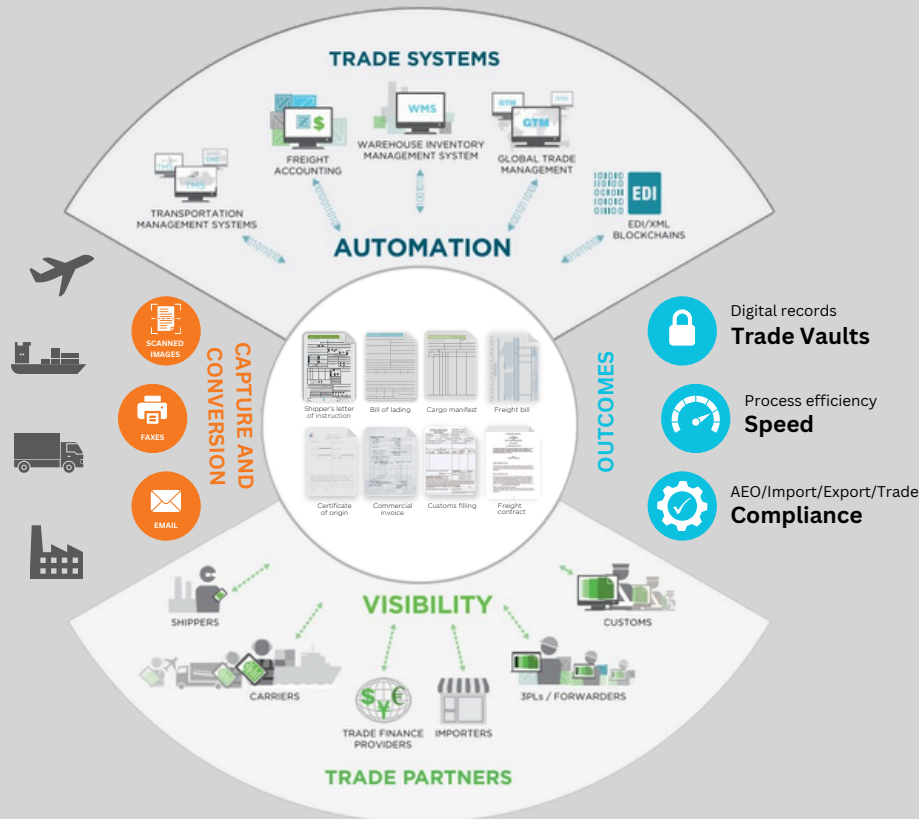

Available through the OMNIA Partners GPO Program

# Supply Chain Transformation

Transform your global trade operations with our automated supply chain solution. Eliminate manual data entry and physical document management challenges. Our system instantly captures, identifies, and digitizes transportation and trade documents from any source, ensuring timely shipments and streamlined processes.

Our flexible solution seamlessly integrates with your existing systems, offering configurable workflows to automate data transfer across all trade management platforms. By revolutionizing how you handle international transportation documents, you'll remove delays, reduce errors, and gain a competitive advantage in the global market.

Experience effortless document capture and data extraction for all types of trade documents. Say goodbye to paper-filled warehouses and unmanageable PDF folders. Embrace our advanced solution to simplify processes, boost efficiency, and elevate your global trade operations to new heights.

## INDUSTRY SUPPORT:

### Shippers:

- Manufactures
- Retail
- Petroleum and chemicals
- Food distribution
- Pharmaceutical
- Wholesale distribution
- Automobile distribution

### Trade authorities:

- Ocean port authorities
- Airport authorities
- Customs authorities
- Transportation ministries
- Trade ministries
- Rail authorities

### Logistics service providers:

- Ocean cargo importers
- Freight forwarders
- Customs brokers
- Trade finance providers
- Ocean vessel owners
- Ocean shipbuilders
- Ocean vessel services
- Motor freight carriers
- Rail operators
- Warehouses

## Logistics operations

### Freight payment and audit

Automate pre-payment audits of vendor freight invoices for accuracy against freight contract terms.

### Customer freight billing

Automate the accurate billing of freight charges with proof of delivery capture, automated invoicing and customer statement generation.

### Freight contract management

Convert rate tables into electronic freight contract documents with automatic distribution, versioning, change notices and approval records.

## Supply chain automation and connectivity

### Trade vault folders

Gather all supporting documents, data, compliance submissions and correspondences in one digital folder securely accessible to every level of your trade compliance and supply chains. Electronically transfer documents and data to customs agencies, ports, shippers and providers.

### Trade systems automation connector

Connect and automate your disparate transportation and trade IT systems, from TMS, WMS, GTM, customs single windows to smart port community systems – both internal and external.

### Advanced trade document capture

Automatically capture documents for electronic transfer into TMS/WMS/GTM/port/customs systems.

## Trade compliance

### Electronic record keeping

Securely store and manage global compliance records with full audit trails.

### Import/export clearance and compliance customer

Process controls to increase customs clearance efficiency and support AEO trusted trader programs.
