

LAWSON Products

Tru-Torq® and Tuff-Torq® Maintenance Engineered® Fastening Systems

You demand a lot from your equipment, you should expect nothing less from the fastening systems you use to maintain them.

Tru-Torq®

180,000 psi tensile strength

Tuff-Torq®

150,000 psi tensile strength

UNJ thread profile for increased fatigue resistance

20% higher head for easier wrenching than standard grade 8

Polymer coated to aid in developing consistent clamp loads

Thicker washer for increased load carrying capabilities

Tru-Torq® And Tuff-Torq® Provide Increased Consistency In Holding Strength Compared To Standard Grade 8 Fastening Systems

Tru-Torq® and Tuff-Torq® VS. Grade 8 Fastening Systems

Consistent holding strengths throughout whole application

Stress on cap screw leads to stretching & breaking

Some fastenings may have peak holding strength

Insecure holding strength

Performance You Can Rely On Only From Lawson Products

With over 30 years of service and dedication, Lawson Products Tru-Torq® and Tuff-Torq® fastening systems provide significant savings by decreasing the frequency of maintenance bolting which reduces loss of production time, idle machines, idle labor and upset production schedules.

Tru-Torq® and Tuff-Torq® Maintenance Engineered® fastening systems are stronger, more reliable, trouble-free bolted connections that are superior to original equipment design.

Choose from Lawson's Tru-Torq® and Tuff-Torq® Maintenance Engineered® brands based on your application needs and be confident knowing you've chosen the best fastener for the job.

- All assortments include the most popular cap screws, hex nuts, flat washers and lock washers
- Sturdy steel 40-hole bin(s) included for optimal inventory management
- See catalog for assortment breakdowns
