Instructions for Providing UNSPSC Codes

What is UNSPSC?

UNSPSC (United Nations Standard Products and Services Code) is a hierarchy of products and services (a "taxonomy") used globally by many businesses and government agencies. We have adopted this structure to analyze the sales data for the benefit of Epsilon participants. Visit the UNSPSC website at www.unspsc.org.

What do I need to do with UNSPSC?

In order for the Epsilon to maximize the value of the purchase data we collect as orders flow through the program, we now require an 8 digit UNSPSC code for each line item.

What are my options for providing UNSPSC codes?

Option A: If you receive your line item data from an electronic source, you may already have access to 8 digit UNSPSC codes. Discuss this with the person or team that provides your data.

Option B: Lookup 8 digit codes using the UNSPSC search tool. This will be effective if you have several hundred line items, or fewer.

[Click here for
UNSPSC Code
Finder](#)

Option C: If you have more than several hundred line items and no automated way to obtain the 8 digit codes, contact Epsilon Corporation at 925-407-1041 or at contracts@epsilon.com. We will work with you to determine the best approach for providing data to complete this field.
