25%

The new educational environment

Technology, collaboration, and generational character are transforming education.

Research shows that 25% of a student's success is related directly to the environment in which they are learning.

Today's educators and designers are creating more "learner centered" models that revolve around teamwork, problem solving, and group discussion.

carolina
an OFS company

The new educational environment

Learning can - and does - happen anywhere. Each space has to be flexible as well as provide students with access to power and technology. Providing a variety of settings within a space gives students the freedom to choose the environment that best serves their needs.

Innovative designs allow students to select their own modes of interaction. Functional furniture provides the structure to keep groups connected and engaged.

Learning / Classrooms

Today's students are social learners, equipped with unlimited access to information and digital media. Creating a stimulating environment helps promote learning while allowing discovery and exploration.

Logistics & Reliability

Owning the process, delivered as promised

Owning our logistics network allows us to take full responsibility for delivery. We operate a fleet of over 300 trucks to ensure a flawless delivery process that aligns with your construction schedule. Add in the benefit of our 99.98% damage-free rate and an online tracking system that identifies the exact time of delivery, and you can be confident that you'll receive everything you need, exactly when you need it.

WELL certification overview

OFS Corporate Headquarters achieves WELL certification

OFS is thrilled to accept the WELL Platinum award after 3 years of adaptation to ensure our office best supports employees and visitors in their journey to wellness.

The WELL Building Standard™

The WELL Building Standard™ is the first building standard to focus on the health and wellness of building occupants. Developed by Delos and managed by the International WELL Building Institute™, WELL was designed using evidence-based medical and scientific research to create a built environment that better supports human health and well-being.

The WELL building Standard™ provides a model for design and construction to integrate human health features in the built environment. This program is a performance based system to measure the impact of built environments on human health.

Environmental initiatives

the sustainability certification program for furniture

Level

Level® is the multi-attribute, sustainability standard and third-party certification program for the furniture industry. It has been created to deliver the most open and transparent means of evaluating and communicating the environmental and social impacts of furniture products in the built environment. Taking into account a company's social actions, energy usage, material selection and human and ecosystem health impacts, level addresses how a product is sustainable from multiple perspectives. With level, customers can make informed choices about commercial furniture that exceed single attribute ecocertifications.

The level brand identifies that a product has been vetted by an independent third party certifier and its numeric marking 1, 2, or 3 indicates what threshold of certification it has achieved. Manufacturers—big and small—now have a methodology to present the environmental characteristics in a clear, easily understood manner with a vernacular that gives end users the ability to make an "apples to apples" comparison.

Scientific Certification Systems

SCS Global Services [SCS] has been providing global leadership in third-party quality, environmental and sustainability verification, certification, auditing, testing, and standards development for three decades. Its programs span a cross-section of industries, recognizing achievements in green building, product manufacturing, food and agriculture, forestry, power generation retail, and more. SCS is accredited to provide services under a wide range of nationally and internationally recognized certification programs. Consistent with its mission, SCS is a chartered benefit corporation and Certified B Corp™, reflecting its commitment to socially and environmentally responsible business practices.

SCS Indoor Advantage Gold Certification

All OFS and Carolina products have achieved SCS Indoor Advantage Gold Certification from SCS Global Services. Indoor Advantage Gold certification is SCS Global Services' highest level of indoor air quality performance for furniture. The certification assures that furniture products support a healthy indoor environment by meeting strict chemical emission limits for volatile organic compounds (VOCs). To be certified, products must be tested by independent labs for compliance with the ANSI/BIFMA X7.1, and either ANSI/BIFMA e.3 or CDPH/EHLB Standard Method V1-1 for VOC emissions of concerns.

SmartWay

OFS' and Carolina company-owned transportation company, Styline Logistics, is SmartWay-certified. SmartWay is one of U.S. Environmental Protection Agency's [EPA] clean air programs that uses voluntary, rather than regulatory methods, to achieve air quality benefits. SmartWay's focus is in the transportation sector, and encompasses products and services associated with fuel-consuming engines.

The mark of
responsible forestry

Forest Stewardship Council

The FSC® standards [Forest Stewardship Council®] represent the world's strongest system for guiding forest management toward sustainable outcomes. us.fsc.org FSC certified products are manufactured with material that comes from managed forests that are traceable from the time the logs are cut to the time the final project is installed and are recorded by way of a COC or chain of custody claim on all invoices.

The demand for certified forest products has grown significantly in recent years. OFS Brands' goal to act as a responsible steward of the environment encouraged us to pursue our FSC Chain of Custody [COC] certification which would provide our customers (Dealer, A&D Community and End-users) the added reassurance they've done their part to be earth friendly in their product purchase and enable them to substantiate the LEED [Leadership in Energy and Environmental Design] Materials & Resources Credits for certified wood, in which the intent is to encourage environmentally responsible forest management. FSC certification is optional on many, but not all, OFS' and Carolina product lines. Please contact OFS or Carolina Customer Service for information in regards to which of our product lines are available as FSC certified, and what the necessary procedures are for ordering FSC certified products from OFS and Carolina.

WELL Building Certification

OFS Brands has been approved for CEU-IDCEC credits for the OFS/Well Building Certification presentation. The WELL Building Standard provides a model for design and construction to integrate human health features in the built environment. This program is a performance-based system to measure impact of built environment on human health.
