

Take control with Schneider FreightPower® TMS

Eliminate inefficiencies with an intuitive and cost-effective transportation management system.

Manual operations and processes slow down supply chains and cost businesses significant amounts of time and money. Boost your business' productivity and decrease transportation costs with Schneiders FreightPower Transportation Management System (TMS).

This intuitive new tool allows you to automate manual processes, and gives you control of your supply chain by providing instant access to data and reports, boosting your visibility, enhancing customer service capabilities and guaranteeing compliance all while working within the innovative Schneider FreightPower platform.

Schneider FreightPower TMS offers:

Easy-to-use order capture and execution, including order consolidation, mode selection, and automated route guide tendering.

Transparent rate and carrier selection, including commitment fulfillment.

Visibility to shipment tracking with maps, expected delivery dates and appointment setting configurations.

Real-time analytics that incorporate Power Business Intelligence (BI) to drive results.

Benefits of implementing a TMS within your supply chain strategy:

Cost savings

Reduce transportation costs by selecting carriers based on specific requirements, comparing rates and consolidating shipments.

Improved efficiency

Reduce errors and speed up process by automating routine manual processes like carrier selection, shipment tracking, settlement operations and shipment planning.

Greater visibility

Get real-time shipment tracking, delivery status updates and shipment-handling alerts from the time a shipment is booked until it is delivered.

Enhanced customer experience

Better shipment visibility helps enhance the customer experience, increase on-time deliveries and develop better partner collaboration.

Compliance management

Ensure compliance with transportation regulations and reduce the risk of errors that result in fines or penalties.

Real-time data and analytics

Use shipment reports and milestone dashboards to identify logistics bottlenecks, operational inefficiencies and improve inventory planning, order placement, carrier performance evaluations, and supplier management.

Transform your supply chain game with Schneider FreightPower TMS.
