

AIR FILTRATION

IMPROVE INDOOR AIR QUALITY WITH PRO-SOURCETM FILTERS

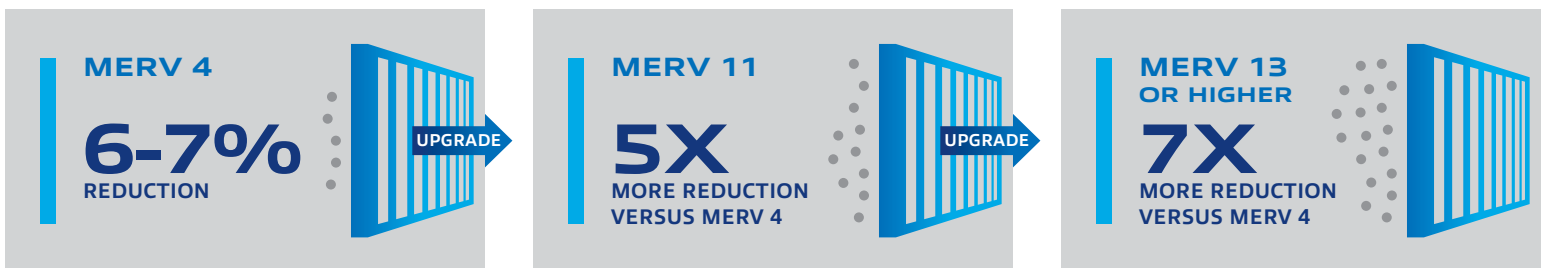

The air you breathe inside a building is often less healthy than the air found outdoors. This is due to the contaminants that build up as air is recirculated through the HVAC system.

One of the most effective ways to improve indoor air quality and protect the occupants of your building is to upgrade the HVAC air filters that are used to treat the air. All PRO-SOURCETM HVAC filters remove a range of particles and different filters have different ratings for this purpose. This is referred to as the MERV rating which stands for Minimum Efficiency Reporting Value and has a scale of 1 to 16. The higher the MERV rating, the better a filter is at removing small particles from the air.

Choosing an air filter with the correct MERV rating can have a dramatic impact on reducing the number of viral particles in the air, and therefore the chances of spreading airborne infectious diseases within your facility. PRO-SOURCETM HVAC filters come in both pleated and panel with MERV ratings ranging from 5 to 16.

REDUCTION IN RISK OF INFECTION ACROSS DIFFERENT MERV RATED FILTERS

DID YOU KNOW? FOR MOST BUILDINGS, THE HVAC SYSTEM REPRESENTS THE LARGEST PORTION OF THE ENERGY BILL. BY UTILIZING LOW RESISTANCE AIR FILTERS AND VARIABLE SPEED DRIVES, YOU CAN SIGNIFICANTLY REDUCE THE AMOUNT OF ENERGY CONSUMED BY THE SYSTEM.

MSC[®]

INCREASE AIR HYGIENE IN YOUR FACILITY

BENEFITS OF UPGRADING YOUR PRO-SOURCE™ AIR FILTERS

HVAC SYSTEM ENERGY SAVINGS

IMPROVED INDOOR AIR QUALITY AND OCCUPANT PROTECTION

REDUCED LABOR AND DISPOSAL COSTS

IMPROVED EQUIPMENT PERFORMANCE

LESS FILTER CHANGES WITH HIGHER MERV FILTERS

GOOD MERV 8

Standard Commercial HVAC Filter Solution

- Self supported
- Pleated
- Lower cost to purchase
- Removes a wide range of particles to protect the HVAC equipment

MSC® Order #	Description
33743634	12x24x2
82774886	16x20x2
82774936	16x25x2
51201275	20x20x2
51201317	20x25x2
42633370	24x24x2

BETTER MERV 10

Standard Commercial HVAC Filter Solution

- High capacity
- Wire backed, pleated
- Lower resistance than many, allowing for better airflow
- High capacity media lasts up to 50% longer than standard capacity

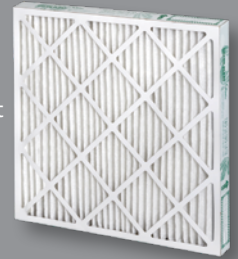

MSC® Order #	Description
00626374	12x24x2
00626382	16x20x2
00626390	16x25x2
00626408	20x20x2
00626424	20x25x2
00626432	24x24x2

BEST MERV 13

Standard Commercial HVAC Filter Solution

- Pleated
- Available in 1", 2" and 4" depths
- Meets the requirement for MERV 13 without needing to retrofit most units

MSC® Order #	Description
15164254	12x24x2
15164239	16x20x2
15164361	16x25x2
15164692	20x20x2
15164676	20x25x2
15164197	24x24x2
