

**Learning Environments**

## Learning Environments

have many uses,  
but one purpose.

Every space in every school has the potential to engage and inspire students — to invite collaboration and creativity. To be flexible and adapt to varying needs.

At School Specialty®, helping you create such spaces is our mission.

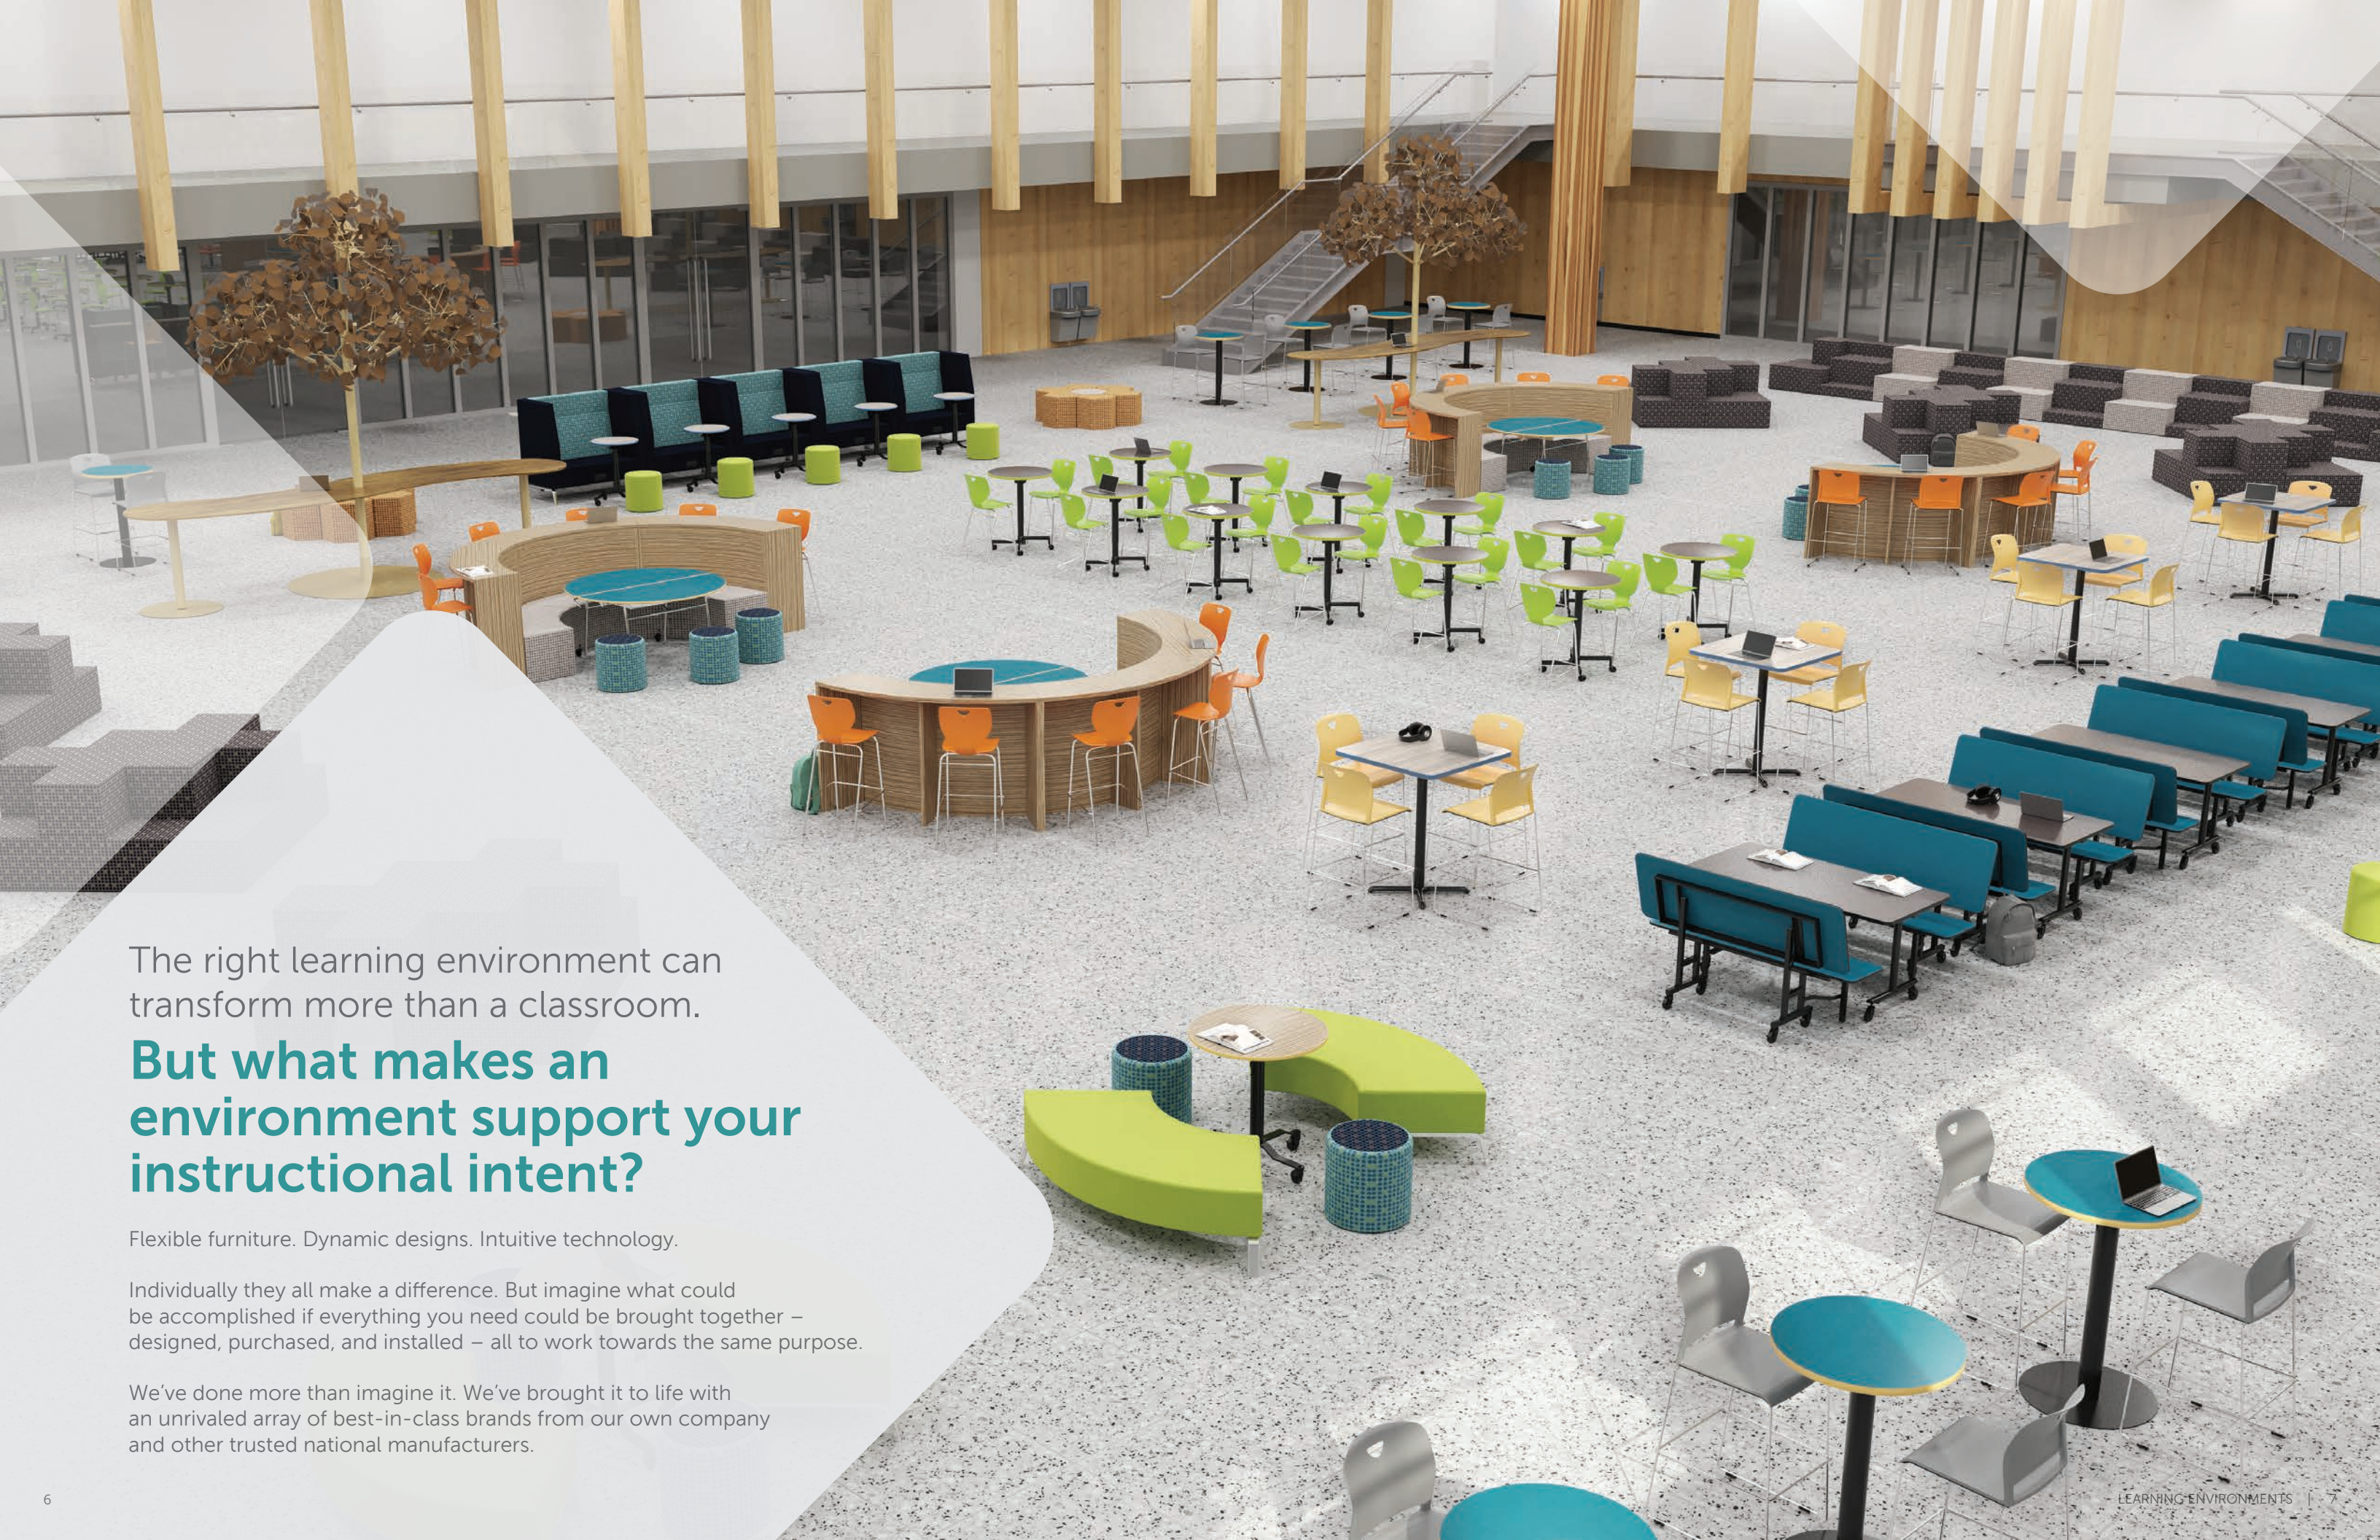

## From birth to grade 12, seating to storage, tables to tech,

we offer an extensive selection of our own,  
and other top manufacturers', furniture.

Our team of Designers, Learning Environment Specialists,  
and education experts can help you envision, design, and  
implement learning spaces that will meet your  
objectives and exceed your expectations.

The right learning environment can transform more than a classroom.

## But what makes an environment support your instructional intent?

Flexible furniture. Dynamic designs. Intuitive technology.

Individually they all make a difference. But imagine what could be accomplished if everything you need could be brought together – designed, purchased, and installed – all to work towards the same purpose.

We've done more than imagine it. We've brought it to life with an unrivaled array of best-in-class brands from our own company and other trusted national manufacturers.

## A partner every step of the way.

From no-cost design through installation and beyond, our team of in-house Learning Environment Specialists and Designers can work with you to create comprehensive ecosystems that equip and inspire every student, from birth to grade 12. We've done this for thousands of school building projects over the past two decades and we'd love to do all of this for you.

### Discover

First, we partner with you to roadmap your school's construction, renovation, or modernization programs. From auditing your current space through helping gain alignment on budget and vision.

### Design

Next, we bring your product selections to life. We show you 2D and 3D color renderings, provide final price proposals detailed room-by-room, and work together to refine selections until stakeholder consensus is achieved.

### Deliver

To ensure on-time and on-budget delivery and installation, the School Specialty® team will supervise the entire post-award process, manage all logistical arrangements, and ensure a flawless installation.

### Develop

We offer a variety of professional development courses designed to help you get the most out of your learning environments. They're ready when you are – take as much time as you need, before or after installation.

projects **by design**®

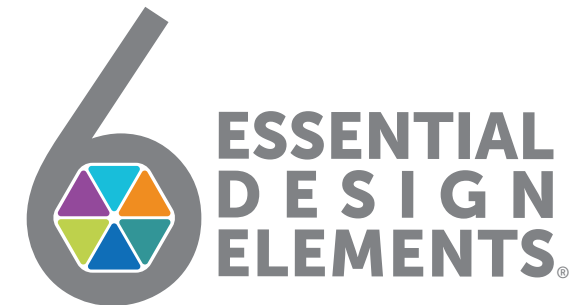

# Improve your design, increase their engagement.

Imagine a learning environment where students don't want to leave when the bell rings. Where deeper engagement – and deeper learning – can happen.

Studies show the design of a learning space can have a big influence on the type of learning that occurs there<sup>1</sup>.

## How do you design engaging and inspiring environments that improve outcomes and lead to richer learning?

1. P. Barrett, Y. Zhang, J. Moffat, K. Kobbacy  
An holistic, multi-level analysis identifying the impact of classroom design on pupils' learning

## for Future-Ready Learning Environments

### CHOICE

When kids can choose, they get engaged. Offer tables with variable heights, lots of soft seating, and a range of colors that inspire.

### CONNECTION

Collaboration is the power that fuels social energy. Create spaces that encourage interaction between students, teachers, peers, and ideas.

### COMFORT

When students are comfortable and confident enough to explore and discover, they learn better. Create spaces with ergonomic furniture, maximum-efficiency lighting, optimal air quality and temperature, and watch them go.

### STIMULATION

Engage the body and you engage the whole student. Active learning design doesn't just allow physical movement, it helps the mind swivel to attention, encouraging thinking, focus, and exploration.

### VERSATILITY

One space can fit all. Learning spaces can, and should, adjust across modes and activities. Select furniture you can remix and rearrange to meet everyone's needs.

### TECHNOLOGY

It's everywhere... and that's where students need to be able to use it. Wire and equip rooms to allow for learning and charging everywhere.

“ Not only did their design and learning environment space, but their Projects by Design process made programming to assess our needs, wants, and the what products would work, and continued design

expertise create a gorgeous and functional every decision so easy. They provided preliminary pre-existing site conditions, a budget analysis to determine support in order to meet our district’s objectives.”

## Early Childhood Classrooms

Investing in early childhood environments invests in the students they engage.

Designed with purposeful learning areas and filled with the right furnishing and materials, infant rooms can provide not just cribs and changing tables, but serenity and stimulation. Environments for toddlers through the early grade school years can foster curiosity and exploration. And every student's first steps into a lifetime of learning can be filled with wonder.

## Elementary & Secondary Classrooms

Engaging and inspiring classroom spaces can fuel richer learning and improve outcomes.

Modern classroom design should include dynamic solutions such as: flexible, multi-functional furniture. Soft, comfortable seating. Small tables or groups of desks to facilitate small group collaboration. All supported by the right technology to support instruction, student inquiry, and collaboration.

## Sensory Spaces

Sensory corners and rooms are becoming increasingly important because of the effective role they play.

Whether large or small, they support a variety of needs for general and special education students. Many innovative products and resources are available to tailor a space to your students' needs, including soothing visual and auditory inputs, comforting soft seating, and deep pressure input to relax the nervous system and reduce stress.

## Makerspaces & CTE Classrooms

Every school can realize the benefits of engaging students in hands-on creative projects.

Even if you don't have space for a dedicated Makerspace lab, a section of a library, converted computer lab, or even a spare classroom can foster creativity with the right materials and ingenuity. Modular furniture can help one space serve several purposes.

## Library Media Centers & Commons

Today's library is evolving into an active learning commons to gather, research, learn, and collaborate.

A dynamic space that supports a range of 21st century learning types includes design elements such as: fixed zones to foster some activities and flexible spaces for others. Different seating styles to support different types of activities. Space for storage and display. And most importantly - choice, so students can work where they'll be most comfortable and productive at whatever they're accomplishing.

## School Cafeterias

As a place where everyone gathers together, cafeterias can inspire a sense of community and school pride.

To enhance this quality, schools can take cues from similar spaces students enjoy, like food courts. Design choices like augmenting traditional picnic-style seating with restaurant style booths and café tables made of comfortable materials can give students an ideal place to enjoy safely gathering and collaborating on their studies.

## Administration & Facilities

Non-learning spaces serve students, staff, families, and community members alike.

From the front office to the teachers' lounge, the right design can help define these spaces. From a nurse's office filled with the latest equipment balanced by a sense of comfort, to spaces designed for teachers to collaborate and plan.

# Never run out of inspiration

## with our Professional Learning Opportunities

To help you stay current with ever-evolving techniques and teaching styles, we offer an extensive range of Learning Environments courses and Early Childhood webinars.

Our professional learning opportunities are developed and taught by former educators, administrators, and education researchers, all as passionate as they are expert.

Snap this code for more information on our Professional Learning Offerings.

## Learning Environments Courses

### Designing Innovative Learning Spaces

**Item #2029111 - Full Day Face-to-Face Course:** Helps teachers collaboratively investigate, research resources, and practice around creating and using student-centered learning spaces. Explore best practice and apply it to contexts. Prototype ideas for agile learning spaces and identify future plans.

### Culture and Climate in the Student-Centered Classroom

**Item #2029117 - Full Day Face-to-Face Course:** Explores research and examples of best practice in classroom culture. Time and space is included to develop personalized strategies to try out in classrooms, working as a cohort to brainstorm, ideate, and provide feedback.

### Incorporating Authentic Student Voice and Choice in the Classroom

**Item #2029116 - Half Day Face-to-Face Course:** Offers a variety of approaches that establishes a culture of student voice and choice, as well as strategies for managing those structures in the classroom.

### Building a Culture of Collaboration

**Item #2029114 - Half Day Virtual or Face-to-Face Course:** Collaboration is at the top of the list of skills that 21st century employers look for. This workshop will provide teachers with an opportunity to do a deep dive into the competencies that are central to collaboration.

**Item #2029115 - Full Day Virtual or Face-to-Face Course:** Teachers will also explore ways to build collaboration, and engage in a design challenge to outline how they will build structures for collaboration in their own classrooms.

### Instructional Strategies for Innovative Learning

**Item #2029113 - Online Course:** Innovative learning spaces require innovative instructional strategies, and vice versa. Experience a variety of instructional delivery methods that support student-centered learning and build 21st century skills.

## Early Education Courses

### Student-Centered Learning Environments

In this session, participants will understand basic research-based guidelines for setting up a developmentally appropriate early childhood classroom environment which will allow children to feel safe, gain independence, and engage with people and materials to foster learning.

### Transitions That Teach

Learn about the importance of transitions in the early childhood classroom and how to make the most of transition time. We will address key elements for making transitions more successful. Many ideas for teaching early childhood skills via transitions will be provided and participants will leave with some helpful tools to use during transition time in their classroom.

### Nurturing The Body, Heart & Mind Through Music

Aquire the tools to teach the whole self, empowering students to make good choices about themselves and others.

### Better Together: Strategies To Support Family Engagement

Explore current research, resources, and strategies for engaging families throughout your program.

### Establishing A Supportive Classroom Climate

This session will help participants gain awareness and develop strategies to create an environment that reflects warm, caring, and responsive relationships. This in turn will allow children to develop respect, self-regulation, accountability, and conflict resolution skills that can be useful for the rest of their lives.

### Full Steam Ahead!

Explore strategies that give early learners the diverse experiences needed to develop their problem-solving and critical-thinking skills.

Many remarkable brands for every learning environment.

**All serving one exceptional purpose.**

However the needs of education may change, what will always remain is our commitment to helping ensure every school and every student has what they need to succeed.
