

DRIVING BUSINESS OUTCOMES WITH AI

How can AI revolutionize your business operations?

Streamline processes, enhance customer experiences, and deliver actionable insights. Discover how our solutions can drive efficiency, improve satisfaction, and provide valuable data-driven outcomes.

Technologent's AI service offerings and solutions are designed to transform key areas of your operations—ranging from **document management** to **IT operations** to **customer service**—by leveraging **machine learning, automation, and software modernization**.

AI Automation

- Agentic Orchestration
- Robotic Process Automation
- AI-Driven Workflow Optimization

Generative AI

- Governance & Compliance
- Risk Assessments
- Applied Functional Gen AI
- Business Value Analysis

Coding & Modernization

- AI Code Review
- Automated Testing
- Legacy Code Modernization

Machine Learning

- Predictive Analytics
- Anomaly Detection
- Recommendation Systems

Document Library

- AI-Powered Search
- Automated Tagging
- Intelligent Document Summarization

Customer Service Agent

- AI Chatbots
- Sentiment Analysis
- Personalized Customer Support

Artificial Intelligence Solution Offerings

Learn & Inform

AI Bootcamp & Chief AI Officer On-Demand

Empower your organization with our AI Bootcamp for hands-on training and personalized workshops, while leveraging our On-Demand Chief AI Officer for strategic guidance, enabling seamless AI integration, digital transformation, and long-term success

Experiment & Build

Use Case Identification & POC/MVP

Unlock innovative AI opportunities through the Art of the Possible, enabling rapid development of scalable POCs and MVPs, with solutions built in our labs so you can focus on delivering business value.

Improve & Finetune

AI Product Factory & Tool Selection Framework

Comprehensive tools and frameworks for optimizing AI models, ensuring seamless integration, and enhancing operational efficiency through advanced machine learning and large language model operation.

Operate & Grow

End to End Implementation

Holistic approach to AI integration, from infrastructure design and hybrid cloud optimization to AI FinOps and governance, while continuously maximizing business value, operational performance, and scalability.

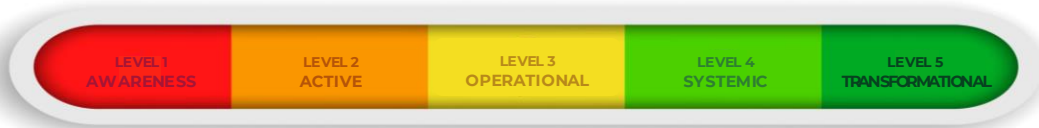

Technologist FlexAble

The Complete AI Solution—Services + Platform

FlexAble combines the power of all the services into a single, cohesive platform. This advanced AI orchestration framework streamlines integration, automates workflows, and unifies data, enabling seamless collaboration between systems and teams. With FlexAble, your enterprise gains the flexibility to evolve and the power to drive transformation at scale.

AI VALUE SCALE

Outcome & Next Steps

Our solutions are designed to deliver significant outcomes, including improved productivity, cost savings, and data-driven decision-making. With our approach, you can **accelerate your customer journey by six months**, ensuring a faster path to success.

Ready to take the next step? [Let's move forward and transform your business with AI.](#)

Learn & Inform: AI Bootcamp & Chief AI Officer OnDemand

At the forefront of AI integration, our **AI Bootcamp and Chief AI Officer On-Demand** service offerings provide a tailored and strategic pathway to accelerate your organization's AI maturity and operational excellence.

Our approach focuses on establishing governance, providing expert guidance, and ensuring your AI operations align with business objectives—so you can drive digital transformation, optimize your AI investments, and achieve scalable growth. **Do AI right from the start with our proven solutions for lasting success.**

AI Bootcamp

Jumpstart Your AI with Best-in-Class Foundations

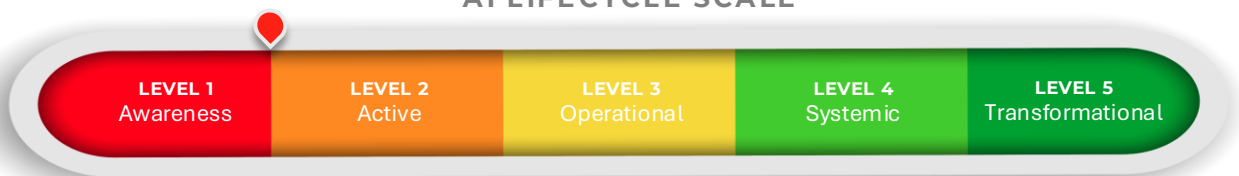

- Comprehensive 2-day session to establish a robust AI governance framework.
- Key deliverables **include customized templates, roadmaps, personas, and governance pillars.**
- Launch your AI Center of Excellence (COE) with a strong foundation.
- AI Maturity Roadmap to support customers at any stage of their AI journey.
- Conduct a Well-Architected Review to **ensure your AI COE is on track for long-term success.**

Chief AI Officer On-Demand

Expert Guidance When You Need It

- Flexible, **no-commitment** advisory service **tailored to your specific needs.**
- Strategic reviews to identify architecture gaps and optimize AI operations.
- Provide actionable insights to ensure your AI initiatives drive tangible results.
- Expertise focused on enhancing AI capabilities using Technologist's industry best practices.
- Designed for customers not seeing desired progress from their technical teams.

AI LIFECYCLE SCALE

Experiment & Build: Use Case Identification & POC/MVP

Unlock innovative AI opportunities with our **Experiment & Build** offerings, leveraging the **Art of the Possible** to rapidly develop scalable POCs and MVPs in our AI Innovation Lab. We handle the end-to-end process—from identifying use cases and requirements to building and reviewing solutions—**allowing you to focus on delivering business value while we take on the technical risks.**

USE CASE IDENTIFICATION: In collaboration with your team, Technogent will review workflows, identify business pain points, and explore opportunities for AI innovation, focusing on requirements, constraints, and potential improvements.

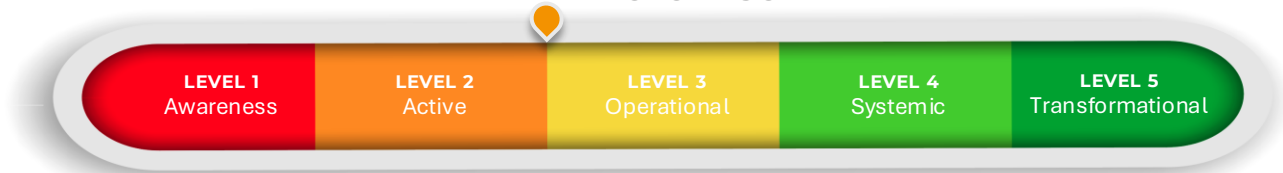

REQUIREMENTS & CONSTRAINTS REVIEW: Our team will work closely with you to assess the operational requirements, technical constraints, and desired outcomes to ensure alignment with your business objectives.

POC DEVELOPMENT (7 DAYS): Within 7 days, we deliver a fully functional Proof of Concept (POC) built in our AI Innovation Lab, showcasing AI capabilities tailored to your specific needs.

POC REVIEW & SCALING OPTIONS: Once the POC is developed, we review it with you, discussing scaling options, functionality, features, performance, and security considerations for the next phase.

MVP BUILD (2 WEEKS): In just two weeks, our team will evolve the POC into a Minimum Viable Product (MVP), built in our labs, taking on the technical risks while you focus on delivering business value.

AI LIFECYCLE SCALE

SERVICE CATALOG

Technologent Artificial Intelligence Services

Our AI Services Catalog uses advanced tools such as **Machine Learning (ML)**, **Deep Learning**, **Reinforcement Learning**, and **Generative AI** to improve areas like RPA, categorization, detection, time series analysis, and more.

Document Library

- Predictive Analytics
- Real-Time Risk Assessment
- Fraud Detection
- Automated Screening
- Real-Time Monitoring & Control
- Custom Document Creation

AI Automation

- Automated Bug Detection
- Code Review Automation
- Automating Administrative Tasks
- Process Optimization
- Route Optimization
- Automated Scheduling
- Quality Control Automation
- Predictive Modeling

Machine Learning

- Fraud Detection
- AI-Driven Diagnosis
- Recommendation Engines
- Content Recommendation
- Adaptive Learning Platforms
- Predictive Maintenance

Generative AI

- Automated Content Generation
- AI-Assisted Design and Creativity
- Personalized Recommendations
- Document Generation and Summarization
- Image, Text, and Audio Synthesis
- GRC Analysis
- Risk Assessments
- Applied Functional Gen AI
- Business Value Analysis
- Gen AI Interface

Coding & Modernization

- AI-driven Development Environments
- Server Optimization
- Network Optimization
- Autonomous Systems
- Predictive Maintenance of Infrastructure

Customer Service Agent

- Automated Customer Service
- Chatbots for Customer Service
- Chatbots for Customer Engagement
- Real-Time Translation & Subtitling
- Automated Administrative Tasks
- Virtual Human
