SaaS Solutions

Benefits of MyVRSpot's Software as a Solution Platform

MyVRSpot is a completely web-based solution providing all of the benefits found in other SaaS solutions, and a whole lot more. From providing a lower overall cost than install or hardware based solutions, to virtually limitless scalability with state-of-the-art security, our customers have grown to rely on our "anytime, anywhere, from any device" solution. Hosting, creating, editing, and secure sharing of videos and other digital content has never been easier or more affordable. With account provisioning, SSO and LMS integrations, and unlimited storage and bandwidth, MyVRSpot is creating a new standard for SaaS offerings.

MyVRSpot is the leading online Video Management Solution built specifically for education, providing your organization a safe and secure method for uploading, creating, archiving, and sharing of digital media

District maintains complete ownership of all content uploaded and created in the platform	The MyVRSpot SaaS solution provides data center redundancy, limitless scalability, and long term media archiving	Access level permission settings assure adherence to your District's usage and sharing policies
