MYVRSPOT ACCOUNTS

For Admins, Teachers and Students to Create, Manage, and Share Instructional and Professional Development Videos

MyVRSpot is the leading online Video Management Solution built specifically for education, providing your organization a safe and secure method for uploading, creating, archiving, and sharing of digital media. In support of the ever-changing learning environment, MyVRSpot provides a complete line of instructional tools for in-class, remote, and hybrid learning.

So whether you are looking for a solution to create and share instructional videos and other digital content with teachers and students, or professional development videos with your staff, MyVRSpot has a solution ready to implement today.

MyVRSpot Accounts give you unlimited access to several key tools for successful instruction:

| Creation Tools	Assessment & Instruction Tools	Video Showcase Tool
Provide guided instruction with our Audio, Video, and Screen Recording tools. Edit media files, with our image and video editors, and even create interactive projects, presentations, and portfolios using MediaSpot, our drag-and-drop HTML creator.	SmartSpot is the perfect tool for creating engaging video-based quizzes, while the Video Response System (VRS) allows you to create interactive assessments, where your audience responds to your prompt in a text, audio, or video format.	Create and manage your own Video-on-Demand Showcase for your district, school, or classroom website. Easily highlight an unlimited number of videos that can be organized into custom categories. Simply share via a URL link or embed code.

All MyVRSpot Accounts include unlimited uploading, storage, bandwidth, and unlimited toll-free customer support

Creation Tools

Audio, Video, & Screen Recording

With the *Audio, Video, and Screen Recorder* tools, recording a read-a-loud or instructional video to share with your class, has never been easier. Each recording can be up to 60 minutes long, and can be shared with students via Google Classroom, Canvas, Schoology, or with direct URL links and QR codes.

MediaSpot

MediaSpot is a drag-and-drop, HTML creator. The solution allows for the creation of interactive, media-based projects, presentations and portfolios, with options to include videos, images, audio files, URL links, and so much more. You can create from scratch or use one of the more than 40 included teacher and student based templates.

Online Video Editor & Image Creator/Editor

Our online *Video Editor* provides 5 key functions, including: cutting parts of a video; merging multiple clips together; adding text overlays; adding transitions between clips; and adding sounds effects and background music from the extensive library of over 1,200 royalty free files.

The online *Image Creator* allows you to create new images (banners, logos, graphic organizers) utilizing a wide range of tools and features. This really is the perfect tool for creating images from scratch, or it can also be used to resize, crop, and creatively edit existing images uploaded to your MyVRSpot account.

Instructional Tools

SmartSpot

Creating video-based quizzes to assess student comprehension is becoming a new standard. You can easily create a *SmartSpot* quiz using ANY video in your account. Simply insert questions at the beginning, the end, or throughout the video, using any of the question formats, including:

- True / False (auto-graded)
- Multiple Choice (auto-graded)
- Fill In the Blank (auto-graded)
- Open Answer (manually graded)

Video Response System

The *Video Response System (VRS)* is an incredibly versatile tool allowing you to create interactive and prompted surveys, questionnaires or assessments where your audience responds to each prompt in a text, audio, or video format.

Video Showcase

Easily create your own *Video-On-Demand Showcase*, highlighting instructional or informational videos for students or parents. Media is organized by category, whether by subject, event, or timeline. Showcases can be created at the district, school, and classroom level, and can be shared via URL link, embedded into a website, or embedded into a Canvas or Schoology course.

LMS Integrations & Account Provisioning

MyVRSpot provides a direct connection to Google Classroom, giving teachers a one-touch option to share any of their videos to a specific class. If using Canvas or Schoology and creating a new assignment, teachers are able to easily add any media item stored in their MyVRSpot account via our LTI integration. MyVRSpot accounts can be provisioned for all Users in your organization via LDAP/Active Directory, Google G-Suite, Microsoft Azure, as well as with other SAML based SSO solutions, like ClassLink or Clever.
