**MAMAVA PROFILE**

## Vendor Profile

### Company official registered name:

Mamava, Inc.

### Brief history of our company:

As professional women who had babies they were breastfeeding, Mamava's Co-Founders Sascha Mayer and Christine Dodson were fed up pumping breast milk in bathrooms and borrowed spaces. To find a solution, they applied their decades of expertise in design and brand strategy to solve a problem that was largely invisible: **the lack of lactation spaces in workplaces and public spaces**. Sascha and Christine took a human-centered design approach, starting with research, talking to breastfeeding people and employers, and creating prototypes of moveable lactation spaces that could be easily installed into facilities. In 2013 they installed the first lactation pod in the Burlington International Airport (BTV), and Mamava was born.

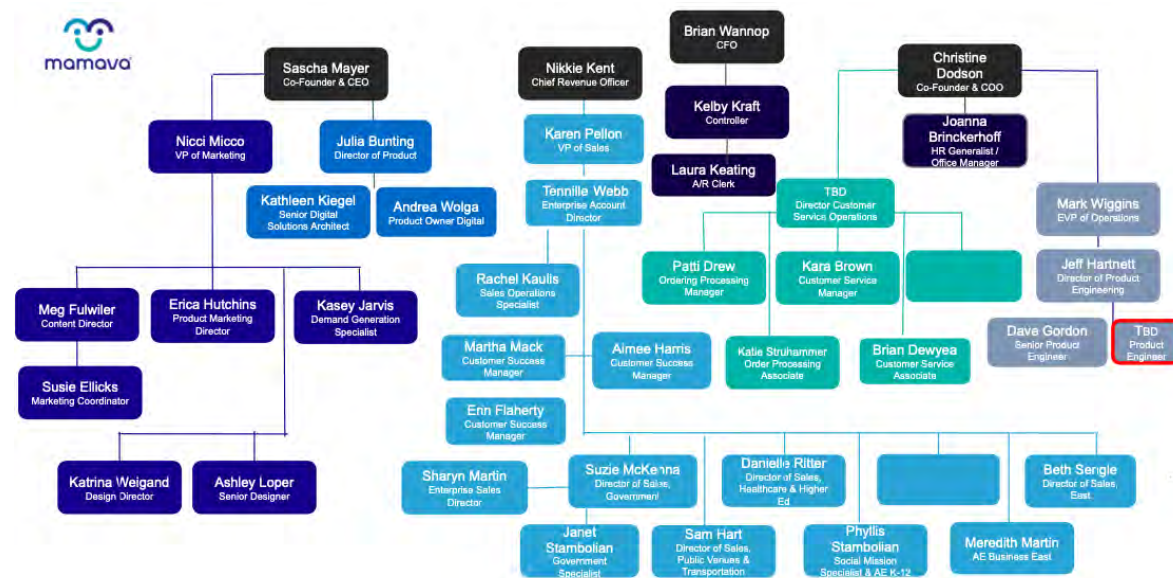

Mamava's first lactation pod, the Original, was intentionally designed for privacy and comfort for parents and quick installation, easy cleaning, and flexibility for facilities. Its unique shape also serves to broadcast that breastfeeding is happening all the time, all around us, and that parents need spaces and support.

Today, Mamava is nationally-recognized as the leader in this category, with pods in all 50 states, territories, and some overseas. We offer a full line of lactation space solutions designed to fit every space and situation. Mamava pods are designed, engineered, and assembled at Mamava Manufacturing, our production facility in Springfield Vermont. We also provide breastfeeding resources for employers, organizations, and people who are pumping and nursing—including a free app that helps folks find thousands of lactation spaces wherever they go.

Mamava's mission is to create a healthier society through infrastructure and support for breastfeeding. And, thanks to partners who share in our purpose of celebrating and supporting breastfeeding, we're closer to creating a future where there is a dignified lactation space *anywhere* a parent may go.

**Who is Mamava's competition in the marketplace?**

**Direct competitors:** Companies/organizations that elect to build their own lactation rooms or convert existing spaces for this purpose.

**Indirect competitors:** In response to demands from the marketplace, phone booth companies' response has been to install frosted glass on windows and call them lactation booths. They are not hygienic; they are primitive in what is contained within the 4 walls; the frosted glass provides very limited privacy.

**What differentiates Mamava from competitors?**

The main thing that differentiates us from competitors is that our product has been conceived, designed, built, and distributed for one purpose only: to provide a safe, clean, dignified space for women to privately breastfeed their babies or pump breast milk while on the go, working, at a military base, while working in a school, or any place where women go.

Mamava's technology is world class; our free app enables women to find thousands of appropriate lactation spaces all over the country, even if the spaces are not Mamavas. The app enables them to locate and access our pods and once inside, to connect their phone or breast pump.

**Describe how Mamava will market this contract once awarded**

We will immediately install an announcement banner on our website announcing the new contract. In conjunction with our Marketing and Sales teams, we will create and launch a marketing campaign to key customers alerting them to this new opportunity for expedited purchases without having to issue RFP's.

**Describe how Mamava intends to introduce NCPA to our company**

- We will announce the award to the Sales Team at our weekly Sales meeting.
- We will provide each Account Executive with a 1-sheet overview with talking points of the value that NCPA offers to our customers.
- We will encourage each A/E to conduct his/her own outreach to the targeted audiences to introduce the program to them.
- We will support each A/E's efforts to expand sales in all of the organizations served by this contract.

**Describe Mamava's capabilities and functionality with on-line catalog/ordering.**

Mamava does not offer on-line ordering. Our products are customized to fit the needs of our customers and merely offering on-line ordering is not in our business model. Ours is a consultative sale that customers can research on our website before purchasing, but it is highly unlikely that we will ever institute on-line ordering due to the personalized nature of our products and services.

**Describe Mamava's Customer Service Department**

An internal Mamava team works out of our Vermont office during regular business hours 8 AM-4:30 PM EDT. Situations that arise outside those standard hours will be handled at the start of the next business day.

We also have an extensive external network of local partners to facilitate quick turn-around service calls and installations.

Innovation

## **Innovation and Product Development**

### **The Mamava Solo**

Responding to feedback from workplace customers that the Original and XL models were too large for most office, school, or other commercial settings, Mamava set about designing what became known in its first year at the “Mamava Solo.” It is expressly designed as a single-person accommodation, ideally suited for offices, schools, distribution centers, and anywhere “back of house.” It contains all of the elements of the Mamava Original and XL—technology, comfort, and privacy in a well-designed, dignified, yet smaller space.

Incorporating feedback gleaned from customers who purchased the first generation of the Mamava Solo, we now offer the newest generation of the product, the Mamava Solo 2.0. It still retains the features and benefits of the original Solo, yet roomier interior with 16sq ft, and more structurally sound to move with optional casters or with a furniture dolly.

Please see the attached product sheet that highlights the evolution of the Mamava Solo from 1.0 to 2.0.

### **Mobile Outdoor Unit**

We are working on the creation of a truly **Mobile Outdoor Unit**. We anticipate this being introduced into the market in 2024.

### **Mamava Rental Program**

Mamava believes that there is a strong market for a true rental program for single-or-multi-day events, concerts, etc. We anticipate that such a program will become available in 2023.
