

MACKIN

EDUCATIONAL SERVICES

I have been ordering almost exclusively from Mackin for over 20 years. Customer service has always been prompt, courteous and my books processed/packed efficiently. Ordering is easy and invoices clearly formatted.

— Karen S., Des Moines, WA

PK-12 School Library Services

Designed For Children's and Young Adult Title Acquisition Professionals

Every day, thousands of school librarians and classroom educators across the country enjoy the convenience of using Mackin.com to search for and discover the highest-quality, age-appropriate children's and young adult titles.

Access to 3.5 million print titles

Selection of title lists prepared by our master-degreed librarians

Access to 3 million digital titles and resources

All binding types including MackinBound

Top titles and new releases

Fiction and nonfiction

Lists by genre or interest

Professional journals

Digital Reading Takes Students Beyond the Printed Page

Access and manage all your digital content using a single username and password with MackinVIA, our free, multi-award-winning digital content management system. Convenient features like connecting from a web browser, or downloading and reading offline on the app, make MackinVIA the ideal tool for any school, classroom, and student.

eBooks

With 3 million digital titles to choose from including read-along, single-user, multi-user, subscription, interactive, and perpetual license eBooks, you're guaranteed to find the content your students and teachers are seeking.

Shared Digital Collections

The simplest and most economical way to introduce eBooks and audiobooks to a large number of students at an affordable price. When a digital library is shared, it expands the bounds of what a single school can purchase, giving all participating schools easy access to the purchased content.

Digital Audiobooks

A growing list of over 120,000 digital audiobooks, including popular titles and bestsellers, make this format a fantastic addition to any collection.

Mackin Read-Alongs

Human-voice narration and synchronized word/sentence highlighting are the connection point between auditory and linguistic learning.

Databases

Search the content of multiple databases with a single keyword using MackinVIA's Deep Discovery™ search tool.

Great White Shark

Some fish have no electric organs and so cannot form an electric field around themselves. Yet they are still able to use electricity to zero in on a nearby animal—no matter how big or small. How is this possible?

These fish have electroreceptors that can measure other animals' electric fields, just as strongly and weakly electric fish do. The most familiar of these underwater electric meters are sharks—and the most famous shark of all is the great white. When this fierce predator catches seals, large fish, and other sea animals, it uses its huge jaws and sharp teeth as powerful weapons. However, first it has to locate its prey. For this job it gets help from a secret weapon—its built-in electric-sensing system.

All animals, from worms to whales to human beings, produce and use tiny amounts of electricity within their bodies. The electricity helps do jobs such as sending signals between brain cells and making muscles move. Animals with electroreceptors can sense some of the tiny electrical signals being produced by other animals that are nearby.

During our MackinMaker selection process, the Mackin representatives were instrumental in working with us to curate maker kits and maker books to fit our student interests, curriculum, and grade levels. Furthermore, they worked closely with us to recommend products that align with our space requirements, technology infrastructure, and circulation needs.

— Lisa C., Milwaukee, WI

MackinMaker Provides Quality Resources For Hands-On Learning

MackinMaker offers a large collection of hands-on learning products and curated kits for your school. Students will be empowered to explore STEAM concepts, collaborate, think critically, solve complex problems, and create with high-quality, engaging materials that make learning fun.

Whether you are implementing a makerspace, adding STEM enrichment, or gearing up for some engaging extracurricular programming, you can make it happen with MackinMaker.

MackinMaker Services

High-Quality Products

Our professionals have assembled a wide variety of some of today's most sought-after hands-on learning materials to support:

Robotics and Coding

Podcast and Video Production

3D Printing

Design Thinking

Social-Emotional Learning

Game Design

Engineering

Augmented Reality

STEM Concepts

Arts and Crafts

Circuitry

Custom Product Recommendations

MackinMaker educators provide custom recommendations and pinpoint materials that best support goals to help schools navigate the world of hands-on learning.

MackinMaker Kits

MackinMaker kits were designed by educators to encourage complex problem solving, critical thinking, and collaboration in the areas of coding and robotics, low-tech engineering, and more.

Books

Our professionals continue to source the best books covering engaging topics related to hands-on learning for grades PK-12.

Let Mackin Classroom Services Work For You

Classroom Libraries

Surround your students with high-interest, inclusive, award-winning titles to develop a lifelong love of reading. We provide pre-built and annually updated classroom library collections for PK-12, or can help you build custom collections.

Leveled Libraries

Help your students develop critical literacy skills with guided reading instruction, using our complete pre-built F&P leveled libraries, or a customized collection of leveled readers and decodable texts.

Inquiry Kits

Custom title collections provide a focus on your chosen standards and essential questions in any content area using multiple perspectives, diverse text types, and varying reading levels.

Take-Home/Summer Reading

Build your students' home libraries with our Take-Home/Summer Reading Book Packs or create a custom solution with assistance from our experts.

Book Sets

Purchase titles for whole-class anchor texts, novel sets, and school-wide reads.

Curriculum Titles

We provide required and recommended trade texts aligned to your school's chosen curriculum.

Custom Classroom Projects

Let us recommend titles or solutions to meet your goals. Your Classroom Specialist will work with you, from aligning titles to curriculum standards, topics, reading levels, or inclusion initiatives, to sorting into containment and distributing to classrooms/schools.

RESEARCH-BASED ARTICLES FOR EDUCATORS Mackin.com/EducatorResources

Mackin exceeds expectations! By far, they provide the most comprehensive supports for schools that are serious about enhancing classroom libraries and leveled text resources.

*— Principal, Pleasant Grove Elementary,
Wake County, NC*

This was by far the best PD I've received in my 11 years here. Exciting and overwhelming at the same time but definitely reinforces a lot of the ideas we have been trying to promote at our school for the last couple years. You are amazing! Thanks!

— Minnesota Educator

Mackin Learning

YOUR GOALS, OUR GUIDANCE.

How We Partner

Prior to each Mackin Learning workshop, we work together to set goals for the sessions. As educators ourselves, we recognize the significant demands on teachers' prep and planning time, and because of this, our professional learning sessions are designed to be task-oriented workshops, not lectures. We take educators' feedback seriously and make adjustments as needed. Our ability to be flexible to each school's specific needs is what makes Mackin Learning truly unique.
