PERFORMANCE OPTIMIZATION:

- SQL Statement Tuning
- Query Optimization
- System Tuning
- Troubleshooting

BACKUP & RECOVERY:

- BR Strategy
- Backup Configuration
- Backup Implementation
- Backup Validation

SECURITY:

- Data Encryption
- Auditing
- Patch Management
- Security Management

TECHNOLOGENT DATABASE FRAMEWORK

Our Database Security Services & Capabilities

The Technogent's database team will scan your databases and associated systems for vulnerabilities such as missing patches, weak passwords, misconfigurations, excessive privileges, default vendor accounts and external threats. Additionally, we look at your data administration and security policies to see if they meet industry standards and best practices. Finally, we calculate your level of risk and present you with a detailed security and compliance report, complete with prioritized recommendations for fixes, upgrades, and improvements.

Technogent Remote Database Management Services

Technogent's Remote Database Management Services is on your terms, meeting your business needs. Let us manage your day to day database activities while your DBAs enhance their skills and innovate. We provide quality database management services and support for your database systems, based on your requirements and your budget. Remote DBA has database services solutions to help your business succeed.

Our Key Database Partners

As a leading Oracle partner, we're experts in all things Oracle. Whether it's an engineered system, cloud, databases, ERP or EPM solution, our Oracle consultants have deep technical expertise and skills to deliver smart Oracle solutions.
