*See page 7 for shipping terms and conditions.

FALL PROTECTION TRAINING PROGRAM

Falls are among the most common causes of serious work-related injuries and deaths, and fall hazards, such as insufficient fall protection and training are on OSHA's list of top safety violations.

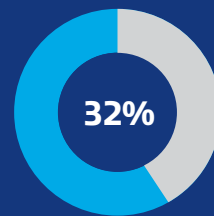

As an employer, you must do everything you can to prevent employees from falling off overhead platforms, elevated workstations or into holes in the floor and walls.

That means not only providing them with proper harnesses and fall protection, but also training them in proper safety procedures and equipment usage.

MSC OFFERS SEVERAL FALL-PROTECTION SAFETY TRAINING PROGRAMS INCLUDING:

- Fall Protection Competent Persons
- Dropped Object Prevention
- Equipment Inspection
- Fall Protection Essentials

To watch the video on MSC's Fall Protection Training Program, visit mscdirect.com/fptraining

OF ALL PREVENTABLE NONFATAL INJURIES IN THE U.S. ARE FALL-RELATED¹

880
DEATHS

DUE TO FALLS, SLIPS AND TRIPS IN 2019²

WORKPLACE FALLS: 3 CRITICAL POINTS TO PREVENT OSHA'S TOP VIOLATION

Falls are a pervasive problem in manufacturing, one with costly consequences. General fall-protection violations are by far the most frequently cited and heavily fined by the Occupational Safety and Health Administration—and have been for the past 12 years.

Manufacturers can improve their operations—and avoid OSHA citations—by focusing on three key components of fall-protection solutions: harnesses, lanyards and lifelines, and anchorage.

Body Support: Harnesses

For general work performed at height, a standard harness might be suitable, comprising shoulder straps, a chest strap, leg straps and a D-ring between the shoulder blades. For specialty work, additional harness features could be beneficial, such as integrated tool belts, additional D-rings for stability, or specialized construction materials or coatings.

Connection: Lanyards and Lifelines

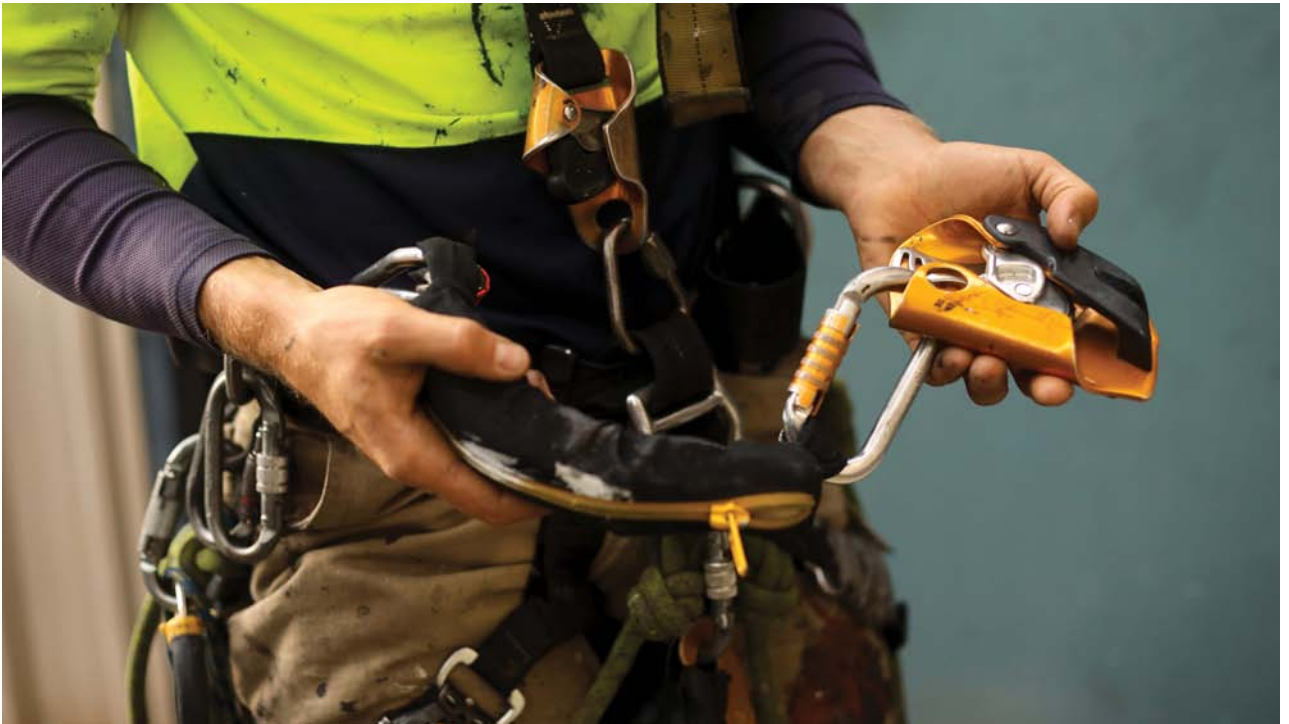

One type of lanyard is designed to prevent a fall from occurring, by limiting the worker's movements on a raised work surface and keeping the person away from a potential fall area. Another category of lanyard, which includes lifelines, is designed to stop (or arrest) a fall the instant after it occurs.

Fixed Point: Anchorage

An anchorage is the fixed point to which the lanyard or lifeline is connected and ultimately what stops the worker from falling. Both the anchorage and the anchorage connector must be independent and capable of supporting at least 5,000 pounds for each employee attached or maintain a safety factor of at least two, according to OSHA regulations.

FALL SAFETY LEADS OSHA'S TOP 10 VIOLATIONS FOR 12TH YEAR

Fines for failing to protect workers from on-the-job falls surged 25 percent to \$36.2 million in 2022, as the regulation topped the U.S. Occupational Safety and Health Administration's list of most-violated rules for the 12th straight year.

Not only is the cost of such violations increasing for employers, but fall-related accidents remain both common and deadly.

"Fall hazard violations have remained on the top of the list for so long because the hazard is present in most workplaces," Patrick Kapust told *Safety + Health* magazine. Risks range from improper use of stairways, ladders and scaffolding to unprotected floor holes and wall openings.

OSHA's top 10 list is important for employers nationwide because the trends it identifies guide safety professionals in developing solutions.

Here's a look at the 10 most frequently violated OSHA standards in 2022.

1. Fall Protection
2. Hazard Communication
3. Ladders
4. Respiratory Protection
5. Scaffolding
6. Lockout/Tagout for Hazardous Energy
7. Powered Industrial Trucks
8. Fall Protection Training
9. Eye and Face Protection
10. Machine Guarding

SAME DAY SHIPPING GUARANTEE TERMS: Provided the order is completed and received at the customer fulfillment centers before the applicable cut-off time on an operating business day, MSC will guarantee same day shipping (qualifying items placed in the carrier's hands) for any in-stock national catalog items (except machinery or items that require customized lengths, set-up or special packaging) if you are a qualified continental U.S. customer. The guarantee does not cover, and MSC shall not be responsible for, computer or electronic interruptions, mechanical or electrical breakdowns, strikes, labor slowdowns, war, terrorism, riots, severe weather conditions, natural disasters, acts of God or any other forces beyond the reasonable control of MSC, LTL shipments and other non-scheduled carriers, branch shipments (due to earlier pickups), back ordered items, replacement orders, new accounts (first order), orders requiring credit review, and supplier manufacturing deficiencies. Get it NEXT DAY: MSC will upgrade qualifying orders to Next Day Air Saver at the customer's request (additional charges may apply). The Next Day Delivery upgrade only applies to standard UPS Ground shipping orders, and does not apply to orders shipped via the Freight Saver shipping method. Orders placed Friday will be delivered on the next regular business day. Weekend delivery is available at an additional charge at the customer's request. Qualifying orders are orders 20 pounds or less, shipping to customers located in contiguous U.S., which cannot be delivered to the customer next day through our Ground Network, until 8 PM ET from our customer fulfillment centers. The Next Day Air Saver upgrade does not apply to hazardous items, back ordered items, direct ship items, branch shipments, international orders, items too large to ship air, orders requiring special labeling and any order that does not meet the terms of our Same Day Shipping Guarantee. Note: Hazardous materials require special handling and are not service level guaranteed and may be subject to local, state and federal regulations which may delay or prohibit shipments. Please see the further exclusions that apply on www.msccdirect.com.

FALL PROTECTION

3M™ DBI-SALA® EXOFIT™ X-SERIES SAFETY HARNESSES

Designed for Ultimate Productivity & Performance

ExoFit™ X100, X200 & X300 Harnesses Come Equipped with Standard DBI-SALA® Features:

- **Revolving Torso Adjusters**—Patented buckles lock webbing into place
- **Personal SRL Adapter**—Connect personal SRLs to the harness with ease
- **Anti-Slide Dorsal D-Ring Pad**—Ensures a safe and proper fit
- **Suspension Trauma Relief Straps**—Integrated low-profile design between harness webbing
- **Auto-Resetting Lanyard Keepers**—Fast and easy parking of snap hooks and carabiners
- **Comfort Padding**—Breathable mesh under-side
- **3M™ Connected Safety ID**—RFID technology for simplified inventory, inspection and record management
- **ANSI/OSHA**—Tested and certified to ANSI/ASSP Z359.11 (310 lbs.) standard. Conforms to requirements of 29 CFR OSHA 1910.140 and 1926.502 (420 lbs.) regulations

FACILITY SAFETY

CLEAN ROOM MATTING

Tacky Mats

- Sheets of "tacky" film collect dirt and debris from shoes
- Use in entrance ways to reduce cleaning in adjoining areas
- For use in cleanroom, industrial and distribution facilities
- Numbered sheets to monitor usage
- 30 sheets per mat/4 mats per case

Order Number	Size	Layers Per Mat
VM72094519	36"W x 45"L	30

ANTI-FATIGUE MATTING

Deluxe Tuf Sponge Anti-Fatigue Matting

- Economical blown PVC sponge
- Available in standard sizes and rolls
- Can be easily cut to length as needed
- Also available in black with yellow borders. See mscdirect.com

Order Number	Size
VM30247191	3'L x 2'W x 5/8" Thick

ANTI-FATIGUE MATTING

WOW! Diamond-Plate with Non-Slide Finish

- Exclusive nitricell sponge base for longer life and standing comfort
- Proprietary finish holds mats in place
- PVC diamond-plate surface provides extra traction
- Available in standard sizes and rolls. See mscdirect.com

Order Number	Size
VM19167006	3'L x 2'W x 1 5/16" Thick

ANTI-STATIC MATTING

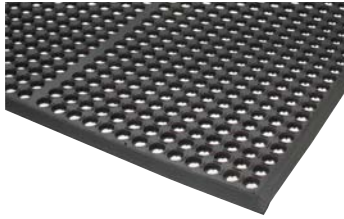

ESD Anti-Fatigue Matting

- EOS/ESD S7.1: 1 x 10³ - 1 x 10⁶
- NFSI certified
- Exclusive nitricell sponge base for longer life and standing comfort
- Grounding snap is attached to the corner of each mat
- Available in standard sizes and rolls. See mscdirect.com

Order Number	Size
VM88311410	3'L x 2'W x 1 5/16" Thick

Drainage Matting

Natural/SBR Rubber

Ideal for wet environments, or when heavy debris is a concern. The large drainage holes facilitate drainage and resist clogging.

1/2" Thick

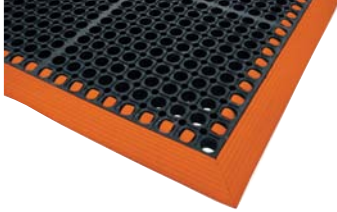

- Safety beveled edges on four sides
- Anti-Fatigue: Good
- Slip Resistance: Best

7/8" Thick

- Straight edges; can be abutted together
- Anti-Fatigue: Better
- Slip Resistance: Best

7/8" Thick with OSHA Orange Safety Borders

- Safety beveled edges on four sides
- Anti-Fatigue: Better
- Slip Resistance: Best

SPILL CONTROL & CONTAINMENT

SORBENTS

Industrial Absorbent Adhesive-Backed Grippy Floor Mat

- Absorbent surface with adhesive backing, stays exactly where you put it with no shifting, bunching or ripples that cause slips and trips
- Perfect for workstations or around machinery in industrial facilities
- Multiple layers of fine-fiber polypropylene safely absorb leaks, drips and overspray of oils, coolants, solvents and water
- Tough, spunbond top layer with heavy-duty zigzag stitching stands up to foot and light-wheeled traffic
- Leakproof backing prevents absorbed liquid from soaking through to the floor

Order Number	Absorption Capacity	OAL	Width
VM92580125	10.5gal	100'	32"

SPILL KITS

Spill Kit in 5 Gal. High-Visibility Economy Container

- Universal absorbents soak up oils, coolants, solvents and water
- Basic container saves money when you don't need a UN rated container for disposal
- Bright yellow color makes it easy to locate in event of a spill. Molded-in handles make it easy to carry
- Lightweight 100% polyethylene container resists chemicals and keeps contents dry and clean
- Tamperproof seal helps prevent pilfering of spill response supplies

Includes: (8) 15"W x 20"L mat pads, (3) 3" x 48"L socks, (2) 18"W x 30"H disposal bags, (6) 2"W x 6"L seal labels, instructions and 5 gal. plastic pail with lid.

Order Number	Dimensions	Absorbency
VM14389738	12" x 14.5"	Up to 3.5gal

SORBENTS

Absorbent Mat Roll

- Heavyweight construction delivers greater durability and absorbency
- Multiple layers of 100% polypropylene are thermally bonded for strength—will not rip, tear or fray even when saturated
- Exclusive dimple pattern speeds wicking of liquids for faster cleanup
- Absorbs most common industrial liquids—oils, waters, solvents, coolants and more
- Easy-tear perforations let you take only what you need

Order Number	Absorption Capacity	OAL	Width
VM70760020	40.2gal	150'	30"

SORBENTS

Oil Only Super Sorbent Pads

- Melt-blown polypropylene sorbent pads
- Open pores • Incinerable with .02% ash
- Wringable for reuse
- 12,000 BTUs • High-tensile strength
- 17"W x 15"L • White

Xtra Tough Absorbent Pad

- Highly versatile, gray absorbents pick up water-based, petroleum-based and non-aggressive, chemical fluids
- Heavy weight—specifically designed for continuous leaks and larger spills so you use less material
- UXT Xtra Tough absorbents are made to handle virtually any liquid and have the extra strength required to allow for wringing and re-use
- Perforations provide cost control and reduce waste by allowing you to use only what you need

RAIL SAFETY GATES

Fabenco
by Tractel®

G Series Universal Hinge Mount Safety Gates

- The G Series carbon steel self-closing safety gate is ideal for fall protection, machine guarding, access control and pedestrian traffic management
- Easy to install—no cutting, welding or drilling
- Available in multiple sizes, each with 6" lateral adjustment
- Stainless steel springs automatically close the gate after each passage

Order Number	Material	Fits	Color
VM57356750	Carbon Steel	18 to 24" Clear Opening	Gray
VM32743882	Powder Coated Carbon Steel	18 to 24" Clear Opening	Yellow

RAIL SAFETY GATES

Fabenco
by Tractel®

A Series Original Self-Closing Safety Gates

- Highly durable stainless steel spring automatically closes the gate after each swing, providing near-continuous protection from leading edge falls
- Easy to install
- Available in multiple sizes
- Positive stop
- Designed to fit on handrails of all sizes
- Capable of mounting in both left and right positions, as well as in standard or 90° positions with just a wrench and socket set

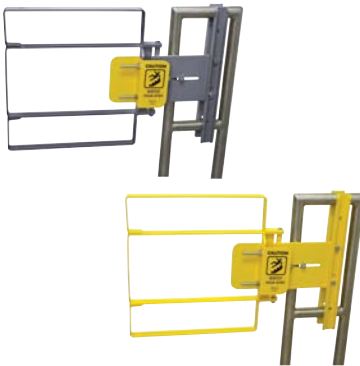

Order Number	Material	Fits	Color
VM75755371	Galvanized Carbon Steel	22 to 24½" Clear Opening	Gray
VM52994522	Powder Coated Carbon Steel	22 to 24½" Clear Opening	Yellow

RAIL SAFETY GATES

Fabenco
by Tractel®

XL Series Extended Coverage Self-Closing Safety Gates

- Larger-scale, easy-to-install fall protection system
- Designed specifically for industrial and commercial settings, the XL Series has greater height, extra bars and a durable stainless steel spring to ensure near-continuous protection from leading edge falls
- Easy to install
- Offers extended vertical coverage
- Available in multiple sizes
- Fits on all handrails

Order Number	Material	Fits	Color
VM74114240	Galvanized Carbon Steel	22 to 24½" Clear Opening	Gray
VM65299638	Powder Coated Carbon Steel	22 to 24½" Clear Opening	Yellow

RAIL SAFETY GATES

Fabenco
by Tractel®

DG Series Dock Gate

- Provides protection against falls from loading docks
- Custom gas struts make the vertical gate easy to open, and tapered guides on the receiver post make for easy alignment when closing
- Easy to install with basic tools

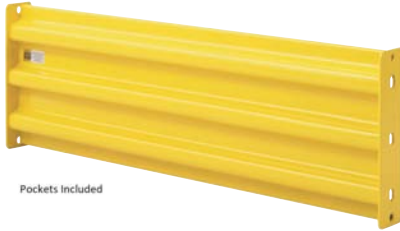

Order Number	Material	Fits	Color

MSC'S INDUSTRIAL SAFETY CONSULTANT TEAM

MSC's Industrial Safety Consultant Program can show you what you stand to gain by raising your safety standards.

To watch the video on MSC's Industrial Safety Consultant Program, visit mscdirect.com/isc

Whether your goals are as straightforward as updating PPE or as involved as overhauling your entire safety culture, we can provide you actionable insights that:

- Keep your workforce safe
- Decrease absenteeism
- Drive increases in output
- Improve overall productivity

What is an Industrial Safety Consultant?

- A technical resource to help customers implement and monitor safety programs, policies and procedures that meet OSHA guidelines and ANSI standards, ensuring the conditions for a safe and accident-free workplace are met
- Our team of Industrial Safety Consultants have industry recognized certifications, including CSP, ASP, QSSP, OSHA 30 Hour and Competent Person Certifications and more. They are fully trained in the latest safety skills and best practices.

Services the Industrial Safety Consultant Team will provide:

- Professional, unbiased recommendations to address customer safety concerns and potential gaps in OSHA compliance
- A key resource for product training and safety regulatory standards to develop solutions that will lead to a safer working environment
- Assessments and audits such as a safety needs analysis, Site Surveys/Facility Audits, Cost Savings Documentation, Trainings and more

CAREER GUIDE: COMPARING CSP & MSP SAFETY CERTIFICATIONS

Safety professionals are valuable assets to a manufacturing business. They assess the workplace for hazards and develop plans to make the facility safer. And a safer manufacturing environment saves money and saves lives.

Jobs for occupational health and safety professionals are expected to grow at roughly the same modest pace as the overall job market through 2031, according to the U.S. Bureau of Labor Statistics. But statistics may not tell the whole story. The federal government's focus on bringing work back to the U.S. is designed to drive demand for more jobs in the manufacturing industry, and with it, demand for more safety specialists.

Holding a safety certification is one way to grab the attention of employers. Amid a sea of similarly qualified candidates, a certification stands out, and pays off. **Safety professionals who have at least one certification typically earn \$17,500 a year more** than peers without any, according to a 2020 survey by the Board of Certified Safety Professionals (BCSP) and the National Safety Council. For the last 50 years, the BCSP has been regarded as the leader in safety certification, with its **Certified Safety Professional (CSP)** designation being the gold standard.

To see the requirements of these safety certifications, and to read the full article on Better MRO, visit mscdirect.com/careerguide

PROTECTING WORKERS FROM PINCH-POINT HAZARDS

What is a Pinch Point, anyway?

Pinch points, which occur in any place where body parts might be trapped between moving pieces of equipment, are especially hazardous to entry-level manufacturing workers or employees new to a worksite.

The term “pinch-point hazards” may sound innocuous enough to mislead you into thinking the risks involved are trivial. They aren’t. With the high-powered equipment used in manufacturing facilities and machine shops, pinch-point hazards can be debilitating and even deadly.

Amputations are among the disabling workplace injuries commonly linked to pinch-point accidents and regulations covering pinch-point injury prevention, including lockout/tagout and machine-guarding requirements, are among the OSHA’s most often violated rules.

TIPS TO AVOID PINCH-POINT INJURIES:

1. Never place your hands where you can’t see them
2. Pay close attention around moving parts
3. Check machine and tool safety guards
4. Follow lockout/tagout procedures
5. Never walk away from machines that are turned on or in motion
6. Securely block equipment where stored energy may be released
7. Avoid shortcuts
8. Wear appropriate personal protective equipment

To learn more about Pinch-Point Hazards and to read the full article on Better MRO, visit mscdirect.com/pinch

By Kimberly-Clark Professional®

Kimberly-Clark Professional is committed to leading the way to zero waste in landfills. Their RightCycle™ Program takes recycling personal protection equipment (PPE) to a new level.

Instead of used PPE such as protective clothing, nitrile gloves and safety glasses going into the trash (and landfills), these previously hard-to-recycle items are collected at your facility and turned into new consumer goods.

WORKPLACE SAFETY MILESTONES YOU NEED TO KNOW

When President Lyndon Johnson pushed Congress to pass a comprehensive workplace safety law in the late 1960s, he called the number of job-related injuries and deaths in the U.S. the “shame of a modern industrial nation.”

That version of the bill failed, but the idea took root—fueled by more than a century of workplace accidents, energetic safety advocacy and the incremental development of policies—mostly at the state level—to prevent workplace accidents.

The result was the Occupational Safety and Health Act, which Johnson’s successor, Richard Nixon, signed into law in December 1970.

Statistically, its results have been dramatic: The rate of nonfatal injuries and illnesses in American businesses dropped from 10.9 per 100 full-time workers in 1972 to just 2.8 in 2018.

Those rates, however, mask the starker reality that thousands are still injured and killed on the job. In 2021 alone, 5,190 people died from work-related injuries, according to the most recent figures from the U.S. Bureau of Labor Statistics, amounting to a death every hour and a half.

To drive that number lower and build on the successes of the past 50 years, “we have to change the culture of this country,” Doug Parker, head of the U.S. Occupational Safety and Health Administration, says in a National Safety Council interview coinciding with the organization’s observance of National Safety Month in June.

A vital part of continued improvement is understanding the failures—some of them tragic—and successes of the past.

MIND OVER MATTER

USING AI TO MAKE MANUFACTURING SAFER

Manufacturing facilities have become significantly less hazardous over the past couple of decades, with the rate of injuries and illnesses shrinking more than 70 percent.

Artificial intelligence may make them even safer, pushing the injury rate lower than the 3.3 per 100 workers reported to the U.S. Bureau of Labor Statistics in 2021. That was just a fraction of the 12.2 in 1994, the first year for which data was available on the agency's website.

Granted, even the most capable AI engine can do little on its own to improve workplace safety—yet, anyway. But with the appropriate data from its eyes and ears, the Industrial Internet of Things, it can identify dangerous trends and alert humans to take corrective action.

And when equipped with sensors and video cameras, AI can spot risky behavior by employees and potential machinery problems alike. The National Safety Council (NSC) is urging employers to take advantage of that through its Work to Zero initiative, introduced in response to a 2021 uptick in workplace deaths.

It's publishing a series of reports to educate industry stakeholders after determining that many were unaware of AI's potential to improve workplace safety.

One of them, "Using Data and AI to Gain Insights into Your Safety Program," suggests that three types of AI and machine learning may prove particularly helpful: computer vision, natural language processing and predictive and prescriptive analytics engines.

To learn what types of AI companies are using, and to read the entire article on Better MRO, **visit mscdirect.com/ai**

RESPIRATORY PROTECTION

PAPR & SUPPLIED AIR (SAR) HEADGEAR

3M™ Versaflo™ Respiratory Helmet Assembly M-405

- Used with an approved air source, M-400 Series helmets provide respiratory (OSHA APF=1000) and limited head (ANSI Z89.1-2003 Type 1 Class G) and eye (ANSI Z87.1-2010) protection
- Includes a standard visor and standard shroud
- Demo Center “try before you buy” program

Order Number	Headgear Type	Window Type	System Compatibility	Series Compatibility
VM41927260	Helmet	Face Shield	PAPR	GVP; M-series; Breathe Easy; TR-300

PAPR & SUPPLIED AIR (SAR) HEADGEAR

3M™ Versaflo™ Respiratory Hard Hat Assembly M-305

- With standard visor and face seal
- 3M™ M-300 Series PAPR Helmet & Helmet Assemblies are available in a variety of configurations
- Limited head (ANSI Z89.1) and eye (ANSI Z87.1) protection
- APF of 25 when used with an approved air source

PAPR & SUPPLIED AIR (SAR) COMPLETE SYSTEMS

3M™ Versaflo™ Heavy Industry PAPR Kit TR-600-HIK

- Cartridges help protect against certain gas and vapors and can be combined with filters for protection against particulates
- Longer run time, reduced downtime with a high-capacity battery and charge-level indicators to keep you prepared and informed
- Audible, visual and vibratory alerts—low airflow and low-battery alarms
- Headgear used as part of certain PAPRs can accommodate workers with limited facial hair and prescription eyewear
- Eliminate fit testing with a system that accommodates certain facial hair

Order Number	Headgear Type	System Compatibility
VM66994864	Hard Hat with Face Shield	PAPR

DISPOSABLE RESPIRATORS & MASKS

3M™ N95 Particulate Respirator 8511

- NIOSH approved for at least 95 percent filtration efficiency against certain non-oil based particles
- Features the 3M™ Cool Flow™ valve
- M-Nose clip adjusts easily for fewer pressure points and greater comfort
- Braided headbands two-strap design with dual point attachment helps provide a secure seal
- Spacious and durable

Order Number	Features
VM00099564	Exhalation Valve; Nose Clip; Advance Electret Media

RESPIRATORY PROTECTION

DISPOSABLE RESPIRATORS & MASKS

3M™ Aura™ N95 Particulate Respirator 9205+

- Curved low profile design conforms well to nose and eye contours, allowing more room for eyewear
- Designed to direct exhaled air away from the nose panel, helping reduce eyewear fogging
- Innovative chin tab designed for ease of positioning, donning and adjustment
- Individual packaging and flat fold design provides convenient storage and portability
- NIOSH approved for at least 95 percent filtration efficiency against certain non-oil based particles

Order Number	Features

HOW TO PICK THE RIGHT COLD WEATHER WORK GEAR

Winter-related slips and falls have a significant negative impact on American businesses each year, resulting in time off work, temporary employee costs, overtime for existing employees and increased insurance costs. To avoid these costs this winter, employers need to be extra vigilant and employees should exercise extreme caution in the months ahead.

Colder weather doesn't just mean potentially uncomfortable working temperatures for your employees—it could mean an uptick in disability claims, or much worse, injuries and fatalities.

OSHA suggests wearing at least three layers of loose-fitting clothing for protection, including an inner layer of wool, silk or synthetic, a middle layer of wool or synthetic and an outer layer protecting against wind or rain. The clothing should be loose to boost circulation, and insulated gloves and hats should be worn for additional protection as well.

To shop MSC's cold weather products, visit mscdirect.com/winterprep

Hi-Viz Bomber Jackets

- ANSI Type R Class 3, black bottom bomber jacket with zip-out fleece liner

CUTTING PLIERS

VDE Insulated Diagonal Cutting Pliers

- Insulated design for use in high-voltage areas with up to 1000V of alternating current
- VDE certified and built to meet IEC/EN 60900-2012
- Laser hardened cutting edges cut clean and remain sharp 50% longer
- Ergonomic anti-slip handles maximize comfort and grip strength

WARNING: Not for use on live circuits. Best practice is to always disconnect or terminate any live current to a work area before use

THINK SAFETY... THINK **APEX** ASSEMBLY & FABRICATION TOOLS

- **Apex** has revolutionized the market for covered assembly tools with the **u-Guard** line of premium safety and anti-mar fastener tools. **u-Guard** was originally introduced by Apex to provide anti-mar protection to spinning power tool sockets. However, it has been adapted by many plants to help prevent hand injuries and improve operator safety.

Apex u-Guard Covers:

- Free-spinning and designed to turn independent of the tool
- Increase operator safety by significantly reducing or eliminating pinch points
- Enables individual using the tool to grip the socket/extension sleeve as aggressively as the fastener installation may require without fear of injury
- Over 90% of the Apex line is available in **u-Guard**. Check out mscdirect.com for product availability in 1/4", 3/8", 1/2" and 3/4" drives
- With Apex **u-Guard**, you get the proven Apex fastener tool fit and dependable performance

LOCKOUT/TAGOUT SAFETY SERVICE

Investment in a Lockout Program saves lives, hands, fingers, and the bottom line. MSC can help you ensure lockout compliance at your facility through a systematic audit, visual lockout procedure writing process and compliance training.

Lockout procedures help employees avoid injury by ensuring that hazardous energy sources are isolated and rendered inoperative prior to the startup of machinery or equipment.

Lockout procedures provide detailed instruction on how to isolate and lock each energy source for a given piece of equipment.

Visual lockout procedures provide workers with a reference tool for:

- **Shutdown of machinery and control of hazardous energy**
- **Application and removal of lockout equipment**
- **Verification that machinery is in a zero-energy state**

If your facility has equipment with multiple energy sources, you are required to have lockout procedures in place.

MSC can help with our Lockout/Tagout Training and Procedure Development Program.

AEROSOL CAN DISPOSAL SYSTEM

Aerosolv® Standard System for Recycling Aerosol Cans

- Turn spent aerosol cans from a hazardous waste to recyclable steel
- Mounts on either a 30- or 55-gallon drum
- Includes two-piece coalescing filter/carbon cartridge
- Angled pin ensures a clean puncture every time
- EPA compliant

Order Number	Dimensions
VM51128064	7"H x 8"W x 8"D

OILY WASTE CANS & RECEPTACLES

10 Gal. Oily Waste Can

- Dispose of oil-soaked rags
- Prevent fires caused by stray sparks or spontaneous combustion
- Lid stays closed when not in use
- Round construction and elevated base allow circulation of air to disperse heat
- Approved by FM, UL/ULC and TUV

Order Number	Dimensions
VM89848097	13 ¹⁵ / ₁₆ "W x 18 ¹ / ₄ "H

SAFETY DISPENSING CANS

AccuFlow™ 5 Gal. Type II Steel Safety Can for Flammables with 5/8" Metal Hose

- Stainless steel flame arrester prevents flashback ignition
- Easy-to-use Safe-Squeeze® trigger for controlled pouring
- Two-openings—one for targeted pouring and one with ergonomically designed lift-lever for easy filling
- Approved by FM, UL/ULC and TUV. Also meets OSHA and NFPA requirements
- 10 year warranty

Order Number	Dimensions
VM02854990	17 ¹ / ₂ "H x 11 ³ / ₄ " Dia.

R2 Radios

- Communicate with clear audio and robust speaker microphone accessory for hands-free accessibility
- Lightweight batteries last so your MOTOTRBO R2 stays on when you need it
- High efficiency antennas work with high interference immunity providing clear audio over long distances
- Easy programmable. Can work cross-functionally with other models

FACILITY SAFETY

FIRE EXTINGUISHERS

Pro 2.5 MP

- Fitted with a pressure gauge that provides at-a-glance status
- Manufactured from lightweight aluminum cylinder and sturdy aluminum valve assembly
- UL Rated 1-A, 10-B:C
- 2.6 lbs. of fire extinguishing agent
- Rechargeable
- UL Listed
- Supplied with wall hanger

Order Number	Range (Ft. Max.)	Operating Pressure (psi)
VM01797844	15	100

FIRE EXTINGUISHERS

Pro 5 MP

- Suitable for use on Class A (trash, wood and paper), Class B (liquids and gases) and Class C fires (energized electrical equipment)
- Fitted with a pressure gauge that provides at-a-glance status
- Manufactured from lightweight aluminum and a tough metal valve assembly

Order Number	Range (Ft. Max.)	Operating Pressure (psi)
VM01797885	18	195

FIRE EXTINGUISHERS

Pro 10 MP

- Fitted with a pressure gauge that provides at-a-glance status
- Cylinder is manufactured from impact-resistant steel and the valve assembly is all metal
- UL Rated 4-A, 60-B:C • 10 lbs. of fire extinguishing agent

Order Number	Range (Ft. Max.)	Operating Pressure (psi)
VM01797901	20.0	195

FIRE EXTINGUISHERS

Fire Control FC10

- Fitted with a pressure gauge that provides at-a-glance status
- Manufactured from lightweight aluminum and a tough aluminum valve assembly
- UL Rated 10-B:C
- 2.9 lbs. of fire extinguishing agent

Order Number	Range (Ft. Max.)	Operating Pressure (psi)
VM38731543	12.0	100

VM37704038

For Use with: BBP30 Label Printer; BBP33 Label Printer; BBP35 Multi-Color Sign and Label Printer; BBP37 Color & Cut Sign and Label Printer; BradyPrinter S3100; BBP31 Sign and Label Printer.

HYDRATION

WHITEBOARDS & MAGNETIC DRY ERASE BOARDS

ACCUFORMNMC
Justrite Safety Group

Dry Erase Key Performance Indicator Board (QDIP)

- Effective tool for tracking safety, quality, delivery, inventory and productivity metrics
- Wall-mount dry erase board is 48" x 72", with document holders and marker/eraser holder
- Install in highly visible areas for visibility and communication
- Facilitates communication between team members, drives focus and accountability
- Custom options available for your unique KPIs

Order Number	Dimensions
VM79506945	48"H x 2 1/2"W

INDICATOR PASTE

DYKEM

CROSS-CHECK™ Torque Seal®

- DYKEM® Cross-Check™ Torque Seal® Tamper-Proof Indicator Paste provides a convenient visual method for identification of vibratory loosening or tampering in nuts, bolts, fasteners and assemblies
- Provides warranty protection against tampering
- Marks will be easily broken if parts are tampered with or become loose
- Highly visible under ambient light and fluorescent under UV light
- Excellent adhesion to metal and other substrates

Order Number	Color	Material
VM89868442	Neon-Orange	Oil-Based Paint

ONSITE COMPLIANCE-BASED TRAINING & E-LEARNING PROGRAMS

As experts in safety, MSC can give your employees the onsite training and e-learning they need to make your facility safer, more efficient and compliant.

Well-trained employees are happier, more efficient and make fewer errors. Moreover, lack of staff training can cause significant damage to your business's finances and reputation due to:

- **Lower productivity**
- **Poor work quality**
- **More workplace accidents**
- **Higher staff turnover**

All courses can be held onsite at your facility. Each program is customizable to your organization's unique requirements and is offered in multiple languages. Classes are all taught by experts in each trade. Choose from a variety of programs in these categories:

- **Safety & OSHA**
- **Machine & Mechanical**
- **Safety Compliance**
- **Electrical**
- **Management Safety**
- **Industrial Hygiene**

To watch the video on MCS's Compliance Training Program, visit mscdirect.com/onsite

We have experts in just about every area, so contact us today about scheduling your onsite compliance training or e-learning program. Contact your MSC Representative at **800-645-7270** or fill out the form at mscdirect.com/services.

SAFETY CERTIFICATION PAYS DOUBLE JACKPOT

BETTER SALARY, BETTER PROTECTION

Benefits of certification most cited by safety professionals are career advancement coupled with the skills to strengthen employers' workplace safety programs.

Here's a look at entry requirements for some programs from the Board of Certified Safety Professionals, which has issued more than 100,000 credentials since 1969:

CERTIFIED SAFETY PROFESSIONAL

- **Education:** Bachelor's degree in any field
- **Professional experience:** At least four years in role where safety accounted for 50 percent or more of responsibilities; duties must be preventive, professional level with breadth and depth
- **Minimum credential:** At least one board-approved credential

ASSOCIATE SAFETY PROFESSIONAL

- **Education:** Bachelor's degree in any field or associate degree in safety, health, or the environment
- **Professional experience:** At least one year of experience in role where safety accounts for 50 percent of job responsibilities; duties must be preventive, professional level with breadth and depth
- **Minimum credential:** N/A

SAFETY TRAINED SUPERVISOR

- **Education:** 30 hours of safety, health, and environmental training
- **Professional experience:** Two years of supervisory experience; OR four years of at least part-time work experience in any industry; OR an associate degree or higher in occupational safety, risk management or construction management; OR completion of a two-year trade or union training program/apprenticeship
- **Minimum credential:** N/A
